DUCK SEASON opens.
ON OCTOBER 1st.
AND SANDY Pratt, President.
OF THE Pratt Building Material Co.
CENTRAL OFFICE—San Francisco.
HAS BEEN promised.
SO MANY birds.
THAT SANDY wonders.
WHAT HE will do.
WITH ALL of them.
BUT SANDY has heard.
THIS SAME song.
YEAR AFTER year.
AND MAYBE the flood.
OF WILD ducks.
TO SANDY'S central office.
WILL NOT be as large.
AS THE promises are.
FIRST, JACK Long, salesmanager.
FOR SANDY'S company.
IN SUPERIOR California (Sacramento).
PROMISES A carload of birds.
THEN H. C. Cate, plant superintendent.
AT SANDY'S sand plant.
ON THE American River.
AT SACRAMENTO.
SAID HE would ship ducks.
SO MANY in number.
THAT THE American Express Co.
WOULD PUT on a special train.
BUT CARROLL Stephens, Manager.
FOR CHARLEY Cadman.
OF THE Atlas Mortar Co.

AT SACRAMENTO.
SAID THAT he (Stephens).
HAD ACCESS to 10 gun clubs.
AND COULD supply Sandy.
WITH ENOUGH ducks.
TO FEED all San Francisco.
THEN THERE is Harry Bell.
OF SANDY'S rock plant.
AT PRATTROCK (near Folsom).
TO HEAR from.
AND AT SANDY'S sand plant.
AT MARYSVILLE.
AND AMONG all the ducks.
F. R. LANTZ, plant Superintendent.
WILL PROBABLY bury Sandy.
WITH MALLARDS, sprigs, etc.
SO DEAR reader.
IF YOU send any ducks.
TO SANDY.
ONLY SEND a few.
"I THANK you."

N. O. Shot of the Pratt Building Material Co., sand, crushed rock, and washed gravel producers, who promised Sandy Pratt ducks last year. Sandy d.d. not even receive one duck feather.

Official Proposals

SEALED PROPOSALS

(General Contract—Sacramento Memorial Auditorium, Sacramento, California. Ad No. 142)

Sealed bids will be received by the undersigned for the City Council of the City of Sacramento, at the office of the City Clerk in the Sacramento City Hall, on I Street, between 9th and 10th Streets, at 8:15 P. M. on Monday, October 5, 1925, for the furnishing of all labor, equipment and materials necessary for the erection work in connection with the construction of the Sacramento Memorial Auditorium, in accordance with amended plans and specifications adopted September 24, 1925.

All such proposals must comply with the requirements of the city ordinances applicable thereto, and the city charter of the City of Sacramento, effective June 30, 1921, and bidders are hereby cautioned that any bid which fails to comply therewith can not be considered.

Bids must be submitted upon printed proposal and affidavit form, supplied by the City Clerk, without charge to the prospective bidders, and enclosed in an envelope marked "Sealed Proposal for the General Contract, Memorial Auditorium, Sacramento, Calif."

At the same time with the execution of the contract for said work, successful bidder will be required to furnish a contract bond for faithful performance of the work, in the sum of 50 per cent of the amount of his contract, in addition to which contractor will also execute a labor and material bond in sum not less than 50 per cent of amount of contract.

A certified check made payable to the City Controller of the City of Sacramento, as prescribed in section 256 of said charter, for ten per cent (10%) of the aggregate of the proposal must accompany each bid.

The right to reject any and all bids is reserved to the City Council by provisions of said charter.

Plans and specifications must be returned to the Architect on or before date bids are opened.

H. G. DENTON,
City Clerk of the City of Sacramento.

SEALED PROPOSALS

(Electrical Work—Sacramento Memorial Auditorium, Sacramento, California. Ad No. 141)

Sealed bids will be received by the undersigned for the City Council of the City of Sacramento, at the office of the City Clerk in the Sacramento City Hall, on I Street, between 9th and 10th Streets, at 8:15 P. M. on Monday, October 5, 1925, for the furnishing of all labor, equipment and materials necessary for the electrical work in connection with the erection of the Sacramento Memorial Auditorium, in accordance with amended plans and specifications adopted September 24, 1925.

All such proposals must comply with the requirements of the city ordinances applicable thereto, and the city charter of the City of Sacramento, effective June 30, 1921, and bidders are hereby cautioned that any bid which fails to comply therewith can not be considered.

Bids must be submitted upon printed proposal and affidavit form, supplied by the City Clerk without charge to the prospective bidders, and enclosed in an envelope marked "Sealed Proposal for the Electrical Work, Memorial Auditorium, Sacramento, California."

At the same time with the execution of the contract for said work, successful bidder will be required to furnish a contract bond for faithful

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

performance of the work, in the sum of 50 per cent of the amount of his contract, in addition to which contractor will also execute a labor and material bond in sum not less than 50 per cent of amount of contract.

A certified check made payable to the City Controller of the City of Sacramento, as prescribed in section 256 of the said charter, for ten per cent (10%) of the aggregate of the proposal must accompany each bid. The right to reject any and all bids is reserved to the City Council by provisions of said charter.

Plans and specifications must be returned to the architect on or before date bids are opened.

H. G. DENTON,
City Clerk of the City of Sacramento.

NOTICE TO BIDDERS

(School Bus—Alameda)

Sealed proposals, or bids, are hereby invited by the Board of Education of the City of Alameda and of the Alameda School District of Alameda County, California, and must be filed at the office of the Secretary of said Board, at the City Hall, located at the corner of Oak Street and Santa Clara Avenue in said City, on or before the hour of 8:00 P. M. of the 13th day of October, 1925, for furnishing and delivering a School Bus, in accordance with the terms and conditions outlined below:

Bus to be enclosed type with a seating capacity of forty (40) persons, based on a width of twelve (12) inches for each seat.

Proposal or bid, must be accompanied with specifications for the chassis and power plant to be used, which will give the following information:

1—Wheel base; 2—length over all; 3—width of frame; 4—width over all; 5—size and type of springs; 6—weight of chassis; 7—sizes and types of wheels and tires; 8—bidder to state whether frame has been lengthened or is stock model as delivered by the manufacturer of the chassis; 9—total weight to bus.

Proposal or bid, must also be accompanied with specifications for the body, which will give the following information:

QUANTITY SURVEYOR

Valuation Engineer

ARTHUR PRIDDLE

608 Mission Street, at Third St.

San Francisco, Calif.

Telephone Douglas 8-4-9-1

General Listing Bureau

Architect's Preliminary Estimates

1—types and kinds of materials used in the framing; cross bars; side sills; posts; belt rail; floor; wheel-housing; head rail; bows; top; and sides of body.

2—types and kinds of materials used for windshield; door; rear window; window openings and curtains; 3—Seats and seating arrangement; 4—ventilators; 5—finish; 6—standard equipment; 7—kind of guarantee. Samples must be furnished of leather used in upholstery, and of material used for lights in curtains.

Bidder must state the date of delivery.

All bids shall be clearly and distinctly written, without any erasure or interlineation.

All proposals shall be accompanied by a certified check, or cash, in the amount of ten per cent (10%) of the total contract price for one bus, conditioned that the successful bidder will furnish and deliver the article specified within the time stated in the proposal.

The Board of Education reserves the right to reject any or all bids.

Bidders may bid on more than one type of bus, and one certified check for ten (10%) per cent of the highest proposal shall be sufficient.

By order of the Board of Education of the City of Alameda and of the Alameda School District of Alameda County, California.

Dated this 28th day of September, 1925.

WM. G. PADEN, Secretary.

NOTICE TO CONTRACTORS

(Roof Repairs—Fort Mason)

OFFICE CONSTRUCTING QUARTERMASTER, Fort Mason, Calif.

Sealed proposals will be received here until 11 A. M., Oct. 6, 1925, for repairs to roofs at Fort Mason, Calif. Information upon application.

BIDS WANTED FOR HIGHWAY IMPROVEMENT

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned until 2:00 P. M., October 14, 1925, for constructing a portion of the state highway system in Lander County, from Austin Cemetery thru the Town of Austin to the easterly town limits, length 1.50 miles, work consisting of grading, construction of curbs and placing a selected material surface.

Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned; may be examined also in the division office at Elko, Reno and Las Vegas and the district office of the Bureau of Public Roads, Bay Building, San Francisco, also in the county clerk's office at Austin. For each copy of plans undersigned requires a deposit of fifteen dollars (\$15.00) which will be refunded upon return of plans in good condition within 30 days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of 5 per cent of bid.

Each bidder must accompany his bid with certificate from a surety company, duly authorized to do business in Nevada, stating that such surety company will provide said bidder with a bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEORGE W. BORDEN,
State Highway Engineer,
Carson City, Nevada.

NOTICE TO CONTRACTORS**(Structural Steel Roof Framing—San Quentin State Prison)**

Informal sealed bids will be asked for shortly by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, for furnishing all plant, materials, and labor required for the erection and completion of Structural Steel Roof Framing for the West Wing of the Cell Block, San Quentin State Prison, San Quentin, California, in accordance with plans and specifications therefor, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California.

The West Wing of the Cell Block is a building approximately 275' long and 4' 0" wide, and is constructed of reinforced concrete. Trusses and roof framing generally will be built up of light sections. Time of completion of the work will be taken into consideration in awarding the contract.

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE.

GEO. B. McDOUGALL, State Architect.
W. F. McCLURE, Director of Public Works.

NOTICE TO CONTRACTORS**(Davis School District—San Joaquin County)**

Sealed bids will be received and opened by the Board of Trustees of the Davis School District, of San Joaquin County, California, at 1:30 P. M., October 14, 1925, at the office of the architect, for the erection and completion of a brick veneer school and accessory buildings, all in accordance with plans and specifications prepared for the same by Victor Galbraith, architect, 208 Elks Bldg., Stockton.

Plans and specifications may be had at the office of the architect. A deposit of ten (\$10.00) dollars will be required on all plans loaned out, which sum will be repaid upon the return of the plans and specifications in a whole and undamaged condition.

All bids to be made out on blank forms furnished by the architect, and must be accompanied by a check for not less than ten per centum (10%) of the amount of the bid, payable to Mrs. E. J. McCoy, clerk of the board, and certified to by some responsible banking house. This check to be forfeited in the event that the successful bidder, after having been awarded the contract, fails within five days to sign the contract and furnish good and sufficient bonds as required by law.

The board reserves the right to reject any or all bids.

All bids to be addressed to Mrs. E. J. McCoy, Clerk of Board of Trustees of the Davis School District, San Joaquin County.

Dated this 29th day of September, 1925.

MRS. E. J. MCCOY,
Clerk of the Board of Trustees of the Davis School District.

STATE OF CALIFORNIA**CALIFORNIA HIGHWAY COMMISSION****NOTICE TO CONTRACTORS**

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on October 23, 1925, at which time they will be publicly opened and read, for construction, in accordance with specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, between Laigo Creek and Las Flores Canyon (VII-L.A.-60-A), about six and seven-tenths (6.7) miles in length; six and three-tenths (6.3) miles to be paved with Portland cement concrete, and four-tenths (0.4) miles to be paved with bituminous macadam.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willis, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all

bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS EVEREDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MILXON, Secretary.

Dated: September 23, 1925.

NOTICE TO BIDDERS**(Modesto Irrigation District, Stanislaus County, California)**

Sealed proposals will be received at the office of the Modesto Irrigation District at Modesto, California, until 10:00 A. M. on October 6th, 1925, for submitting Form and Delivery Contracts or other agreements covering our requirements of electric meters and distribution transformers to be furnished in accordance with the terms of contracts covering a twelve-month period.

As a basis for comparing bids, an estimate of \$5000 for meters and \$10,000 for transformers to be purchased during the said period will be used in determining the proposal most favorable to the district.

Bidders will submit their prices with base and quantity discounts covering a year's requirements of supplies above specified. Bids may cover either or both classes of apparatus.

Bidders will inclose a list of stock on the Pacific Coast available for immediate shipment and the location of shipping point.

Copy of specifications and a list showing the various sizes to be covered by proposals will be furnished upon request.

The contract will be let to the lowest responsible bidder, but the Board of Directors reserve the right to reject any or all bids.

Each proposal must be accompanied by a certified check for 5 per cent of the above amounts, payable to the order of the Treasurer of the Modesto Irrigation District for the benefit of said District, as a guarantee that the bidder will, if successful, execute a satisfactory contract and furnish a bond for 10 per cent of the above amounts for the faithful performance of the terms of said contract.

Proposals must be marked "Proposal for a Twelve Month Contract for Furnishing Transformers and Meters" and addressed to Modesto Irrigation District, Modesto, Calif.

Done in pursuance of the order of the Board of Directors of the Modesto Irrigation District, this 14th day of September, 1925.

C. S. ABBOTT,
Secretary Modesto Irrigation Dist.

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) stenographic cutting, writing on ruled forms and many other kinds of office work can all be done on the L. C. Smith & Bros. typewriter.

The decimal tabulator and the variable line spacer are part of the inbuilt service of every L. C. Smith & Bros. machine.

METAL WORK CLASSES FORMED IN OAKLAND SCHOOL

Many Oakland schools have trade classes, but it has remained for Prescott School, Tenth and Campbell Sts., to start something new.

The novelty is a course in sheet metal work, given Tuesday and Thursday evenings between 7:15 and 9:15 o'clock, with L. J. Drungold as instructor.

How to make cornices and a score of other things with sheet metal is taught by Drungold.

The class, he says, has been open only a short time, but already more than 25 students are enrolled. Boys over 16 and men of any age may take the course.

Even at this early stage, work of good quality is being turned out by the class, according to Drungold.

MUNICIPAL OWNERSHIP PAYS

Municipal ownership of lights and water in Lodi made a net profit of \$66,129.23 during the fiscal year. This is shown in the annual report of City Clerk John F. Blakely.

The water service after paying operating expense showed \$23,267.89 profit net to the municipality. Electricity for lights and power showed a net profit of \$42,871.35. The municipal baths were operated at a loss of \$3,158.77.

During the year there was a gain of seventeen water users which brings the total consumers up to 2188 and 2300 users of electricity.

The total expenditures of the city amounted to \$242,436.71, while the receipts grossed \$282,414.83.

SACRAMENTO BUILDERS EXCHANGE

KOEHRING DANDIE Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details — but it's *strong, rugged* — it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. May be equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

SACRAMENTO EXHIBIT UNDER NEW MANAGEMENT

The Sacramento Building Material Exhibit, 910 Ninth street, Sacramento, has been taken over by Mrs. R. N. Hamilton who has been connected with the exhibit since its establishment by Miss Geneva Watson in September, 1922. Later Miss Watson disposed of her interests to D. G. Nunneley who in turn disposed of it to the present owner.

Arrangements are now being completed for the installation of additional exhibits, particularly those which would appeal to the prospective home builder. Nearly one hundred firms are now represented in the exhibit, the latest installations being made by the gas appliance dealers of Sacramento.

OWNER IS RESPONSIBLE

The city attorney of Santa Barbara has ruled that the owner is responsible for the acts of his agents and that the building inspector is not concerned with the phases of ownership when the building code is being violated. The ruling evolved as a result of a shed being erected on the property of a lumber company situated outside of the proper zone for warehouses. The lumber company contended the builder instead of the company should be held responsible because the builder was erecting the shed.

SEPTEMBER BUILDING IN LOS ANGELES \$11,071,923

Building activities in Los Angeles for the month of September totaled \$11,071,923. During the month 3707 permits were issued. For the month of August the number of permits was 3493 and the estimated valuation was \$10,221,257, while for September, 1924, the number of permits was 4553 and the estimated valuation was \$13,090,467.

Class A construction for September, 1925, amounted to a million dollars more than in August, permits being taken out for eight buildings of this class with an estimated valuation of \$2,673,000. Class C construction for the month was represented by 65 buildings, with an estimated valuation of \$1,689,794. Class D, all-frame construction, amounted to \$5,377,066 for 2479 buildings. Alteration work was in excess of one million dollars.

For nine months of 1925 Los Angeles' building total was \$1,744,549 less than for the corresponding period last year.

Housing operations slackened somewhat during September. A total of 1166 permits for dwellings and apartment houses were issued with an estimated valuation of \$5,464,045 and containing accommodations for 1575 families. These comprise 31.4 per cent of the number of permits and 49.3 per cent of the valuation for the entire month.

Permits were taken out during September for 29 apartment houses estimated to cost \$1,045,600 and providing accommodations for 344 families. These figures represent a slackening in apartment house construction as compared with previous months of the year. Efforts of apartment house owners to discourage building of more apartments are probably reflected in the decrease. It is apparent, however, that a certain amount of construction in this class of buildings can be counted upon, as there are owners constantly planning such investments and they are guided by their own inclination and personal judgment rather than by propaganda.

MACHINE TO TEST BUILDING STRENGTH PERFECTED

A machine which will determine accurately the strength of building tile, brick, or other materials both in the final finished form and in the dry state before burning, has just been developed by A. C. Harrison of the Bureau of Standards, Department of Commerce.

This machine has a much higher degree of accuracy than has been obtainable heretofore over a wide range of loads. The greater flexibility of the machine also permits the testing of a considerable variety of sizes and shapes of laboratory specimens.

It is believed that it will find ready application, because in determining the quality of ceramic products it has been found that the strength of the materials in the finished state may be much greater than before burning, thus making it necessary to carry out tests in both conditions.

U. OF C. ARCHITECTURE RANKS HIGH—STUDENTS WIN HIGH HONORS

The University of California is proud of its school of architecture. It has reason to be.

Within the last year its students have won signal honors both in the United States and abroad, in open competition with the best that other schools could produce.

In the last exhibition held by the American Institute of Architects in Washington, D. C., Scott Haymond, medal student at Berkeley, and California entry, took second prize, placing before all other institutions in the country except Columbia.

Ernest Born, a graduate in 1922, now studying in Rome, won second place in the annual competition of the American Academy at Rome this summer.

Angelo de Sousa, a graduate student, won first place and a prize of \$500 in a national open competition for a small house design. In addition to placing second in another contest.

Michael Goodman, a young Russian in the first year of his graduate work, is another student who has won recognition in the field of architectural drawing and illustration.

For the last year he has supplied all the cover designs of the California Monthly, alumni periodical, and is now engaged on a series of drawings of the new Hearst hall, so that when it is fully completed he will have made a pictorial history of the construction of what will be one of the most outstanding buildings on the campus.

NEW STEEL PROCESS

A new discovery which promises to revolutionize one phase of the steel industry was announced at the seventh annual convention of the American Society for Steel Treating at Cleveland, Ohio.

After working on them for years, H. A. Schwartz, Cleveland, revealed formulas to calculate the exact time to anneal malleable iron castings and to test materials with respect to the ability to anneal. Heretofore, the proper annealing time was reached only by guessing, and an idea of the ability of material to be annealed was had by long process of experimentation. The new methods mean a great saving of time and material.

HOUSE BUILDING IN ENGLAND

A Mr. Savory of Bristol, England, has invented a system of construction that does away with masonry and platforms or stagings. The house is composed of a metallic framework protected by a special rust-proof paint. Cement slabs, varying in size from 10x20 inches to 30x40 inches, are attached to this framework by means of wooden plugs fitted into cavities or holes in the slabs. The interior walls and floors are covered with the same slabs.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

ALONG THE LINE

The Standard Sanitary Manufacturing Company of Pittsburgh, Pa., and the Pacific Plumbing Fixtures Company of Richmond announce completion of their merger. According to officials of the new corporation, more than \$5,000,000 will be spent in the East Bay for expansion purposes. The new concern, known as the Sanitary Manufacturing Company of California, plans to construct an office building and show room in Richmond. It is further stated that more than 2000 men will be employed in the huge factory. Beside extensive business on the Pacific Coast, a large sales volume has been enjoyed by the Company in Mexico, South America and the Orient.

Action to settle whether the state can use an appropriation of \$300,000 by the last legislature for completion of the two capitol extension buildings has been taken. W. F. McClure, as director of the department of public works, filed with the clerk of the supreme court a petition for a writ of mandamus seeking an order directing Ray L. Riley, state controller, to draw two warrants totaling \$10.10 for work done on the new buildings. Use of the balance of the \$300,000 hinges upon the decision in regard to payment of the claim of \$10.10.

A reel of motion pictures showing the California prisons and road building activities with prison labor were shown to visitors at the recent State Fair. The pictures were made by Pathe without cost to the state in connection with the preparation of a national release which will be announced soon. The reel in the possession of the commission is available for use at community gatherings and elsewhere where an admission is not charged. Arrangements for its use may be made by communicating with the California Highway Commission.

Production and shipments of Portland cement during the month of August were the highest for any month in the industry, according to statistics compiled by the Bureau of Mines, Department of Commerce. Production shows an increase of more than 8 per cent and shipments of 9 per cent over August, 1924. Portland cement stocks continue the seasonal decline, but are nearly 12 per cent greater than in August, 1924.

Will H. Marsh, chief of the state division of motor vehicles, has obtained a ruling from Attorney General U. S. Webb that concrete mixers pulled behind automobiles are trailers under the state motor vehicle law and must be licensed. Marsh has been requiring owners of these mixers to secure a trailer license, but recently objections were raised, so the motor vehicle chief presented the question to Webb for solution.

The San Francisco Bridge Company, which recently purchased an acreage on the Richmond inner harbor, has filed articles of incorporation at Martinez. The company is capitalized at \$100,000 and has the following directors: John McMullen, M. J. Mortens, John Ballard, Thomas Carler and R. Harvey Wright.

Announcement was recently made from the United States Attorney-General's office at Washington, D. C., that trade association executives and members will hereafter be welcomed to submit existing or contemplated activities or plans of organization to the Department of Justice for study as to their legality. While the announcement made clear that no attempt will be made to give any association a clean bill of health, nor assure it against prosecution in the event the law is violated, trade association executives may submit their activities or plans to the department with the understanding that the obviously illegal will be pointed out.

State Attorney General U. S. Webb has advised R. W. Kearney, executive office of the State Commission of Immigration and Housing, that housing conditions in Santa Barbara, recently destroyed by earthquake, are under his jurisdiction. Webb rules that the state law and not Santa Barbara ordinances shall prevail. A conflict of authority arose following the earthquake and is expected to be settled by the opinion.

With yards nearly full, the mill of the Sprague River Lumber Co. at Braynill, Ore., has closed down. It is believed that operations will resume as soon as the new box factory and remanufacturing plant is completed, providing an outlet for the lumber in the yards. Part of the mill crew is now engaged in making alterations and repairs.

H. L. Gilbert, consulting engineer of Portland, Ore., has filed applications with the Washington State Engineer at Olympia, seeking to appropriate waters for eight hydro-electric plants developing 90,350 horsepower. The cost of construction is estimated at \$11,955,000. The projects will be located on the upper part of the Lewis river and its tributaries in Skamania county.

George A. Kneese, county surveyor of San Mateo County, has been elected president of the Peninsula Acceptance Corporation. Kneese succeeds Hardin Hatch, who was president since the firm's organization two years ago. Offices are located in the National Bank Bldg., San Mateo.

Stockton city building department during September issued 123 permits for improvements aggregating an expenditure of \$235,012. These figures show a gain of \$14,652 over the preceding month and a gain of four permits and \$3211 over September, 1924.

Alameda building activities for the month of September totaled \$2,143,509. During the month 28 permits were issued to erect new structures costing \$2,115,230 and 60 permits for alterations, additions and repairs for 728,279.

San Jose has been chosen for the next convention of the Pacific Coast Association of Building Superintendents.

Efforts of the Rotary Club of Santa Barbara to have Wm. Mooser, San Francisco architect, deposed and a Santa Barbara architect selected to prepare plans and specifications for the proposed \$800,000 county courthouse at Santa Barbara failed when the Board of Supervisors finally adopted the preliminary designs submitted by Mr. Mooser. The Rotary Club, according to Fred H. Jackson, president of the club, was in favor "of trading at home as much as possible." Bonds to finance the structure are to be voted at an election to be held November 17.

L. A. Somers of Phillips & Somers, consulting engineers, has been retained by the L. C. Fraser Company, 1428 Harrison street, Oakland, in the capacity of consulting industrial engineer and development engineer, specializing in the up-building of the industries in the East Bay section. Somers will have associated with him on engineering matters Chas. T. Phillips, consulting engineer.

The Taxpayers' Economy League has investigations under way to ascertain the possibility and feasibility of adopting a "manager" form of government for Monterey county, planned along the line of municipalities that have city managers. While nothing definite has been done, it is said that results will be announced in several months recommending the plan to the board of supervisors.

Charles C. Carleton, attorney, has opened law offices in the Pershing Square Bldg., Los Angeles. He was, for more than twelve years attorney for the State Highway Commission, where he met and became acquainted with many of the general contractors of California. He represented the interests of the construction industry of California at the 1925 legislature.

The U. S. Civil Service Commission announces applications will be considered up to Nov. 14 for an examination to fill the position of Junior Engineer, a position paying an entrance salary of \$1860 a year with possible advancement to \$2400. Examination will be given in the optional subjects of naval architecture and marine engineering and structural engineering (architectural).

L. B. Watson, highway engineer of Brisbane, Queensland, Australia, has been spending a month in California, inspecting state and county highways, particularly state highways in the San Francisco division, where he was the guest of Division Engineer J. H. Skeggs. Several days were spent at the Sacramento headquarters.

W. W. Harmon, city engineer of Oakland, has left for Los Angeles for the purpose of studying street paving and sub-division planning in the southern section.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

BUILDING TRADES LEAD IN AVERAGE HOURLY WAGE

A report which contains the union scale and hours of labor of 894,343 organized wage earners as of May 15, 1924, has just been published by the Bureau of Labor Statistics of the United States Department of Labor. The report covers 66 important industrial cities of the country.

In all trades, taken collectively, the hourly union wage rate on May 15, 1924, in the United States was higher than in preceding year, being 8.3 per cent higher than on May 15, 1923; 99.8 per cent higher than on May 14, 1917; 1281.1 per cent higher than in 1913; 141.5 per cent higher than in 1910; and 154.2 per cent higher than in 1907.

The average hourly rate in the building trades including both skilled and common labor was \$1.154 on May 15, 1924, as against \$1.068 on May 15, 1923. Newspaper printers are next highest with an average of \$1.111 on May 15, 1924, and \$1.047 on May 15, 1923.

WIN WAGE DISPUTE

Demands for a general wage increase of 12½ cents an hour for all classes of common labor have been refused by the Gróup Council of the Associated Building Interests of St. Louis. The demands which had the approval of the Building Trades Council were submitted over two months ago and were flatly rejected by the employers. The unions then came back with a demand for a general increase of 5 cents an hour; this was also turned down.

The employers did, however, grant an increase to caisson workers which will bring the rate up to \$1 per hour instead of 87½ cents. Powdermen and rockdrillers when employed in caisson sinking will receive a rate of \$1 per hour as against the regular rate of 92½ cents. Both of these increases are retroactive to July 1.

SACRAMENTO BUILDERS HEAR OF BIG LEAGUE GAME

Members of the Sacramento Builders' Institute and their friends, through the courtesy of J. C. Hobrecht & Company of Sacramento, heard the "inside" of the world's championship baseball series between Washington and Pittsburgh via the radio. The Hobrecht Company had installed in the institute quarters an Atwater Kent radio with a Western Electric power amplifier thereby affording the organization's membership first hand information of America's Greatest Sport.

CERTIFICATES GRANTED

The following applicants were granted architect's certificates by the California State Board of Architecture, Southern Division, at its meeting Sept. 29: Ellis Wing Taylor, 810 W. 6th St., Los Angeles; Atlee D. Ayers, 626 Bedell Bldg., San Antonio, Tex.; Edwin Cullity, University Club, Santa Barbara; Theodore R. Jenkins, 331 Markwell Bldg., Long Beach, and Edwin C. Merrill, address unknown.

ARCHITECTURAL CLUB EXHIBITS SKETCHES AND PHOTOS

An interesting collection of water color sketches and photographs of Southern European terra cotta and tile work is now on exhibition in the rooms of the San Francisco Architectural Club. The sketches were made by Mr. J.-F. Stanton, a man well known in western art circles for his delightful water colors. They are his notes of a recent European trip made expressly for the study of masterpieces of terra cotta and tile, and the exclusive charm and feeling of the old world are admirably portrayed by the author.

The exhibition is open to the public every evening from 8 to 10 P. M., from October 7th to 15th. The club rooms are located on the third floor at 77 O'Farrell Street.

An interesting illustrated talk on "The Redwood—in Sentiment, in Industry, and in Re-Forestation" will also be given at the Club rooms on Wednesday evening, October 7th, by Mr. Winfield Scott. The talk is presented through the courtesy of the California Redwood Association, is free of charge and the public is invited to attend.

THE OPEN SHOP

"An indispensable need for industrial peace with justice is the Open Shop. It is the American Shop. It means what its name implies. Neither Jew nor Gentile, Republican nor Democrat, Christian or Heathen, Union man or non-union man is barred from its portals. * * * The open shop is the chief, if not the only medium through whose agency the individual workman may maintain his independence and win his livelihood. Indeed, it may be asserted with confidence that the successful maintenance of the Open Shop may prove the solution of the larger part of our industrial problems." —Senator Charles S. Thomas.

BUILDING SUPERINTENDENTS ELECT

Robert L. Proctor of Seattle was elected president of the Pacific Coast Association of Building Superintendents which recently closed its annual convention in Seattle. Other officers elected are: C. E. Jenkins, vice-president, Alhambra, Calif.; A. C. Horner, secretary-treasurer, Stockton; M. C. Woodruff, San Jose; H. E. Plummer, Portland; J. J. Backus, Los Angeles; S. F. Koch, Berkeley; O. G. Knecht, San Diego, and E. E. Weather, Longview, Wash., were named members of the executive committee.

APPOINTED MANAGER

Melville Dozier, Jr., has been appointed manager of the Southern California Chapter, Associated General Contractors of America, succeeding E. Earl Glass, resigned. Dozier is well known throughout the state having been a resident of California for many years and conspicuous in public life around the state capitol for the past decade.

PLUMBING TRADE TO BE TAUGHT IN OREGON SCHOOLS

Preparations are being completed in Oregon to add plumbing instruction in the schools at North Bend, Marshfield, Salem, Albany, Eugene, Roseburg and Medford, according to A. R. Nichols, co-ordinator of the apprenticeship commission of the Oregon Association of Building and Construction.

T. M. Barr of Salem, president of the Oregon State Master Plumbers' Association and Bert D. Coffey, executive secretary of the state association are assisting in completing arrangements for the courses.

The bulk of the cost of the training will be met through the federal and state vocational training funds and, it is said, the master plumbers will bear a portion of the cost.

The idea is to equip better workmen. There is a shortage of skilled plumbers and according to reports, the average age today of the working plumber is about 40, where a few years ago it was only 28, indicating that fewer young men are taking up the plumbing business. By providing the special instruction, the master plumbers expect to overcome this handicap.

BRICK MANUFACTURERS' CREDIT ASS'N. TO CHECK WORK

Announcement is made by the Brick Manufacturers' Credit Association of Southern California, that it is, in the interests of better bricklaying, placing inspectors in the local field to report every instance of masonry construction where Section 121, Los Angeles Building Ordinance, is not being strictly observed. Especially that portion reading as follows:

"All brickwork shall be laid in a good lime mortar or lime and cement mortar of a mixture of clean sand, good lime putty or Portland Cement, of such a mixture and quality as to produce a strong and adhesive mortar, when dry, capable of firmly bonding the bricks together.

"All bricks shall be thoroughly water-soaked before laying, and where necessary, on account of heat and dry weather, brickwork shall be kept wet until the mortar has had time to properly set."

According to the Association, there has been some defection with regard to a strict observance of the two clauses quoted.

ANWAYS, BOTH ARE EXPENSIVE

A class of girls was going over the story of Solomon, and the teacher asked: "Who was the great queen who traveled so many miles to see the king?"

There was no response; so the teacher went on: "You surely must know; the name begins with 'S.'"

At this hint a small hand was raised. "I know," said its owner. "The Queen of Spades."

QUITE SO!

"So you married my daughter, thinking I'd pave the way for you in business. Is that it?"

"Well—er—not exactly. I'll do the paving, but I thought you might furnish the rocks."

STATEMENT OF THE OWNERSHIP, MANAGEMENT, CIRCULATION, ETC., REQUIRED BY THE ACT OF CONGRESS OF AUGUST 24, 1912, OF BUILDING AND ENGINEERING NEWS, published weekly at San Francisco, Cal., for October 1, 1925.

State of California, City and County of San Francisco, ss.

Before me, a Notary Public in and for the State and county aforesaid, personally appeared E. J. Cardinal and J. I. Stark, who, having been duly sworn according to law, depose and says that they are the Publishers and Owners of the Building and Engineering News, and that the following is to the best of their knowledge and belief, a true statement of the ownership, management, etc., of the aforesaid publication for the date shown in the above caption, captioned by the Act of August 24, 1912, embodied in section 411, Postal Laws and Regulations, printed on the reverse of this form, to wit:

1. That the name and addresses of the publisher, editor, managing editor, and business managers are:

Publisher, E. J. Cardinal, 665 19th Ave., San Francisco, and J. I. Stark, 1250 Francisco St., San Francisco.
Editor, E. J. Cardinal, 665 19th Ave., San Francisco.

Managing Editor, J. P. Farrell, 350 Brannan St., San Francisco.
Business Managers, E. J. Cardinal and J. I. Stark.

2. That the owners are:

E. J. Cardinal, 665 19th Ave., San Francisco.
J. I. Stark, 1250 Francisco St., San Francisco.

(As Mercury Press) a copartnership, 818 Mission St., San Francisco.

3. That the known bondholders, mortgagees, and other security holders owning or holding 1 per cent or more of total amount of bonds, mortgages, or other securities are: None.

E. J. CARDINAL AND J. I. STARK, Publishers.
Sworn to and subscribed before me this 30th day of September, 1925.
(SEAL) CHALMER MUNDAY.

RESEARCH ENGINEERS TO INSPECT 5000 CULVERTS

The Research Department of the State Highway Commission has undertaken a comprehensive study of culverts in service throughout the California state highway system, the results of which will be available to the Highway Research Board and to county and city authorities in California.

The objects of the study are: To correlate the various tests and experiments on pipe loads and stresses; to set up a standard of comparison of the life of different kinds and classes of culvert pipe; and to determine the most probable conditions of service for which standards should be designed.

Before the survey has been completed detailed inspection will have been made of at least 5000 culverts of all types. Samples from both the top and bottom of metal pipes will be taken for analysis. Samples of the water passing through culverts also will be secured, when necessary.

The inspection will be extended to all divisions to insure that the culvert service data secured will represent all possible conditions of climate, soil, and water in this state. A preliminary study of several hundred culverts has indicated that much valuable information will be secured, concerning not only the normal life of culverts of various types but the effect upon their life of location, drainage, soil conditions, and maintenance. In other words, when the investigation is completed the department will know definitely what service culverts are giving on the state highway system.

The investigation will be conducted under the supervision of C. L. McKesson, Research and Testing Engineer. The field work will be done by W. J. Stonebraker, assistant testing engineer, in co-operation with representatives of the division offices.

N. W. Timber Deals Are Reported

Authentic reports in timber circles at Portland, Ore., and at Klamath Falls are to the effect that the Fremont Land Company, a corporation subsidiary to the Shevlin-Hixon Company, operating at Bend, has purchased from R. E. Gilchrist of Alpena, Mich., approximately 65,000 acres of pine timber land in scattered sections of northern Klamath County. The timber on the land is to be paid for as cut under the sales contract, and the total consideration is said to be much more than \$4,500,000.

According to Portland timber operators who are familiar with the transaction this cruise of the timber area sold by R. E. Gilchrist to the Shevlin-Hixon interests exceeds 1,300,000,000 feet of high quality pine and the consideration paid is approximately \$5,000,000.

The timber just sold is inter-locked with the Weyerhaeuser holdings, for which a mill at Klamath Falls is to be erected according to official announcement made recently, on completion of the Southern Pacific's Eugene-Klamath Falls cutoff. The surveyed line of the Oregon Trunk Railroad (Great Northern-Northern Pacific) is through a large portion of the R. E. Gilchrist tract.

The timber sale announced is distinct from the reported sale last

February of 45,000 acres of timber in Klamath and Deschutes counties from W. A. Gilchrist and associates of Alpena, Mich., to Shevlin-Hixon interests. In that transaction 900,000,000 feet of pine was said to have been taken over.

Sale of the timber holdings and railway owned by A. S. Kerry of Seattle in the region south of the Columbia river, northwesterly from Portland, to the Peninsula Lumber Company of Portland has been closed, according to authoritative announcement. The deal involves about \$3,000,000.

The timber transferred is said to amount to approximately 1,000,000,000 feet of high quality fir and other species, situated in Columbia, Clatsop, Washington and Tillamook counties, close to the extensive holding of the Oregon-American Lumber Company.

The railway, known as the Columbia & Nehalem River line, extends southerly from the Columbia river at Kerry station, 70 miles from Portland, 33 miles southerly into the heavily timbered area. The railway's equipment includes nine locomotives, 94 freight and logging cars and six passenger cars.

The transaction was concluded between F. C. Knapp, president of the Peninsula Lumber Company, and A. S. Kerry, owner of the properties under sale.

Philippine Timber For U. S. Needs

A fact repeatedly and urgently stressed by forestry experts, but which the public is apparently slow to realize, is the imminent timber famine now facing the United States.

At the National conference on Utilization of Forest Products, recently held at Washington, D. C., Major Geo. P. Ahern, for 15 years Director of Forestry in the Philippines, and now in charge of the Forestry Division of the Tropical Plant Research Foundation stated:

"As the forests of the United States rapidly disappear, as inadequate efforts are made to close the gap between consumption and adequate annual growth, a long period of scarcity in our local wood supply becomes inevitable and not far distant. * * * The years of growing scarcity will accent the forcing of prices upward and thus make marketable more and more of the tropical woods."

At the same Conference Governor Gifford Pinchot, formerly United States Forester, said:

"Forest depletion has gone forward so far that 50 of the important nations of the world must now be classed as wood importing countries. The wood situation of the world demands prompt and serious attention. It can no longer be said that the forest problem is a local State or a national problem, for it is actually a world problem. * * * The people of the United States are just awakening to the fact that the virgin forests, once supposed to be inexhaustible, are now nearly all cut over. Most of our original forests are gone."

In a statement issued by the Tropical Plant Research Foundation in January 1925, it is said:

"The hardwood lumber supplies

of the United States will be practically exhausted by the year 1945 (20 years) according to the estimates of foresters; and if the wood-using industries of the country are to continue to grow with the population, or even to maintain approximately their present status, they must begin at once to lay plans for securing essential raw materials."

The Philippine Bureau of Forestry estimates there are over 60,000 square miles of public forests in the islands, comprising both hard and soft woods, with almost unlimited quantities of minor forest products, such as rattan, dye-woods, tan-barks, paper-pulps, gums, resins, fiber-plants, etc. The stand of timber is conservatively fixed at two hundred thousand million board feet, and is estimated to be worth in Government revenue some \$400,000,000—this exclusive of the market value of the timber. These forests, if properly utilized, furnish a tremendous reservoir from which to replenish our fast diminishing home supply.

These forests are "public domain" of the American people, constituting a portion of the Crown Lands ceded the United States by Spain. These holdings—agricultural, forest and mineral—now comprise 80 per cent of the land area of the archipelago. Spain possessed and administered these areas for over three centuries, and they were never at any time owned, claimed or occupied by any Filipino tribe or body politic. The title of the United States thereto is clearer than is that of most modern countries to their national territories, not excepting the mainland territory of the United States—Philippine Progress.

CERTIFICATES GRANTED

The following have been granted certificates to practice architecture in the state of California: Edward A. Nickel,

1935 Berryman St., Berkeley, Cal.; William Grant Foster, 1099 Paralta Ave., Berkeley, Cal.; Edwin H. Clark, 8 East Huron St., Chicago, Ill.

**COTTRELL REJOINS AUTO ASS'N.
AS HIGHWAY EXPERT**

C. C. Cottrell, former manager of the good roads bureau of the California State Automobile Association and widely known authority on good roads, has been appointed consulting highway engineer of the automobile association. The announcement is made by H. J. Brunner, chairman of the association's good roads committee.

During the two and one-half years that Cottrell was manager of the automobile association's good roads bureau he was active in promoting good roads development not only in California but throughout the entire West. Previous to that time he was superintendent of highway construction and maintenance in California and highway engineer in Nevada. He left the automobile association in December, 1923, to resume active practice of his profession. He is a member of the American Society of Civil Engineers.

Cottrell will supplement in a consulting capacity the present personnel of the good roads bureau, which is now managed by William M. Tudor, who has been with the association in an executive capacity for the past eight years.

Cottrell led the fight to obtain passage of federal aid legislation to assist the western states in the improvement of their highways, and as California's sole representative at hearings before the United States Department of Agriculture was responsible for concluding the controversy that made possible the construction of the Wendover cutoff.

TRADE NOTES

J. R. Hughes has been appointed plant manager for the Bakersfield Rock & Gravel Company of Bakersfield. Previous to accepting the position with the Bakersfield concern, Hughes was associated with Stone & Webster, Dwight P. Robinson Company, Blue Trap Rock Company and Union Rock Company. The Bakersfield plant is located one and one-half miles northeast of Bakersfield on the Southern Pacific Railroad. The company was organized and financed by C. F. Smith, its secretary. Offices are maintained at 1406 Nineteenth St., Bakersfield.

The plant of the Atlas Rock Company at Oakdale will close down for two weeks during which time equipment will be overhauled, preparatory to starting the operations for the Melones dam contract which will require 200,000 tons of rock, gravel and sand. The company recently completed a contract with J. F. Knapp for 40,000 tons of rock on a state highway contract near Ripon.

The South City Lumber & Supply Company will expend \$12,000 in enlarging the present plant at the foot of Spruce street and Railroad Ave., South San Francisco. The improvement will comprise a spur track, gravel and rock bunkers and cement storage quarters. The bunkers will have a capacity of 25 tons of rock.

A special meeting of the Stockholders of the Pacific Electric Clock Company will be held at 1109-1111 American Bank Building, Oakland, to consider increasing the capital stock of the company from \$100,000 to \$250,000. The announcement is made by Aaron Turner, secretary of the company.

California Steel Products Company of San Francisco has filed articles of incorporation in Oakland. The company is capitalized at \$100,000 and has the following directors: W. E. Kettering, E. P. McCann, Louis D. Gordon, Thos. K. Code and Robt. J. McGahie.

The Roberson Construction Corporation, capitalized at \$100,000, has been incorporated in Oakland. Directors are: Clarence DeLancey of Piedmont; John L. Clyde, E. Ritchie, Jesse Robinson and Geo. H. Hungerford, all of Oakland.

Bay City Lumber Company, capitalized at \$50,000, has been incorporated in Oakland with the following directors: M. L. Hirschfeld, Louis E. Goodman and H. C. Berry, all of San Francisco.

Harry W. Axford will operate in the Santa Clara county section under the trade name of H. W. Axford Art Bronze Manufacturing Company and will maintain business quarters at University Ave. and College Park, San Jose.

David Paganini, general contractor, has moved his offices from 301 Hirsch-Higgins Building, Vallejo, to 303 Italian American Bank Bldg., 460 Montgomery Street, San Francisco.

F. E. McGraw, 8123 East Fourteenth street, Oakland, will operate in the East Bay district under the firm name of F. E. Graw Lumber Company.

**HALF OF STATE ROADS OF COUNTRY
NOW SURFACED**

Twenty-three thousand miles of highway were built to grade or surfaced on the state systems in 1924, according to information collected by the bureau of public roads of the United States Department of Agriculture from the various state highway departments. More than 17,000 miles were surfaced. The surfaced mileage constructed by types was as follows: Sand-clay, 1385; gravel, 7660; waterbound macadam, 467 surface-treated macadam, 1000; bituminous macadam, 997; sheet asphalt, 120; bituminous concrete, 564; cement concrete, 4850; brick and other block pavements, 164.

The bureau estimates that at the end of 1923 there were surfaced roads in the state systems totaling 111,400 miles. Adding the mileage surfaced in 1924, after making allowance for the fact that a portion of the new work consisted of the resurfacing of old roads, it is indicated that approximately half of the 251,610 miles embraced in the state systems were surfaced at the beginning of the present year. These figures represent work done under state supervision, including Federal-aid work, but do not include county or local work off the main state systems. Progress in 1925 should be at least as great as in 1924, according to the best information available.

California has 2324 miles of state highway surfaced out of a total of 6400 miles of road at the close of 1923, and added 509.9 miles to its surfaced mileage during 1924. Arizona had 1252.2 miles surfaced out of a total of 1891.6 miles at the close of 1923 and added 359.5 miles to its surfaced mileage in 1924. Washington had 2173.2 miles surfaced out of a total of 3075.6 at the close of 1923 and added 396.8 miles of surfacing during 1924. Oregon had 2625 miles surfaced out of a total of 4399.7 miles at the close of 1923 and added 389 miles of surfaced road in 1924. Nevada had only 281.8 miles out of a total of 2704.3 miles surfaced at the close of 1923 and surfaced 32.7 additional miles in 1924. Idaho had 1292.8 miles surfaced out of 4071.3 at the close of 1923 and added 235.9 miles of surface during 1924.

**EAST BAY UTILITY DISTRICT
AWARDS CONTRACTS**

The East Bay Municipal Utility District, on recommendation of Arthur P. Davis, chief engineer, has awarded the following contracts in connection with the Mokelumne river project:

Lafayette Tunnel, to Smith Bros., Inc., 412 Second St., Marysville, at \$1-101,822.

Walnut Creek Tunnel and approaches to T. E. Connolly, Sheldon Bldg., San Francisco, at \$152,906.

Walnut Creek Pumping Plant Machinery to Pelton Co., San Francisco, at \$28,245.

Walnut Creek Pumping Plant to T. E. Connolly, Sheldon Bldg., San Francisco, at \$23,486.

Pipe aqueduct from Lafayette tunnel to western border of Peat Lands to T. E. Connolly, at \$3,653,107.

Pipe aqueduct from western to eastern edge of Peat Lands to T. E. Connolly, at \$3,112,820.

Aqueduct from eastern edge of Peat Lands to Station 1480 to T. E. Connolly, at \$2,007,361.

Aqueduct from Lancha Plana tunnel to Station 950 to T. E. Connolly, at \$1-671,697.

SEPTEMBER BUILDING SUMMARY

Building operations in San Francisco for the month of September totaled \$3,158,982 according to figures compiled by John P. Horgan, chief inspector of buildings of the Department of Public Works. During the month 902 permits were issued of these 455 being for alterations, additions and repairs to standing structures, costing \$13,740, the balance being for new construction.

Following is a segregated report of the month's activities, as compiled by Chief Inspector Horgan:

Class	No. of Permits	Est. Cost
C	12	\$ 304,850
F	433	2,167,610
Alterations	455	312,740
Public Bldgs.	2	371,980
Total	902	\$3,158,982

**LUMBER COMPANY IS AWARDED
DECISION IN SUIT**

Judgment of \$64,164.05 on the foreclosure of a mortgage on valuable timberland in Western Sonoma county was granted to the Marin Lumber & Supply Company of San Rafael against W. D. Mitchell by Superior Judge Ross Campbell at Santa Rosa. The action went by default, the defendant failing to appear at the calling of the case.

The suit grew out of a \$71,000 promissory note given by Mitchell to the lumber firm, in which he mortgaged his valuable Duncan Mills timberland as security on the note. Part of the note had been paid. The judgment granted was \$63,354.05 on the note, \$1800 attorney's fees, and \$10 court costs.

A. M. Johnson of Santa Rosa was appointed commission to sell the property to satisfy the judgment and to foreclose the mortgage. E. W. Davis of San Francisco, appeared for the Marin Lumber firm.

Building News Section

APARTMENTS

MARTINEZ, Contra Costa Co., Cal.—See "Banks, Stores and Offices," this issue. Autosales rooms and apartments planned.

Bids Wanted for Mill Work and Plumbing.

APARTMENTS Cost, \$125,000
SAN FRANCISCO, W Van Ness Ave. 53 N Green Street.

Six-story and basement reinforced concrete Class C apartment house (41 2-room apartments).

Owner—California Bldg. & Finance Co., 319 De Young Bldg., San Francisco (phone 5446).

Architect—J. C. Hladik, Monadnock Bldg., San Francisco.

Supt. of Construction—C. F. Parker 251 Kearny Street.

Plastering—Awarded to J. Martinelli, 180 Jessie St.

As previously reported:
Concrete and Rough Carpenter Work—

Mission Concrete Co., 125 Kissling St., S. F.

Taking Painting Bids; Plastering Contract Awarded.

APARTMENTS Cost, \$150,000
SAN FRANCISCO, NW Twentieth and Valencia Streets.

Five-story and basement reinforced concrete apartment & store building containing 48 2-room and 3-rm. apts. and 4 stores.

Owner—H. E. and E. H. Norman, care architect.

Architect—Wm. F. Gunnison, 57 Post St., San Francisco.

Plastering—Awarded to Mr. Boni at \$18,365.

Completing Plans.
FACTORY Cost, \$125,000

SAN FRANCISCO, W Third St. 200 N Paul St.

One and two-story reinforced concrete factory building.

Owner—Electric Storage Battery Co., 1636 Bush St., San Francisco.

Architect—Henry H. Meyers, Kohl Bldg., San Francisco.

Plans will be completed in about a month.

To Be Done By Day's Work.
APARTMENTS Cost, \$30,000

OAKLAND, 3800 Walnut Avenue.

Three-story 36-room frame apartments

Owner—C. A. Kingsley, Kingsley Circle, Oakland.

Architect—None.

To Be Done By Day's Work.
APARTMENTS Cost, \$30,000

SAN FRANCISCO, SE Clinton Park and Dolores St.

Three-story and basement frame (15) apartments.

Owner—J. S. Cuneo and F. DeMartini, 481 Church St., San Francisco.

Architect—L. Traverso, 854 Union St., San Francisco.

To Be Done By Day's Work.

APARTMENTS Cost, \$25,000

IT WAS at dinner.
NOT LONG ago.
IN THE home.
OF A prominent official.
OF THE Southern Pacific Company.
WHEN THE young son.
IN THE presence.
OF HIS parents.
AND HIS grand parents.
AND HIS two sisters.
MADE THE important statement.
THAT HIS sister.
AND HIMSELF.
WERE THE smartest children.
IN THEIR room.
IN ONE of Sacramento's schools.
BUT HIS dad, well trained.
WITH SOUTHERN Pacific experience.
AND RAILROAD reports.
IMMEDIATELY REPLIED.
THAT THE boy's report said.
DID NOT indicate.
ANY SUCH brilliance.
BUT THE youngest.
OF THE three generations.
QUICKLY REPLIED.

THAT HE didn't tell.
IN THE school room.
ALL THAT he knew.
SO SANDY Pratt, president.
OF THE Pratt Building Material Co.
PRODUCER OF clean sand.
AT SACRAMENTO, Marysville.
AND PRATT CO (Monterey County).
ALSO HARD, crushed rock.
AT PRATTROCK (near Folsom).
CAN SEE.
IN THIS Sacramento family.
THE RISING generation is not.
GOING BACKWARDS, intellectually.
"I THANK you."

This photo shows "brother" who doesn't "tell all he knows" at school taking his youngest sister for a ride. Sandy Pratt, president of the Pratt Building Material Company, produces clean, sharp sand and clean, crushed rock and gravel near "brother's" Sacramento home.

BERKELEY, Alameda Co., Cal.—Following bids received Oct. 6th by Geo. S. Moser, secy. Board of Education, 2133 Aliston Way, to erect 1-classroom temporary frame bungalow school at Franklin school grounds, San Pablo Ave. and Virginia St. Bids taken under advisement:

Four one-story frame and corrugated iron bldgs. 120x260; 50x180; 50x260 and 120x120 ft.

Owner—Steel Pipe & Tank Co., 1100 4th St., Berkeley; C. A. F. Duffie, general manager.

Architect—Eng. Dept. of owner.
Bids will be taken for a general contract for each building separately and for the group of four.

Plans may be obtained from Mr. Wetland, % owner.

BUSINESS OPPORTUNITIES

8577 — United Kingdom. A firm of British manufacturers of hearth furnishings and hand-made metal work for domestic decoration is desirous of appointing an agent in San Francisco for the sale of its reproductions of antiques, such as, fenders, coal scuttles, grates, fire implements, lanterns, sun dials, candlesticks, door knockers, etc.

Berkeley reports the issuance of 431 building permits during the month of September, 324 being for new construction valued at \$800,591 and 107 for alterations, additions and repairs costing \$38,721.

STOCKTON BUILDING ACTIVE

Permits for 963 homes, non-residential buildings, remodeling jobs and sign boards and electric signs issued in Stockton during the past nine months of this year, reach an estimated total construction expenditure of \$3,116,551. During the same period of 1924, there were permits issued by City Building Inspector A. C. Horner for 913 different construction jobs aggregating an expenditure of \$3,240,998.

Since the first of the year, permits have been issued for 313 homes costing \$1,677,540. A total of 544 permits have been for non-residential construction, this estimated at \$1,123,794. Additions, alterations and repairs are estimated at \$269,860, and installation permits at \$15,340.

Building permits for the month of September, reached a total estimated valuation of \$235,021, or a gain of approximately \$15,000 over the corresponding month of 1924. There were 123 permits last month and ninety-four in September, 1924. The month's total is also a gain over the preceding month, August, when a total of \$220,360 was reached.

Twenty-two of the permits were for one-family dwellings to cost \$98,100. One was for a duplex costing \$6300, and another for a one-family dwelling with a store attached, to cost \$8000. Total residential construction is estimated at \$112,400.

MODERN WOODWORKING COMPANY TO OPEN NEW PLANT

The Modern Woodworking Company is completing the installation of equipment at 227-231 Bay street, San Francisco, and will specialize in mill case work. In addition to carrying a full line of buffet stock the company will have every facility to handle machine sanding, band sawing, turning, scroll sawing and shaper work, according to Mr. Nagel, general manager of the company, who has been in the mill work business in San Francisco for the past twenty years. The plant will cover a ground area of 60 by 150 feet which will permit the company to handle any size contract in addition to carrying large stocks to meet orders where immediate delivery is required.

RENO BUILDING BREAKS RECORD

In the first nine months of 1925, Reno has passed the million mark in building construction, and topped by \$313,000 the highest mark ever reached in any previous year's building construction in the city's history.

The total for the three-quarters of 1925 stands at \$1,042,008, according to the city engineer's record of building permits issued.

The highest figure previously reached was in 1922 when with unprecedented construction in the city, the figure soared to \$728,960, eclipsing the amount during the building era of 1907 when Reno, riding on the profits of the Gold-field boom, expended \$606,608 in building construction. The 1924 figure was \$362,030 and in 1923, \$583,326.

The million dollar record was established in spite of the low amount of building construction during the past 30 days, \$54,650 in all, the lowest month of the year with the exception of February which totaled \$50,325. As an example of the substantial class of buildings constructed, of the 29 permits issued during September, 18 were for new homes.

OAKLAND BUILDING ACTIVE

Oakland building operations for the month of September totaled \$3,000,070, according to the report of City Building Inspector A. S. Holmes. During the month 1267 permits were issued of these 1035 covered new construction valued at \$2,914,056 and 232 permits for alterations, additions and repairs to standing structures aggregating an expenditure of \$86,014. The largest single project included in the new construction total covered the erection of a fourteen-story brick and concrete office building costing \$850,000.

Home building construction in Oakland continues to swell the building expenditure totals. During the past month 354 permits were granted for one-story dwellings, these structures costing \$1,018,540; seven permits were issued for one-story two-family dwellings for \$37,300; one permit for a one-story eight-family dwelling costing \$12,000 and twenty-five permits for two-story dwellings valued at \$190,080.

NOTICE TO CONTRACTORS

(Fencing—Mare Island)

The Bureau of Yards and Docks invites attention to the fact that it will open bids, in the near future, on Specification No. 5114, Fence, Marine Corps Depot for Supplies, San Francisco, Calif. The work consists of a fence approximately 395 feet long of steel posts, chain link, diamond mesh, intermediate, non-climbable fence and a single type post top carrying three barbed wires. One double gate and one single gate of standard construction, filled with fabric matching the fence.

In the event that this work is of interest to your firm, you should forward to the Bureau of Yards and Docks, Washington, D. C., to the Commandant, Twelfth Naval District, San Francisco, Calif., or to the Commandant, Navy Yard, Mare Island, Calif., a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks as security for the safe return of the drawing and specifications.

Inasmuch as the specifications and accompanying drawings are nearing completion, it is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded when the specifications are received from the printer. Prospective bidders on the West Coast should make application at San Francisco, Calif., or Mare Island, Calif., for the bidding data.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, until 2 o'clock P. M. on November 2, 1925, at which time they will be publicly opened and read, for construction in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Fresno County, a Division Office building in the City of Fresno, to have brick walls, finished with stucco, concrete foundation and basement, wood frame floor and roof, the roofing, and will be completely finished inside with plaster and wood trim. Plumbing, Heating, and Electric Work will be included in General Contract.

Ventura County, between Camarillo and Ventura (VII-Ven-2-B & C), about thirteen and two-tenths (13.2) miles in length; nine and eight-tenths (9.8) miles to be paved with Portland cement concrete and three and four-tenths (3.4) miles to be widened with Portland cement concrete.

Riverside County, between Beaumont and Banning (VII-Riv-26-B), about three (3.0) miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be secured at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is located. The Division Engineers' offices are located at: Di-Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.

Dated: October 5, 1925.

NOTICE TO CONTRACTORS

(Daniel Webster School—Oakland)

Notice is hereby given that the Board of Education of the City of Oakland and of the Oakland School District of Alameda County hereby calls for sealed proposals to be delivered to the Secretary of said Board, Room 211, City Hall, Oakland, California, until Tuesday, the 20th day of October, 1925, at 9:45 A. M., at which time said bids will be opened for the erection and completion of the Daniel Webster School Building Additions, of the Oakland School District, located on the West side of 81st Avenue, between Plymouth and Olive Streets, in the City of Oakland, County of Alameda, State of California. These bids shall be presented in accordance with plans and specifications for said building on file in the office of the Secretary of the Board of Education, City Hall, and in the office of the Superintendent of Buildings, Room 415, 532 16th Street, Oakland, California.

On a deposit of Twenty-five (\$25.00) Dollars, complete sets of plans and specifications may be had by any bidder on application to the Superintendent.

of Buildings at his office hereinbefore mentioned, and in each case shall be returned within ten (10) days after securing same, to the Superintendent of Buildings. If the plans and specifications are not returned within said time, or if mutilated, the said deposit shall be retained by the said School District as agreed and liquidated damages for said mutilation or detention.

Bids must be made on proposals obtained at the office of the Superintendent of Buildings, and be signed by the bidder and accompanied by a certified check, certified to by some responsible bank or banker, and made payable to the Board of Education of the City of Oakland and of Oakland School District, to be retained by said School District, as agreed and liquidated damages should the party or parties to whom the contract should be awarded fail to enter into the contract after the award, or to give bonds required for the faithful performance of the contract, or any bond required by law. The amount of said check shall not exceed Five Thousand (\$5000.00) Dollars, but for all bids of less than Fifty Thousand (\$50,000.00) Dollars, said check shall be for at least ten (10%) percent of the amount of the bid. Each bidder shall execute the affidavit accompanying the proposal obtained from the Superintendent of Buildings.

Bids will be opened by the Board of said District on Tuesday, the 20th day of October, 1925, at 9:45 A. M., in the Board Room, 211 second floor, of said City Hall, in said City of Oakland. The Board reserves the right to reject any and all bids or any or all items of such bids.

JOHN W. EDMONDSON,

Secretary of the Board of Education of Oakland, California.

BIDS WANTED FOR HIGHWAY IMPROVEMENT

NOTICE TO CONTRACTORS

Sealed proposals will be received by the undersigned until 2:00 P. M., October 14, 1925, for constructing a portion of the state highway system in Lander County, from Austin Cemetery thru the Town of Austin to the eastern town limits, length 1.50 miles, work consisting of grading, construction of culverts and placing a selected material surface.

Plans may be examined and form of proposal, contract and specifications secured in the office of the undersigned, or may be examined also in the division office at Elko, Reno and Las Vegas and the district office of the Bureau of Public Roads, Bay Building, San Francisco; also in the county clerk's office at Austin. For each copy of plans undersigned requires a deposit of fifteen dollars (\$15.00), which will be refunded upon return of plans in good condition within 30 days after opening of bids. Bids must be on proposal form of Highway Department and must be accompanied by a certified check in the amount of 5 per cent of bid.

Each bidder must accompany his bid with certificate from a surety company, duly authorized to do business in Nevada, stating that said surety company will provide said bidder with a bond in such sum as is required in and in accordance with the provisions of said specifications, conditioned for faithful performance of the contract and specifications.

Right is reserved to reject any or all bids.

GEO. W. BORDEN,
State Highway Engineer,
Carson City, Nevada.

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns
of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

A Variety of Work on the Same Machine

In addition to business correspondence the modern office has a large variety of work for the typewriter.

Tabulating, billing (simple and condensed) sten-
cii cutting, writing on ruled forms and many other
kinds of office work can all be done on the L. C.
Smith & Bros. typewriter.

The decimal tabulator and the variable line
spacer are part of the inbuilt service of every L. C.
Smith & Bros. machine.

A CLYDE fits the job

The various illustrations shown herewith indicate different operations where the Clyde two-drum contractor's gasoline hoist is making good. In building operations, log loading, pile driving and many other occupations, it is more than meeting the expectations of the owners.

Satisfied users in all parts of the country voluntarily endorse the adaptability and the low operating cost of this Clyde unit. It is built of carefully selected materials and carries a rigid guarantee against original defects. The unit is LeROI powered.

Any Clyde hoist, steam, electric or gasoline will more than meet its rated capacity. And it is so constructed that it will live up to and maintain the high standard of perfection the is represented by the Clyde trade mark. A bulletin describing any Clyde unit will be sent upon request or a Clyde salesman will call.

You'll Take Pride in Your Clyde!

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details—but it's *strong, rugged*—it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

RENTALS GOING DOWN

The highest rents within a decade were obtained about a year ago, in July, 1924, when average rental values for the country were 86 per cent higher than in 1914, states Manufacturing News. Thereafter, rents on the average declined slowly but steadily, until last July they had dropped to a point only 79 per cent higher than the pre-war level.

Among the 12 largest cities, Boston alone reported an increase during the past few months, but too slight to affect the general level. The tendency toward lower rents, however, was indicated unmistakably in Buffalo, Chicago, Los Angeles, New York and San Francisco. No change was reported in Baltimore, Cleveland, Detroit, Philadelphia, Pittsburgh and St. Louis since last spring. Rates in Buffalo, Chicago, Detroit, Los Angeles, Philadelphia and Pittsburgh, however, still were higher by 100 per cent or more than they were before the war.

CALIFORNIA'S SPANISH HOMES

"Spanish Homes of California" is the title of a new book just off the press of the Roy Hilton Co., Kress Bldg., Long Beach. It contains 58 photographs and 60 sketches of homes, plans of this popular type of homes, carefully selected to show the range of variety in exterior and interior design.

CALIFORNIA PROVIDES SCHOOLS

Boosting the State's total investment in public school buildings to more than \$300,000,000, California taxpayers have voted approximately \$80,000,000 during the last two years for purchase of sites and construction of new school houses, according to a check completed by A. H. Heron, Assistant State Superintendent of Public Instruction.

The bond issues voted by the people, all of which received more than a two-thirds majority, provided educational facilities for practically every child of school age in the State, Heron said, and made California one of the few States in the Union free from the overcrowded school problem.

During the two years in which the \$80,000,000 school-building program was under way, enrollment in the various educational institutions jumped approximately 165,000, bringing the regular school attendance to more than 1,100,000. In addition to the regularly enrolled pupils, there are approximately 500,000 students taking extension courses in the State, according to Heron's check-up.

The State educator's report revealed total investments in public school buildings in California as follows:

Elementary schools, \$171,000,000; high schools, \$113,000,000; universities, \$22,000,000; teachers' colleges, \$3,500,000; special schools, \$1,825,000, and junior colleges, \$1,000,000.

Los Angeles, Oakland, San Francisco and Sacramento topped the list in school building enterprises during the two-year period, State records indicated.

BRICK COSTS AT LOWEST EBB IN SOUTH

The cost of brick in the Los Angeles territory has reached its lowest point in years. Brick is today selling for less than it has at any time since the war. The price scale today averages nearly 25% lower than it did in September 1924. In spite of the low prices and increased demand there are no signs of a brick shortage in the southern market. All the brick plants in Southern California have adequate reserves to meet all demands and the plants are being operated to full capacity. Several brick manufacturers, notably in the Santa Monica Bay region, have recently made large additions to their plants, giving a practically doubled brick supply in that fast growing section.

AWARDED ROOSEVELT PRIZE

John Russell Pope, New York architect, has been awarded the \$20,000 prize for the best design submitted to the Roosevelt Memorial Association for a national memorial in Washington to Theodore Roosevelt. Announcement of the award, which went to Pope in competition with designs prepared by seven other architects, was made by James R. Garfield, president of the association, after a meeting of its directors.

AUGUST IS RECORD MONTH FOR PLATE GLASS PRODUCTION

For the first time in the history of the plate glass industry in the United States a total of over 10,000,000 square feet of polished plate glass has been made in one month.

This new high record of production was made during the month of August when 10,328,029 square feet of plate glass were produced. Such a record points to the fulfillment of the prophecy of P. A. Hughes, Secretary of the Plate Glass Manufacturers of America, that plate glass manufacturing which broke all records in 1924 would achieve an even higher score in 1925.

In 1924 the production figures for the first half of the year were 47,183,122 square feet. The output for the corresponding period of time in 1925 was 56,561,960 square feet. At the present rate of production there is every indication that the total production for the current year will be between 105,000,000 and 110,000,000 square feet, or between 14,000,000 and 19,000,000 square feet more than was produced last year, and double the amount produced in 1921.

The increased use of plate glass in office buildings, hotels, schools, and other large building operations is one of the principal reasons for the rapid development of the plate glass industry in recent years.

The realization of the average home builder that plate glass is no longer a luxury has likewise played an important part in the rapid growth of yearly production. The use of plate glass in the windows, in the sun parlors, in the sleeping porches of these moderate price homes, as well as a growing recognition of the decorative qualities of plate glass within the home has materially increased the demand in this field.

CEMENT FROM RUSSIA WILL BE DUTY FREE

An announcement has been made by the Treasury Department to the effect that cement from Russia will hereafter be admitted into the United States free of duty under reciprocal provision of the cement paragraph of the present tariff act.

Some time ago the Soviet of People's Commissars issued a decree authorizing the Soviet customs authorities to admit cement free of duty into Russia when from a country which imposes no duty upon Russian product. A similar provision is contained in paragraph 1543 of the tariff act of 1922, and free entry privileges will be accorded to cement both in the United States and in Russia.

GETS PRIZE AWARD

For having the most attractive mercantile booth at the Kern County fair, the first prize was awarded to the Sandstone Brick Company of Bakersfield. The winning booth was located in the "Builder's Tent" and featured a modern home surrounded with a wall of brick with cement finish.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Efforts to drive the "shyster" contractor out of the construction industry and thus reduce building costs were given definite direction by action taken at the concluding session of a 3-day meeting of the executive board of the Associated General Contractors of America. Two distinct methods of routing irresponsible bidders were taken up. They are: (1) Intensive reformation of existing practices of issuing surety bonds covering building operations; (2) application to building operations of experience questionnaires and financial statement concerning contractors, designed to make obvious the necessary knowledge concerning the facilities and abilities of every bidder on construction work, both public and private.

Passage of an ordinance changing the present Oakland city planning commission from a purely civic body to a commission allowing for the employment of outside city planning experts, has been made by the Oakland City Council. This will permit the commission to call in or add to its personnel any outside experts on city planning. The ordinance provides for a commission of five members one of which shall be a commissioner. The mayor will be an ex-officio member with no vote. He will select the members of the commission subject to the sanction of the city council.

C. W. Harris, former shop superintendent for A. Meister Company, announces he will open a shop in Sacramento for the building of a new type of motor bus of the six-wheel tractor type, consisting of a close-coupled truck or tractor as the power unit and a large trailer as the passenger carrying unit. Harris claims this type of bus gives shorter turning radius, more even distribution of load, lower construction and greater safety.

By a vote of 4 to 1 members of the American Association of Engineers decided to separate national and chapter dues and fixed the national dues at \$7.50 a year for members and affiliate members. Formerly the dues were \$15 a year, which amount was split between the national organization and the chapters.

Richmond, Contra Costa County, at a recent election, voted bonds of \$500,000 for a new high school and \$285,000 for additions and alterations to elementary schools.

At the recent convention of the Ohio State Building Trades Council at Steubenville a resolution was adopted favoring the 5-day week for the building trades.

The report of the moulding committee of the West Coast Lumber Association, which was adopted, eliminates 75 patterns and adds 17 new patterns shown in the 1923 year book.

Grade marking of lumber now being carried forward by the Southern Pine Association is advocated as a precaution against substitution of grades.

Probability of California getting an additional \$150,000 for next year's forest fire suppression work is seen in a Washington report from Francis Cuttle, forestry expert sent to the capital by the California Development Association. Cuttle, who was deputized to appeal to Budget Director General Lord for a large appropriation for watershed protection and fire suppression under the terms of the Clark-McNary Act, says he has met with such success that he believes the original appropriation of \$650,000 may be raised to \$1,500,000. California's share of this national appropriation would be \$75,000, which under the terms of the Clark-McNary Act, would be matched dollar for dollar by the State, by communities or by individuals.

Fears that the United States is being over-built are premature and not founded on fact is the conclusion reached in a recent report by the Indiana Limestone Quarrymen's Association. The report states that in only a very few cities is there a surplus of buildings. The gigantic shortage caused during and after the war has not been overcome and in the opinion of the officials of the Association there is no danger of general over-building for the next two years.

Dixon, Solano county, Chamber of Commerce appoints committee to investigate feasibility of plans of Oakland interests to irrigate from 30,000 to 75,000 acres of land in northern Solano county with water from a reservoir in the Putah Creek watershed, northwest of Monticello. If favorable report is submitted an irrigation district will be organized and bonds voted to finance construction of irrigation works.

The first aid team of the Pacific Portland Cement Company's plant at Cement, Solano county, won a handsome silver trophy in the annual first aid contest held at Fresno. The contest was sponsored by the California Society of Safety Engineers. As a further reward the citizens of Cement tendered the team a banquet on their return with the prize.

U. S. Civil Service Commission announces an examination for draftsmen for naval construction in connection with naval construction authorized by Congress last winter. Further information is obtainable from commission offices, Washington, D. C.

Fresno will vote November 10 on proposal to issue bonds of \$700,000 to finance new elementary schools and additions to present structures and \$1,100,000 for new high schools and additions to standing structures.

It is expected that the lumber side of the hearing by the Interstate Commerce Commission on the general advance in freight rates asked for by the railroads will come up in Kansas City, December 14.

Roseville contemplates a bond issue to finance purchase and improvement of privately owned water works system to operate as a municipal project.

ALONG THE LINE

Mayor Frank S. Clark of Salinas has named the following to serve as a City Planning Commission: Howard Cozens, city engineer; Walter S. White, city attorney; Fred S. McCargar, secretary of the Salinas Chamber of Commerce, Mrs. George E. Lacey, D. A. Maderia, C. N. Thorup, Russell Scott, Mayor Clark is a member ex-officio. The ordinance providing for a city planning commission was adopted in the first part of the year, and authorized the mayor to name the personnel.

At a recent meeting of the joint outfall sewer board, representing Santa Ana, Anaheim, Fullerton and Orange, the resignation of William G. Knox as supervising engineer of the joint ocean outfall was tendered and accepted. O. E. Steward, former city engineer of Anaheim, was appointed maintenance engineer for the entire outfall system, and Burns, McDonnell & Smith Engineering Company of Los Angeles was appointed to superintend the construction of the 3000-ft. extension of the Ocean end of the outfall system.

E. Earl Glass, for the past three years secretary of the Southern California Chapter, Associated General Contractors of America, has resigned to accept the position of manager for the Pacific Coast Sand and Gravel Association with headquarters in the Hibernian Building, Los Angeles.

F. A. Morrell, electrical technician in the Stockton city building inspection department, has been appointed chairman of an advisory committee for the consideration of a national electrical code. The appointment was made at a recent meeting in Fresno of the Pacific Association of Electrical Inspectors.

Frank C. Miller, former city engineer of Sacramento, died in that city Sept. 24 following an illness of several months. Mr. Miller was widely known throughout California. He was 59 years old and came to Sacramento in 1902. A widow and daughter survive.

Central Pacific Railroad seeks authority of Interstate Commerce Commission to construct 16 miles of new line from Connell to a connection with Nevada-California-Oregon Railroad at Alturas, Calif.

E. N. Bryan, formerly office engineer, California state division of water rights, has been appointed chief deputy of the division by W. F. McClure, director of the California Department of Public Works.

Carmel-By-The-Sea has voted against the city manager form of government. Of six hundred eligible voters listed three hundred and forty-five cast a ballot.

Marysville contemplates adoption of the city manager form of government. The proposal is backed by the Marysville Ladies' Improvement Club.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

HITS OPPRESSIVE TAXES

"We cannot dodge the fact that New York City offers better financial inducements to new factories and other kinds of business than California does," says Frank H. Bode, manufacturer of lime, Pasadena.

"That wide-awake and hard-boiled metropolis is wise enough not to tax manufacturing machinery and stocks of merchandise; in fact only two per cent of the taxes are levied on any kind of personal property. Here in California the percentage is eighteen and we tax everything in sight.

"California should remove this handicap and doubtless will do so by taking another step in the California Plan of progressive exemptions. Taxes on all kinds of personal property should be done away with.

"If we want new industries we should not repel them by oppressive taxes. What does it profit us to have the best climate in the world, and the cheapest American power, as well as unsurpassed shipping facilities, if we cannot compete with other states in tax inducements?"

ADOPT 10-S MIXER

At a recent meeting of the mixer manufacturers' bureau of the Associated General Contractors at Chicago it was voted that the 10-S mixer be adopted as a standard size and that the technical committee submit its recommendations to the board of governors which will in turn petition the A. G. C. for approval of the 10-S as standard. It has developed that there is a demand for the 10-S mixer on sewer and building construction which will justify its manufacture as a standard. It is especially suited to a 1:2:4 mixture which is coming into more general use, and is a two-sack mixer for this grade of concrete. The next smaller size, 7-S, is a one-sack mixer for 1:3:6 concrete, and the next larger standard size, 14-S, is a two-sack mixer for 1:3:6 concrete.

PLUMBERS ORGANIZE

The Southern-Alameda County Master Plumbers' Association was recently organized by a group of master plumbers, representing Hayward, Niles, Irvington and Centerville. Rush Brunner, Hayward, was elected president, and C. R. Obbrott of Niles, vice-president. A membership of thirty is assured.

TRADE BODIES WIN RULING

The Supreme Court has refused a rehearing asked by the Government in the suits against the so-called Pottery & Maple Hardware Association, decided last spring in favor of the trade associations. These associations were then acquitted of charges of violating the anti-trust laws.

TO STAGE SOCIAL

The building material dealers of the Richmond Builders' Exchange will stage a banquet for the members of the exchange Friday evening, Oct. 23. C. E. Marshall and Robert Dornan will have charge of arrangements.

National Conference Awards Board Holds Successful Meet

(Special Correspondence)

The conference called by the National Board for Jurisdictional Awards in the Construction Industry which was held in the American Federation of Labor Building in Washington, D. C., on Tuesday, September 22, was a decided success in the opinion of all of those who attended.

Approximately one hundred and twenty-five contractors, labor leaders, architects and engineers attended the meeting representing all the various international labor organizations, the Associated General Contractors of America, the National Association of Building Trades Employers, the American Institute of Architects and the Federated Engineering Council.

The federal government was represented in the person of Secretary of Labor Davis, who in a masterful address stated that the National Board for Jurisdictional Awards was a necessary agency in the settlement of jurisdictional disputes in the construction industry. He stated further that the Board must be supported as vital to the best interests of the entire industry and urged full co-operation on the part of all the elements in it.

Addresses were also made by A. E. Coleman of Chicago, President of the National Association of Building Trades Employers and R. C. Marshall, Jr. of Washington, D. C., General Manager of the Associated General

Contractors of America. Both of these officials called attention to the fact that the Board had succeeded in the past in settling innumerable disputes between the trades which had resulted in a vast saving to the industry. Both of the speakers urged greater co-operation in the future on the part of all of the constituent organizations.

All of the presidents of the international labor organizations in attendance addressed the conference and once more pledged the support of their combined membership to the work of the Board. The address of John J. Hynek of Washington, D. C., General President of the Sheet Metal Workers International Alliance in behalf of greater support to the Board was especially forceful.

An attempt was made to bring the bricklayer-plasterer dispute to the attention of the Board for settlement, but both contestants seemed reluctant to place the controversy before it as there was some question as to the jurisdiction of the body—in this particular case.

No definite action was taken by the conference, but it was the consensus of opinion that the meeting would result in a crystallization of sentiment in favor of the agency that has done so much to settle disputes between the trades in the construction industry.

Water Conservation to be Topic At National Commerce Chamber Meet

Headed by Paul Shoup, western vice president of the Chamber of Commerce of the United States, and Ralph P. Merritt, member of the Board of Directors of the National Chamber, a large delegation is being organized to represent California at the midyear conference of the Western Division of the National Chamber to be held in Seattle, December 7th and 8th.

Arthur S. Bent of Los Angeles, member of the board of directors of the same organization, is chairman of the program committee of this conference and has selected as one of the important issues for discussion the question of water conservation and flood control, a subject of interest to all of the eleven states participating in this meeting.

Professor Frank Adams, head of irrigation investigations and practice of the University of California, will have charge of this section. He has been developing for a number of weeks past developing the work on this particular subject.

There will be a general statement of the present situation in the western states with reference to water conservation and control. This will cover (1)

the significance of water conservation and control; (2) the measure of water conservation and control now in effect; (3) present state and national policies; (4) public and private agencies concerned; (5) generally accepted desiderata; (6) scope of steps necessary to accomplish this.

There will be brief reports of accomplishments in water conservation and control in the eleven western states, with a statement of steps necessary to bring about still greater conservation and control in the future.

Points to be covered in those reports or statement include water storage; reorganization and reconstruction of water developments that are uneconomical and wasteful; co-ordination of uses of water, particularly as between irrigation, hydro-electric, and municipal supply; improved irrigation practices; State administrative control of water; State aid in water development; inter-state water compacts; and any other matters of particular significance in the states reporting.

This discussion because of its wide appeal will bring out a large attendance of state officials including engineers and agricultural directors.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

Efforts to drive the "shyster" contractor out of the construction industry and thus reduce building costs were given definite direction by action taken at the concluding session of a 3-day meeting of the executive board of the Associated General Contractors of America. Two distinct methods of routing irresponsible bidders were taken up. They are: (1) Intensive information of existing practices of issuing surety bonds covering building operations; (2) application to building operations of experience questionnaires and financial statement concerning contractors, designed to make obvious the necessary knowledge concerning the facilities and abilities of every bidder on construction work, both public and private.

Passage of an ordinance changing the present Oakland city planning commission from a purely civic body to a commission allowing for the employment of outside city planning experts, has been made by the Oakland City Council. This will permit the commission to call in or add to its personal any outside experts on city planning. The ordinance provides for a commission of five members one of which shall be a commissioner. The address of John J. Hayes of Washington, D. C., General President of the Sheet Metal Workers International Alliance in behalf of greater support to the Board was especially forceful.

An attempt was made to bring the bricklayer-plasterer dispute to the attention of the Board for settlement, but both contestants seemed reluctant to place the controversy before it as there was some question as to the jurisdiction of the body—in this particular case.

No definite action was taken by the conference, but it was the consensus of opinion that the meeting would result in a crystallization of sentiment in favor of the agency that has done so much to settle disputes between the trades in the construction industry.

Water Conservation to be Topic At National Commerce Chamber Meet

Headed by Paul Shoup, western vice president of the Chamber of Commerce of the United States, and Ralph P. Merritt, member of the Board of Directors of the National Chamber, a large delegation is being organized to represent California at the midyear conference of the Western Division of the National Chamber to be held in Seattle, December 7th and 8th.

Arthur S. Bent of Los Angeles, member of the board of directors of the same organization, is chairman of the program committee of this conference and has selected as one of the important issues for discussion the question of water conservation and flood control, a subject of interest to all of the eleven states participating in this meeting.

Professor Frank Adams, head of irrigation investigations and practice of the University of California, will have charge of this section. He has been engaged for a number of weeks past developing the work on this particular subject.

There will be a general statement of the present situation in the western states with reference to water conservation and control. This will cover (1)

the significance of water conservation and control; (2) the measure of water conservation and control now in effect; (3) present state and national policies; (4) public and private agencies concerned; (5) generally accepted desideratum; (6) scope of steps necessary to accomplish this.

There will be brief reports of accomplishments in water conservation and control in the eleven western states, with a statement of steps necessary to bring about still greater conservation and control in the future.

Points to be covered in those reports or statement include water storage; reorganization and reconstruction of water developments that are uneconomical and wasteful; co-ordination of uses of water, particularly as between irrigation, hydro-electric, and municipal supply; improved irrigation practice; State administrative control of water; State aid in water development; inter-state water compacts; and any other matters of particular significance in the states reporting.

This discussion because of its wide appeal will bring out a large attendance of state officials including engineers and agricultural directors.

UNIVERSITY ARCHITECT MUST PAY INCOME TAX

An architect employed by a Board of Regents of a state university as university architect, has been held not to be a state employee, so that his compensation is subject to federal income tax, in a ruling just made by the Income Tax Department, according to M. L. Seidman, tax expert, of Seidman & Seidman, Certified Public Accountants.

"In the particular case in which the ruling was made," Mr. Seidman explained, "an architect was employed by the Board of Regents under a ten year contract. His chief duties were to prepare and to submit to the Board plans of the campus, location of permanent buildings, drives, walks, etc., and to personally supervise all the work undertaken. He was to receive as compensation an amount equal to a specified percentage of the cost of all material and labor actually wrought into all buildings erected during the life of the contract.

"The Income Tax Department held that the position occupied by the architect was purely of contractual nature and that as the Board had no right to exercise control over the manner in which the architect's work was to be performed, the relationship of the architect to the university was that of an independent agency engaged to accomplish certain specific results and not that of an employer and employee. Accordingly, the architect's compensation was held to be subject to the federal income tax."

ARCHITECT'S SUIT STARTED

The taking of testimony in the suit of F. A. S. Foale, Sacramento architect, against W. S. and H. H. Hart, doing business as Hart Brothers, lunch-room proprietors, was begun in Sacramento Oct. 8, before Superior Judge Malcom Glenn.

Foale charges that he was employed by the Harts to draw up plans for a building that could be constructed three, five or twelve stories in height. The building was designed to occupy a site adjoining Weinstock-Luhlin's store.

Instead of using the plaintiff's design Hart Brothers abandoned the original plan and had the building they now occupy on Tenth near K streets, remodeled.

Foale says in his suit that he has been paid \$1,912.11 for his services, which, he asserts, are reasonably worth \$21,798.62. He is suing for the balance, \$19,886.51.

1924 SAND-GRAVEL OUTPUT

The output of sand and gravel in 1924 from plants in the United States, as reported to the Bureau of Mines, Department of Commerce, amounted to about 156,527,967 short tons, valued at \$87,241,641. This was an increase of 12 per cent in quantity and 7 per cent in value over the production reported for 1923. Seven States shipped over 10,000,000 tons each—New York, Indiana, Illinois, Michigan, Pennsylvania, California, and Ohio, in the order named, New York shipping 13,397,540 tons and Ohio 10,379,361 tons. Pennsylvania led in value of output, its shipments being valued at \$10,927,752. New York, Ohio, Illinois, California, Michigan, and Indiana followed in the order named, the output of Indiana being valued at \$5,070,329. Many other States showed increases. The average value per short ton was 62 cents, as compared with 65 cents in 1923.

Value of California's Mineral Industries in 1924 Shows Increase

Compilation of the final returns from the mineral producers of California for 1924 by the statistical division of the State Mining Bureau, under the direction of Lloyd L. Root, State Mineralogist, shows the total value for the year to have been \$374,620,789 being an increase of \$30,596,111 over the 1923 total of \$344,024,678. There were sixty different mineral substances, exclusive of a segregation of the various stones grouped under gems; and all of the fifty-eight counties of the state contributed to the list.

As revealed by the data following herein, the salient features of 1924 compared with the preceding year were: The increased value of the petroleum yield, although there was a material decrease in quantity; decrease in cement value owing to lower prices, although increased amounts were manufactured; increases in copper, quicksilver, tungsten, granite, marble, miscellaneous stone, limestone, mineral water, potash, and salt; and decreases in natural gas, gold, silver, platinum, brick, magnesite, pottery clay, gypsum, pyrites, and borates. The net result was an increase in the grand total of all groups of nearly thirty-one million dollars, as stated above. Petroleum accounted for an increase of \$31,921,565 in total value in spite of a decrease of approximately 34,000,000 barrels in quantity.

Of the metals: copper increased from 28,346,860 pounds worth \$4,166,989 to

52,089,349 pounds worth \$6,823,704; quicksilver from 5458 flasks and \$332,851 to 7948 flasks and \$542,080; and tungsten from 34 tons and \$19,126 to 731 tons and \$146,009. Gold decreased slightly from \$13,379,013 to \$13,150,175, in spite of which, as for several years past, California continued to account for approximately 30% of the gold output of the United States. Silver decreased in value from \$2,918,743 to \$2,381,952, owing to a lower average price.

Of the structural group; cement advanced in quantity from 10,825,405 barrels to 11,655,131 barrels, but due to foreign importations duty free, the price dropped, resulting in a decrease of total value from \$25,999,203 to \$23,225,850; granite increased from \$760,981 to \$1,211,046 in value, due to certain large building contracts notably the Los Angeles County Building; brick and hollow building blocks or tile decreased in total value from \$9,738,082 to \$9,137,908 owing mainly to a decrease in common brick. Lime and magnesite also registered decreases.

Of the "industrial" group, as is usually the case, there were a number of fluctuations, the more important increase in value being shown by mineral water and limestone, and decreases in value by diatomaceous earth, pottery clay, gypsum, pyrites, and talc. Of the salines, borates and soda showed decreases, while common salt, potash and magnesium salts advanced in quantity and value.

Bright Construction Future

By W. M. Brown, Secretary, H. K. Ferguson Co., Engineers and Builders, Cleveland, Detroit and New York

There is every indication of business generally continuing satisfactorily during fall and winter months. Credit is plentiful at low rates, export trade is large, commodity prices are rising, yet the increase has not been great enough to stop the large volume of buying; the rural districts as a whole are prosperous, production is high and there is no great unemployment.

The fact that building continues in enormous volume is an indication of prosperity. Building construction for the first eight months of 1925 has been \$558,000,000 greater than for the same time last year. Industrial building alone has been \$50,000,000 greater this year than last year.

It has been predicted almost every year by many that the building industry would soon experience a depression. Probably no industry has had worse things predicted for it; except the automobile industry, but like the automobile industry, each year has brought a very satisfactory volume of business.

One of the important things to be noted in the present business situation is that the prices of building material are less out of line with other commodity prices than for any time since 1919.

The average price for different groups of commodities compiled by the United States Department of Labor, show that although farm products, metals and metal products and chemi-

cals are lower than building materials, as compared with the year 1913, building materials are in turn 10% lower than cloth and clothing, 1% less than fuel and lighting and about equal to the cost of house furnishings. The present level of building materials makes this a favorable time to build and many manufacturers are taking advantage of this situation.

The only large industries that are not prosperous are the iron and steel and the textile industries. The iron and steel industry is already showing signs of improvement, however, and there is a more optimistic tone in reports from the textile centers.

The stock market has reached such unheard of heights that few people are active in it outside of the speculators. A good index of the prosperity of the farmer is in the sales of agricultural machinery. The earnings and sales reported by many of the machinery makers are better than for any time since 1920.

The standard of living of the American people is higher today than ever before. Since 1920 the cost of living has dropped much more than wages. In fact wages are higher in some industries today than they were six years ago.

We believe business men in general have every reason to be optimistic about the future and the outlook for the building industry is particularly bright in our opinion.

FIFTEEN U. OF C. ENGINEERS ON ESTUARY TUBE PROJECT

Fifteen of the engineers employed in the construction of estuary tube connecting Oakland and Alameda, are graduates of the University of California. This tube, which will replace the antiquated bridges across the estuary that divides the two cities, will be one of the most modern engineering designs on the Pacific Coast, and the cities and County of Alameda have been careful in the selection of the designers and builders. The University graduates who have been enlisted to aid in the work, with the positions they will hold, are: George A. Posey, '06, county engineer and chief engineer of the project; Professor Charles Derleth, Jr., consultant; Austin W. Earl, '06, designs; Harry E. Squire, '06, design advisory engineer; Lochiel M. King, '96, specification engineer; A. K. P. Harmon, '08, consulting geologist; A. V. Saph, Jr., '17, concrete arch specialist; Merton C. Collins, '12, designing engineer; Ned D. Baker, '09, chief draftsman; William E. Yocum, survey; Bruce Jameyson, '17, designs and estimates; Paul A. Swafford, '16, structural design; Walter Ruppel, '17, structural design; George E. Wotten, '22, Howard A. Schirmer, '23, and A. A. Eremin, '24, structural designs.

CALIFORNIA CLAY CORPORATION PLANT BEING COMPLETED

The California Clay Corporation is completing the building of storage, milling and shipping plants at Lincoln, Placer County.

The corporation owns 100 acres of clay land. The clay will be mined by a machine shovel and conveyed by gasoline locomotive power on an industrial railway from the pits to the crusher building. After crushing it will then be carried by an eighteen-foot belt conveyor to the top of a storage building of 18,000 tons capacity, and there distributed by an automatic device. As required, it will be taken out by another conveyor from the bottom of the storage building through a concrete lined tunnel to a large mill building, where it will be prepared for shipment.

A spur track of 1700 feet has been laid, which connects the plant with the main line of the Southern Pacific. Over 800 yards of rock were taken out for the tunnel and other excavations. Three hundred yards of concrete and 200,000 feet of lumber have been used in the construction of the buildings. The plant will have a capacity of 600 tons per day.

BUILDING AND LOAN CONCERNS SUCCESSFUL IN OAKLAND

Oakland building and loan associations have increased their assets nearly one and one-quarter million dollars during the last year, and Alameda county associations more than two and one-quarter million, according to A. E. Balch, state building and loan commissioner.

Assets of these concerns in Oakland increased from \$3,452,171 to \$4,668,429, and of those in the county from \$6,064,254 to \$8,891,422, Balch said.

There are four building and loan associations in Oakland and nine in Alameda county.

"There has not been a single failure among the building and loan associations in California in 10 years," Balch declares. "All the Alameda county associations are making remarkable progress and are leaders in the movement of community upbuilding."

How Can Taxpayers' Money Be Expended to Greatest Advantage

In order to assure, and as far as possible guarantee, to the taxpayer that all municipal work of public character will be done at the least possible cost compatible with good workmanship and efficiency, The Taxpayer, published in Minneapolis, suggests that in conformity with the spirit of Chapter 274, Laws 1921, the following steps or proceedings be taken before any public work be actually started:

1. The due authorization of the work to be performed, by legislative or other appropriate action, on the part of the body or agency clothed with the power and charged with the responsibility to order and direct the doing of public work, and having the means of providing for the payment thereof.

2. The preparation by competent engineers or architects, or both, of plans and specifications, with accurate quantity surveys and an approximate estimate of cost; and, with competent legal co-operation, of a suitable form of contract.

3. If and when the necessary appropriation has been made by the proper appropriating body, and the funds are in the hands of the authorized disbursing agency, or will be available when required, advertisements for bids should be published, in manner provided by law, in proper form, setting forth:

- (a) The qualifying requirements for bidders.

- (b) The time when, the place where and the conditions under which, copies of the plans, specifications, quantity surveys, form of contract and other information may be obtained.

- (c) The time when, and the place

where, bids will be received, publicly opened and read.

4. The prompt award of a contract to the lowest responsible bidder, who should be required to furnish a satisfactory and sufficient bond for the performance and completion of the work within the time and for the gross amount, or at the unit prices, named in his proposal—except and unless the agency directing such public work may for sufficient cause elect:

- (a) To reject all bids and re-advertise for other proposals; or

- (b) If, for good reasons given, it be considered that the work cannot be let by contract for a price as low as it can be done by the agency in question, to reject all bids and proceed under the method known as the "day labor system."

5. In the event that alternative "(b)" in Section "4" above is adopted, an accurate record should be kept, showing, properly classified, all expenditures of every kind and nature incurred in the prosecution and completion of the work, including the cost of all material and supplies, engineering, architectural and other services, overhead, rental and depreciation of equipment employed, insurance and any and all other items of cost and expense entering into the work.

6. A summary of such expenditures should be published in the official newspaper of the city within 60 days after the completion of the work; and a transcript of the itemized detail should be promptly procurable from the recording officer by any interested taxpayer requesting the same, upon the payment of a reasonable charge for copying.

Lumber Industry Threatened With Over-Production is Report

Overproduction of lumber on the west coast again appears to be menacing the fir market, according to the current edition of the 4L Bulletin just published by the Loyal Legion of Loggers and Lumbermen at Portland, Ore., and which states that the rail market which only a few days ago seemed destined to hold recent advanced prices and heavy demand for at least two months, has now shown signs of weakness.

Commenting on other phases of the fir market the Bulletin says:

"With the exception of six-inch uppers there has been a practical recession to the prices ruling in July, so far as the rail trade is concerned. It is hard to blame the eastern yards for sensing the conditions and tendering offers below even the present price level. It depends upon the individual policy of each mill whether such offers are accepted or not. Apparently if one plant does not agree to furnish rough timbers at \$16 mill basis, some other mill will do so. Slash flooring, which has been hanging to the apron strings of drop siding for two weeks, has slipped to around \$2 off list.

"Yet the fact is equally apparent that the actual demand from both the middle west and the eastern sections is good, and that were both common and clear fir lumber slightly harder to

obtain for immediate shipment the price levels would automatically slide upward again. Eastern wholesalers report that much of the fall buying seems to have been placed. If this proves to be the case, then the flurry of business in August will mark the only chance the mills will have this year to put the rail market on a firm footing.

"Railroad business is being placed, but only in small lots, and this tends more toward maintenance of way stocks than to car material. The middle western roads have revised their prices offered for select common timbers, and seem to be able to purchase at \$1 or so less than a month ago.

"By comparison, cargo business has held fairly steady. California cargo remains on a better plane than earlier in the summer, while green lath, that temperamental lady of the lumber trade, is up to \$4 f. a. s. for California cargo shipment. Should the southern demand hold to anywhere near its present position and any amount of offshore orders come forward, the cargo mills will once more make a much higher average showing than their rail trade brothers. To offset any possible profits, however, there are always some keen-sighted loggers on hand to tilt the price of logs upon which most cargo mills depend."

The Observer

(Continued from Page 4)

"The continuing stability of wage remains the outstanding feature of the labor market throughout the country according to reports received from 45 cities," states the American Contractor. "During the month of August only 7 local crafts had changes made in wages. While all of these adjustments were wage boosts the number of them was insignificant compared with the number of changes occurring in the same months of previous years. This is evident when the 7 wage increases for August, 1925, are compared with 18 raises and 2 cuts for August, 1924, 66 raises and 6 cuts for August, 1923, and 52 raises and 7 cuts for August 1922. Of the 7 raises that become effective last month or on September 1, 1925, 4 were granted to skilled workmen already receiving comparatively high wages."

Problems of national scope and of interest to all representatives of the structural steel industry will be discussed at the annual convention of the American Institute of Steel Construction to be held in White Sulphur Springs, West Va., November 11-14, at the Greenbrier. An educational program of exceptional value is reported to be in preparation for the sessions, which will include addresses by prominent authorities on subjects of special importance to the future of the industry. There will be also a varied list of entertainment features, with special attractions for the ladies.

The Solano county supervisors have voted favorably upon granting a franchise to A. O. Stewart of San Francisco to construct two toll bridges, one over Napa river and another over Sonoma river, in connecting Vallejo with the Santa Rosa-San Francisco highway at Sears Point. The two bridges will cost \$800,000 and will be constructed without cost to the county. Plans are awaiting the approval of the state engineer.

Snow Mountain Water and Power Company of San Francisco operating a hydro-electric plant in Potter Valley, Mendocino county, is reported to have completed plans for two additional plants, one to be constructed at Scott's Dam in northern Lake county and another in Coyote Valley, a few miles southwest of Potter Valley. Construction is estimated at \$3,200,000.

The State Railroad Commission has set October 20th as the date for a hearing upon the application of the California Highway Commission for an order directing the construction of an under pass under the tracks of the Southern Pacific Railroad on the Bay Shore Highway at South San Francisco. The railroad will be asked to assist the state in financing the grade separation.

Chas. Mahon, city electrical inspector of Turlock, has tendered his resignation to the city trustees. Harry C. Jackson and Emmet Lane have filed applications for the position. The latter is recommended by Mahon.

Alto J. Hager of Lansing, Mich., was elected Snark of the Universe at the recent annual Moo-Hoo convention at Spokane, Wash.

Berkeley city council plans installation of electrically controlled semaphore system for regulation of vehicular traffic.

TRADE NOTES

The Loop Lumber and Mill Company of Alameda, entirely distinct and separated from the Loop Lumber Company of San Francisco, was recently reorganized to succeed the Waddell Lumber Company, located in Broadway near the Estuary, Alameda. The company's operations include handling of all classes of lumber, doing general millwork and making a specialty of sash and doors. Officers of the Loop Lumber and Mill Company are: Wm. Chatham, president; Merrill Robinson, first vice-president and manager; Clement Fraser, second vice-president; and A. F. Bulotti, secretary-treasurer.

Control of the southern California Steel & Iron Co., of Los Angeles, has passed to the Pacific Coast Steel Company of San Francisco, and A. C. Denman Jr., for 13 years head of the Los Angeles concern, has tendered his resignation as president. While the plant at Los Angeles will be operated under its old name it will be a branch holding of the San Francisco organization. Mr. Denman disposed of his stock several months ago but remained in charge of the business until questions of policy arose which led to his resignation.

Klamath Falls, Oregon, lumbermen have purchased a five-acre site on the Oakdale branch of the Southern Pacific Railroad at Stockton and plans to establish a lumber products plant. Timber will be brought to Stockton from several California and Oregon sources, manufactured at Stockton and shipped to middle west points. Those interested in the plant are: H. L. Acomb, Emil Dreher and T. P. Henderson, all of the Klamath Lumber & Mill Work Company.

Arthur L. Nichols has opened quarters at 1718 East Twelfth Street, Oakland, and will engage in the sale of building materials, operating under the firm name of A. N. Nichols Company. Sash, doors, screens, tools, dies, taps, wire cable, American La France fire-fighting equipment and other items of material used in building will be carried in stock. Fred S. Halliday will be sales manager for the company.

Leonard D. Sanderson has purchased a half interest in the former Helmann & Morken Hardware Company of Burlingame. The firm will hereafter operate under the name of Burlingame Hardware Company with main offices and store at 222 California Drive, Burlingame, with a branch store at 1234 Broadway, Burlingame.

Richmond Hardware Co. is occupying its new store at Eighth and Macdonald Avenue, Richmond. The quarters were recently remodeled providing 1500 square feet of additional floor space.

Lindsay Construction Company of San Francisco, capitalized at \$50,000, has been incorporated. Directors are: W. J. C. W., R. T., and C. T. Lindsay and R. V. Pearson.

Paul Edward Curtis and Floyd Neville Curtis, both of Los Gatos, have formed partnership and will operate in Los Gatos under the firm name of Curtis Bros. Hardware Store.

A substantial interest in the Sixth Street Lumber Company at Klamath Falls, Oregon, has been acquired by R. P. Ellingson of Hawkins, Wis., who, recently purchased the stock and plant of the Klamath Lumber & Mill Work Company. The former concern does a re-manufacturing business and maintain a wholesale and retail yard. A. H. McCollum is president. Others active in the management are: C. R. Glendinning, A. C. Pearson and E. M. Pearson, the latter being secretary of the company. An announcement outlining future plans of the company is expected soon, and it is believed that a program of expansion will be outlined.

Duane L. Bliss Jr., California sales agent for the Gorton Heating Products, including the Gorton Quarter Turn Packing Lock Radiator Valves, Gorton Packing Lock Modulating Valves and Gorton Single Pipe Vapor Heating System, is now located at 346 Rialto Bldg., San Francisco. F. E. White, who has had a wide experience in sales work and is well known in the San Francisco territory has been added to Mr. Bliss' sales force, handling these lines.

Al O. Ewers formerly connected with the Sheet Metal Shop, 511 Sixth St., San Francisco, announces he has severed his connection with that firm and will not be responsible for debts contracted prior by his ex-partner, O. F. Justice.

Crown Building & Investment Company of San Francisco has been incorporated with a capital stock of \$600,000. Directors are: Joseph Greenbach, J. S. McClymont and C. W. Byrnes.

Feather River Power Company authorized by State Railroad Commission to issue \$5,000,000 first mortgage six per cent bonds to finance construction of hydro-electric plant at Bucks Ranch in Plumas County.

Federal Pipe & Supply Co., San Francisco, has been incorporated with a capital stock of \$200,000. Directors are: J. R. Winzler, P. Collischonn Jr., J. A. Harris, S. Pedder and R. D. Carmiencke.

Glyde S. Simmonds, 2726 Twenty-sixth St., Sacramento, manufacturing Master Painters Mixer, his own invention, will operate under the trade name of Simmonds Company.

McCormick Brothers Iron Works, Main and Folsom streets, San Francisco, suffered fire loss, estimated in excess of \$50,000, October 7.

Standard Painting Company, formerly located at 286 Sanchez street, has moved to 1359 Thirty-seventh Ave., San Francisco.

Clarence A. Tantau and John Branner, architects, announce the removal of their offices from 251 Kearny street to Shreve Building, San Francisco.

Nels P. Johnson, general contractor, has moved from 1934 Folsom street to 967 Fourteenth street, San Francisco.

APARTMENTS

To be Done by Day's Work

APARTMENTS Cost, \$18,000
SAN FRANCISCO, W Seventh Ave.,
225 S Irving.
Three-story and basement frame (12)
apartments.
Owner—Arthur H. Klahn, 1334 21st
Ave., San Francisco.
Architect—None.

Contract Awarded.
Cost, \$17,378
SAN FRANCISCO, S Clay 175 W
Franklin St.
Three-story and basement frame (12)
apartments.
Owner—Carrie B. Rousseau, 1991 Cali-
fornia St., S. F.
Architect—Chas. J. Rousseau, 1991 Cali-
fornia St., S. F.
Contractor—McIntosh Bros., 180 Jessie
St., S. F.
Plumbing and gas fitting—Henry
Ernst & Sons, 551 Hayes St., \$3300

Owner To Take Segregated Bldg.
APARTMENTS Cost, \$150,000
SAN FRANCISCO, SW California and
Franklin Sts.
Five-story and basement concrete apt.
house (30 apts.).
Owner—W. Props, 2335 Larkin St., S. F.
Architect—W. C. Mahoney, 892 Union
St., S. F.

**Plans Complete—To Be Done By Day's
Work and Segregated Contracts.**
APTS., STORE Cost, \$50,000
BERKELEY, Alameda Co., Cal. Uni-
versity Ave.
Three-story frame and stucco apt. and
store, (20 2-rm. apts.).
Owner—W. C. Mahoney, 892 Union
St., S. F.

**Taking Bids for Plastering & Elec-
trical Work — Reinforcing Steel
Awarded.**
Cost, \$120,000
SAN FRANCISCO, S Fulton 137-6 E
Franklin St.
Four-story reinforced concrete apart-
ment house (32 2-room and 8 3-rm
apartments).
Owner—E. V. Lacey, 180 Jessie St., San
Francisco.
Architect—J. C. Hladik, Monadnock
Bldg., San Francisco.
Lessee—V. Fiddle.

Reinforcing steel awarded to Badt-
Falk Co., 74 New Montgomery.
Bids are being taken for plastering
and electrical work.
As previously reported, grading,
trenching, foot forms, concrete work,
terra cotta flues, grounds, and side-
walks was awarded to Mission Con-
crete Co., 125 Kissling St., at \$17,500.

**Sub-Contracts Awarded—Bids To Be
Taken Next Week.**

APARTMENTS Cost, \$175,000
SAN FRANCISCO, N Sutter St. 50 ft.
E Leavenworth St.
Nine-story class A steel frame apart-
ment house (48 apts.)
Owner—M. E. Vukicevich and F. M.
Stich, 708 Hearst Bldg., S. F.
Architect—Alfred I. Coffey, 1126 Phe-
lan Bldg.
Structural steel awarded to Schrader
Iron Works, 1247 Harrison St.
Concrete work to Vannucci Bros., 401
Church St., San Francisco.
Bids will be taken in a week for
plumbing, mill work, glass, steam
heating and painting.

Contract Awarded.
Cost, \$40,500
APARTMENTS
OAKLAND, NW 7th Ave. and E-15th
Street.
Three-story 30-room apartments and
garage.
Owner—A. G. Scolari, 1636 Franklin
St. Oakland.

PRATT BUILDING MATERIAL CO.
Clarence F. Pratt, President and Manager
Main Office: Hearst Building
Plants and Yards at
San Francisco, Prattrock (Near Folsom), Sacramento, Marysville, Prattco (Monterey County)
Phones—Douglas 300—Sutter 3636—"Both Easy to Remember"
SAND—CRUSHED ROCK—GRAVEL
San Francisco, October 10, 1925.

Dear Sir:
The enclosed sample of "Prattco Amber" Sand (No. 4—coarse) is from our sand producing plant at Prattco (not Prattrock near Folsom), Monterey Co., two miles from the Hotel Del Monte—Isn't this sand clean and hard?
A stock of this sand is now being carried in San Francisco by the T. I. Butler Company at their bunkers at 7th and Berry streets (in the heart of San Francisco).
"Prattco Amber" sand from Monterey County is used for plastering both exterior and interior, topping sand, concrete, sand-blasting, as well as chicken grit. We also call it "Prattco Amber Chicken Grit" and "Prattco Amber Bird Gravel." Try it on your canary or parrot—the canary will be so happy he will sing you to sleep.
Call Tommy Butler, live wire manager of the T. I. Butler Company, or call our office Douglas 300, "easy to remember," and see if we can convince you that it will pay you to use "Prattco Amber" sand in San Francisco.
The Butler people also carry our "Prattco Amber" mixed sand as well as "Prattco Amber" No. 2, or fine sand from Monterey County.
Yours for sand, rock and gravel,
SANDY PRATT, President.

IF YOU read the above.
YOU WILL know.
THAT "PRATTCO Amber" sand.
FROM PRATTCO (Monterey County).
IS SOMETIMES.
"PRATTCO AMBER chicken grit."
IF YOU feed it.
TO YOUR chickens.
IF YOU want.
TO MAKE your bird sing.
ASK FOR:
"PRATTCO AMBER Bird Gravel."
FEED YOUR canary.
HE WILL digest his food.
BECOME EXTREMELY happy.
JUST LIKE you do.
THEN YOUR canary.
WILL SING you a song.

ASK TOMMY Butler.
FOR SANDY Pratt's sand.
OR SANDY's bird gravel.
AND TOMMY will take it.
ALL OUT of the same bunker.
"I THANK you."

A friend of Sandy Pratt's fed his chickens Sandy's "Prattco Amber chicken grit" (Sandy's sand from Monterey County), and the chicks had much fun they cleaned the town of flies, mosquitoes and other wild animals.

Plans Being Prepared—Bids Close Oct. 26, 10 A. M.

Official Proposals

NOTICE TO CONTRACTORS

(Union Avenue School District)

Pursuant to the direction of the Board of Trustees of Union Avenue School District of the County of Kern, State of California. Sealed bids will be received at the place and the time hereinafter mentioned by the School Board of Union Avenue School District for the construction and erection of a two class frame and stucco school building and frame toilet building and any or all items called for in alternate bids in form of proposal. The said building and construction to be according to the plans and specifications for the same now on file with the Clerk of the Board of School Trustees, to-wit: Rowen F. Hall, Post Office address, Route 2, Box 293, Bakersfield, California, at the office of Smith, Glass & Dupes, Architects, Room 26, New Fish Building, 1824 K Street, Bakersfield, California.

The said bids must be accompanied with a certified check for ten per cent of the amount of said bid. Bidders bond will not be accepted in lieu of certified check. Said check is to be returned in the event of rejection of said bid, or in the event of the bid being accepted then the said certified check is to be returned upon the execution and delivery to the School District of a good and sufficient bond for the faithful performance of the said contract to be entered into for the erection of said buildings. Said bids must be sealed and directed to the said clerk at the above address and delivered to the said clerk or to the said architects prior to the 20th day of October, 1925, and thereafter no said bids will be opened on the 26th day of October, 1925, at the hour of 8:00 P. M. at the office of the clerk of said School District.

The contract will be awarded to the lowest and best bidder. The Board reserves the right to reject any or all bids.

ROWEN F. HALL, Clerk.
R. BLAISE,
J. E. MILLS.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on November 9, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

San Bernardino and Riverside Counties, between Del Norte and Riverside (VIII-S.D.-Riv-19-B & A); about fourteen and six-tenths (14.6) miles in length; to be paved with asphalt concrete.

Riverside County, between Desert Center and four miles west of Hemlock Well (VIII-Riv-64-C), about twenty-one (21.0) miles in length; to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willets, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

of the work herein contemplated, and Contractors are urged to investigate the location, character and quantity of work to be done with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, and the opening of bids.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.
HARVEY M. TOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MIXON, Secretary.
Dated: October 13, 1925.

NOTICE TO CONTRACTORS

(Jail and Offices—Del Norte County)

Notice is hereby given by the Board of Supervisors of Del Norte County, that bids will be received for the erection of a reinforced concrete building to be used for a Jail and Official offices.

Plans may be obtained from the Clerk of the Board of Supervisors at Crescent City, or from the Architect, Norman R. Coulter, 46 Kearny St., San Francisco, California. Contractors getting plans will be required to deposit Ten (\$10.00) Dollars until they return plans.

All bids submitted must be accompanied by a certified check, cash, or bid bond to the amount of ten per cent of the bid submitted. All checks, or bonds are to be made payable to the Clerk of the Board of Supervisors. All checks, cash or bid bonds will be returned to all parties whose bids are not accepted; and to the party whose bid is accepted upon his entering into a contract to perform above mentioned work and furnishing satisfactory bonds

such as may be required by law and the said Board of Supervisors.

All bids must be delivered to the Clerk of the Board of Supervisors in a sealed envelope and marked, "Bids for the construction of the Del Norte County Jail Building, Crescent City, Calif." on or before ten o'clock A. M. October 20th, 1925, at the office of the County Clerk, Crescent City, Calif.

All contractors submitting bids must do so with the understanding that the Board reserves the right to reject any or all bids.

EMMA COOPER,
Clerk of Board of Supervisors, Del Norte County, California.

STATE OF CALIFORNIA DEPARTMENT OF PUBLIC WORKS DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the Division of Architecture, 615 Forum Building, Sacramento, Cal., until 2 o'clock p. m. on Oct. 20, 1925, at which time they will be publicly opened and read, for surfacing in accordance with the specifications therefor, to which special reference is made, a road in the State II spinal Farm near Stockton, Calif.

STATE ARCHITECT'S ESTIMATE.
Item 1, 3,560 tons crushed gravel or stone surfacing.

The foregoing quantities are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, as may be deemed necessary or expedient by the said Division of Architecture.

All bids are to be compared on the basis of the State Architect's estimate of the quantities of work to be done.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the Division of Architecture, Forum Building, Sacramento.

No bid will be received unless it is made on a blank form furnished by the Division of Architecture. The special attention of prospective bidders is called to the "Instructions to Bidders" annexed to the blank form of proposal, for full directions as to bidding, etc.

The Department of Public Works, acting by and through the Division of Architecture, reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE.

GEO. B. McDOUGALL,
State Architect.
W. F. McCLURE,
Director of Public Works
Dated Oct. 10, 1925.

NOTICE TO CONTRACTORS

NOTICE TO CONTRACTORS

(Sonoma-Long Barn National Forest Highway—Crushed Rock Surfacing)

Sealed proposals for placing crushed rock surfacing on the above-named National Forest—Highway, located partly within the Stanislaus National Forest, Tuolumne County, State of California, will be received by the District Engineer, Bureau of Public Roads, U. S. Department of Agriculture, at 400 Bay Bldg., 9 Main St., San Francisco, California, until 10 o'clock A. M., on the 26th day of October, 1925, at which time and place they will be publicly opened and read. The right is reserved to reject any and all bids and none will be considered except those from contractors ascertained to be experienced and responsible.

The project begins about 8 miles east of Sonoma County, California, and extends 11.86 miles in length. The principal items of work are as follows: Crushed Rock Surfacing, 21,600 cu. yds.

Scraping Top Course Material, 1200 cu. yds.

Surfacing shall be started as soon as practicable in the spring of 1926 and shall be completed by August 31, 1926. The contract form and the plans, specifications, special provisions and estimates of quantities may be examined by responsible contractors at the following addresses:

400 Bay Bldg., 9 Main St., San Francisco, Calif.

Calif. Highway Commission, Forum Bldg., Sacramento, Calif.

H. S. Telen, U. S. Engr. on project, Confidence, Calif.

The Bureau has available for loan to contractors on a rental basis equipment at Government Island, Oakland, California, as listed in the specifications. Bidder will state in his bid the Government equipment that he will use during construction and minimum time taken into consideration and award will be made on the bid to the best advantage of the Government. Government explosives are also available according to the terms of the specifications.

Plans and specifications will be furnished contractors who contemplate bidding, on a showing of financial ability and on the deposit of a check for \$5.00 payable to the Secretary of Agriculture of the United States. Check will be held pending the return of plans and specifications.

All proposals must be made on forms furnished by the District Engineer, Bureau of Public Roads, and in accordance with the instructions forming a part of the specifications above referred to, and must be accompanied by cash or certified check in an amount equal to at least five (5) per cent of the total amount of the proposal, together with a schedule of proposed operations as called for by said specifications.

October 7, 1925.

C. H. SWEETSER,
District Engineer.

NOTICE TO CONTRACTORS

(Monterey School District)

NOTICE IS HEREBY GIVEN that the Board of Trustees of the Monterey School District of Monterey County, California, will receive bids for the erection and completion of a one-story reinforced concrete school building located on property owned by said School District at the Oak Grove School site, southeast corner of First street and Park avenue, Monterey, California.

Bids are to be taken on the work as follows:

- 1.—General Contract Work.
 - 2.—Program Clock Work.
 - 3.—Plumbing Contract Work.
 - 4.—Heating Contract Work.
- Each bid is to be in compliance with plans and specifications prepared by Arthur W. Angel, Architect, now on file with A. G. Winston, 212-218 Main Street, Monterey, California.

Material men may see plans for the purpose of reference, at the office of Paul V. Tuttle, 363 Seventeenth Street, Oakland, California.

Each contractor will be required to deposit ten dollars on each bid. Plans are returned in good condition.

Each bid shall be made out on letterhead similar to a form enclosed and must be accompanied by a certified or cashier's check or bidder's bond (issued by a surety company, accredited by said Board of Trustees) for five per cent of the amount of the bid made payable to A. G. Winston, Clerk of said Board of Trustees, shall be sealed and filed with said Board on or before October 24th, 1925, at 7 o'clock P. M. and will be opened in public soon after that hour at the Monterey Grammar School at No. 642 Pacific St., Monterey, Calif.

The above mentioned check or bidder's bond shall be given as evidence that the bidder will enter into contract, if awarded the work, and will be declared forfeited if the successful bidder refuses to enter into such contract after being requested so to do by the said Board of Trustees.

The successful bidder will be required to furnish bonds of a Surety Company to the Board of Trustees covering an amount equal to 75% of the contract price. Said bonds to be delivered within three days after having been awarded the work by the said Board of Trustees.

The Board reserves the right to reject any and all bids.

By order of the Board of Trustees of the Monterey School District, Monterey, County, California.

Dated: October 5th, 1925.

A. G. WINSTON, Clerk.

NOTICE TO CONTRACTORS

(Fencing—Berkeley Schools)

Notice is hereby given that the Board of Education of the City of Berkeley and of the Berkeley School District of Alameda County, State of California, hereby calls for bids for doing and performing the following work:

Be erection of line fencing at University Elementary School, Rose and Walnut Streets; Longfellow School, California and Ward Streets; Whittier School, Virginia and Milvia Streets; Thousand Oaks School, Tacoma and Colusa Avenues; Le Conte School, Ellsworth and Russell Streets; McKinley School, Dwight Way and Telegraph Avenue; Washington School, Bancroft Way and Grove Street, all in the City of Berkeley.

The work is to be done and performed in accordance with plans and specifications on file in the office of the Secretary of the Board of Education, 2133 Allston Way, Berkeley, California.

All bids must be enclosed in sealed envelopes marked "Bids for the erection of fencing at the various Berkeley Schools," and addressed to the Secretary of the Board of Education, 2133 Allston Way, Berkeley, California, and must be accompanied by a certified check in the amount of ten per cent of the bid payable to the Berkeley School District of Alameda County.

The successful bidder will be required to furnish a surety bond acceptable to the Board of Education in the sum not less than fifty per cent (50%) of the contract price, guaranteeing the faithful performance of the contract; also a bond in the sum not less than fifty per cent (50%) of the contract price, guaranteeing the payment of all claims for labor employed or materials used in the erection of line materials used in the said schools, as provided by an Act of the Legislature of the State of California, entitled "An Act to Secure Payment of Claims of Material Men, Mechanics or Laborers Employed by Contractors upon State, Municipal or other Public Work, approved March 27, 1897," and must carry adequate insurance indemnifying liability for compensation provided by Workmen's Compensation Insurance and Safety Act, approved May 26, 1913, satisfactory to said Board of Education.

All bids will be received by the Secretary of the Board of Education at his office, 2133 Allston Way, Berkeley, California, until the hour of 4:15 o'clock P. M. on Tuesday, October 27, 1925.

Bids will be opened by the said Board of Education on Tuesday, October 27, 1925, at the hour of 4:15 P. M. in the Board of Education Rooms, 2133 Allston Way, Berkeley, California. The Board reserves the right to reject any and all bids or any or all items of such bids.

By order of the Board of Education of the City of Berkeley and of the Berkeley School District in the County of Alameda, State of California, September 30, 1925.

GEORGE S. MOUSER,
Secretary of the Board of Education.

STATE OF CALIFORNIA CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, until 2 o'clock P. M. on November 2, 1925, at which time they will be publicly opened and read, for consideration in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows: Fresno County, a Division Office building in the City of Fresno, to have brick walls, finished with stucco, concrete foundation and basement, wood frame floor and roof, tile roofing, and will be completely finished inside with plaster and wood trim. Plumbing, Heating, and Electric Work will be included in General Contract.

Ventura County, between Camarillo and Ventura (VII-2-B & C), about thirteen and two-tenths (13.2) miles in length; nine and eight-tenths (9.8) miles to be paved with Portland cement concrete and four and four-tenths (4.4) miles to be widened with Portland cement concrete.

Riverside County, between Beaumont and Hanning (VIII-15-26-B), about three (3.0) miles in length, to be paved with Portland cement concrete.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said offices and may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the Division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino, Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and of the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,
LOUIS L. SPRIDING,
N. E. EDWARDS,
California Highway Commission.
R. M. MORTON,
State Highway Engineer.
W. F. MORTON, Secretary.

Dated: October 5, 1925.

ISSUES HANDBOOK

The Sheet Metal Contractors Association of San Francisco has issued a sixty-six page (second edition) handbook on copper flashings which will prove an invaluable addition to the architect's and general contractor's library. Detailed specifications and drawings are featured in the publication.

Architects—Engineers— City and County Officials

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns
of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent contractors* to figure your job—if you want the *lowest possible bid*—send particulars of your project to

Building & Engineering News

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details—but it's *strong, rugged*—it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

WALL BOARD FINDS READY MARKET IN SOUTH AFRICA

The demand for wallboard has increased in Union South Africa since the war and two boards of American make are very popular offering strong competition to English brands. These facts are brought out in a trade information bulletin on "Paper and Paper Products in the Union of South Africa and Egypt" just issued by the paper division of the bureau of foreign and domestic commerce.

Wallboard made locally in Africa is made of asbestos and cement. The principal uses for wall board there are for ceilings and to a lesser extent for walls, the bulletin points out.

Up to the present no fiber wall board has been introduced into Egypt. Egyptian houses are built wholly of brick, plaster, concrete and stone and in most cases the interior walls are built of the same material, but a small market could probably be developed for use in apartments and European houses.

Imports of paper into the Union of South Africa amounted to \$4,084,011 in 1924 compared with \$2,340,973 in 1913. The United States held sixth place in the paper trade of this region in 1923.

OAKLAND HARBOR POLICY IS OUT- LINED BY COUNCIL

A policy of developing only the land now owned by the city on the Oakland waterfront and purchase of no land except small areas in the estuary for construction purposes is expressed by the city council in a resolution announcing the policy and construction program to be followed with the passage of the proposed harbor bond issue of \$9,960,000.

The resolution also announced that the bonds will only be issued as the need for actual expenditures arises as a means of saving interest on the bonds.

The resolution gives in brief the five-year program of harbor development as outlined by the three noted engineers in their recent report to the council.

According to the resolution the proposed development is so laid out as to benefit the entire city.

The main recommendations as outlined in the resolution are as follows:
OUTER HARBOR—A wharf 1700 feet long with a 1500-foot transit shed of nearly 300,000 square feet in area and necessary tracks and roadways, located on city land at the west end of Fourteenth Street.

INNER HARBOR—A double pier at Grove Street with 1700 feet of berthage and a transit shed with an area of 168,000 square feet, and a double pier at Clay Street with 1500 feet of berthage and 126,000 square feet of transit shed, with necessary roadways, trackage and approaches.

BROOKLYN BASIN—A mole pier with 3500 feet of berthage space and a transit shed with an area of 600,000 square feet, together with the necessary trackage, roadways and approaches thereto from existing streets.

WAREHOUSE AND COLD STORAGE PLANT—To be constructed at the most suitable place in the harbor area sufficient to meet the requirements of shipping.

FIRE BOAT AND HOUSE—A fire boat with a capacity of 10,000 gallons per minute at 200 pounds pressure, together with a house for its protection.

MISCELLANEOUS DREDGING—In various parts of the harbor.

CONSTRUCTION TREASURER LEAVES \$108,757 ESTATE

Kimball G. Easton, treasurer of Bates & Boreland, contractors, until his death March 21, left an estate valued at \$108,757, according to an inventory filed with County Clerk Geo. Gross. The inheritance tax is fixed at \$481.08. Securities amounting to \$75,000, amounts due to estate to the extent of \$18,000, and a ranch at Colfax Springs appraised at \$14,000 comprise the bulk of the estate.

The widow, Mrs. Katherine O. Easton, 1915 Berryman St., Berkeley, receives \$25,942 by terms of the will. One daughter, Mrs. Dorothea A. Harter, receives \$40,150, another daughter, Esther K. Easton, \$11,000, and the balance is left to nephews, nieces, brothers and friends.

PRIZE AWARDS FOR HOUSING ESSAYS ANNOUNCED

In an effort to encourage better housing for intellectual workers, the International Federation of Building and Public Works with headquarters at 17 Avenue Carnot, Paris, France, announces the organization of an international essay competition for which Willard Reed Messenger, of New York has offered \$1000 in prizes. The first prize will be \$500; the second prize \$300; the third prize \$200.

Participants should submit their papers typed in French or English not exceeding four to five thousand words which may be accompanied by sketches, not later than January 15th, and prizes will be awarded the following month.

Papers should include the four following divisions, states the official announcement just issued from Paris.

I. Administrative or legislative measures for facilitating the construction of houses intended for the middle classes or intellectual workers.

II. Financial Policy,—loans, amortization, etc.

III. New construction methods intended to reduce the cost of building, together with sketches.

IV. Conclusions.

The data submitted and sketches must bear some legend or pseudonym and be sent with an enclosed plan, sealed envelope bearing only the legend on the outside and containing enclosed the name, address and profession of the competitor, which will be opened only after the winners have been selected by the Jury of Judges.

The Jury will include at least two American members, three members will be named by the International Federation and three by the French National Federation, and three members named jointly by these two organizations. The Jury will choose its own President.

The subject of better housing for brain-workers was given primary consideration at the biennial Congress of the International Federation, held in Paris in June, at which forty nations were represented, and to which President Coolidge appointed several American delegates.

LUMBER SHORTAGE IS MYTH

"The lumber shortage is a myth," Edwin Emmons, of Elizabeth, told the quarterly meeting of the New Jersey Lumbermen's Association.

"The finest lumber being turned out in the nation's history is being milled today," he said. "The supply is ample and a shortage is not even a future possibility so long as the present intelligent reforestation program is carried out."

"Reforestation program concerns the axe as well as the sawing. It is just as vital to keep chopping as it is to keep planting. Trees must be thinned out to permit splendid growth."

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The use of pressure creosoted pine poles in 1924 showed an increase of nearly 100 per cent over the 1923 figures, according to the Service Bureau of the American Wood-Preservers' Association. The following statistics, covering pressure creosoted pine poles for each of the last eight years, have been compiled by R. K. Helphenstine, Jr., of the U. S. Forest Service in cooperation with the above Association. Figures on creosoted pine poles as a separate class have never before been given out.

Year	No. of pine poles pressure treated
1917	103,304
1918	67,541
1919	156,346
1920	167,289
1921	224,777
1922	291,891
1923	451,852
1924	889,201

Lack of uniformity in the existing workmen's compensation laws in the various states has prompted the National Industrial Conference Board to initiate a movement to standardize the laws governing the administration of compensation. One of the suggested changes for remedying defects in the present laws comes from the Conference Board of Physicians in Industry and is that at least one member of each state compensation board shall be a physician who shall be selected from at least three proposed by the state medical society, and who shall act as medical director.

Bids are being received by the Bureau of Yards and Docks, Navy Department, Washington, D. C., under Specification No. 5105 to erect hospital buildings at Mare Island Navy Yard. Bids have been requested on all parts of the work which is segregated into four units. Plans are obtainable from Bureau of Yards and Docks, Navy Department, Washington, D. C., and from the Commandant at the Mare Island Navy Yard. The date for opening figures has not yet been determined. See the official call for bids in another column of this issue.

Construction has been started on a new sawmill and railroad up Sequel creek to the holdings of the Monterey Bay Redwood Lumber Company on the slopes of Loma Prieta near Olive Springs, Santa Cruz county. The railroad will extend from near Capitola up Sequel creek to the new mill. Fourteen carloads of saw mill material have been received from Tuolumne county and the machinery is being hauled to its new location.

A special meeting of stockholders of the Homer T. Hayward Lumber Company will be held in Salinas, December 19, to consider increasing the capital stock of the company from the present issue of 1500 shares of the par value of \$100 each to 2500 shares of the par value of \$100 each.

Charles Heineman, former deputy building inspector, has been named plaster inspector for the city of Oakland.

Plans are under way in Boston which, if successfully carried out, will eliminate the use of the strike and lockout in the settlement of differences in the construction industry, and substitute therefore arbitration in all matters where wages, interpretation of working rules or other disagreements shall arise. Contractors and building trades union leaders in Boston have agreed in principle to accept a uniform agreement covering all the trades. The uniform form of agreement which has been decided upon corresponds in many respects with similar agreements that have been used in a number of cities. The establishment of wage rates is to be by special negotiation or arbitration and may be written into the uniform agreement for any length of time agreed upon by the special craft involved.

Announcement is made by the Contractors' Association of Northern California of the organization of the Clearing Bureau of Contract Investigation with headquarters in the United Bank & Trust Bldg., at 625 Market St., San Francisco. On the board of governors R. M. Morton, state highway engineer, will represent the public interest; H. E. Wood, superintendent of the bonding department of Aetna Casualty & Surety Co. will represent the surety interests, and Earle G. Lloyd, manager of the Contractors' Association of Northern California, will represent the contractors. H. J. Douglass, formerly manager of the American Surety Company at San Francisco, has been elected director of the bureau. Fred G. Simmons, former engineer and manager of the Contractors' Association of Northern California, originally outlined the bureau plan.

Actual transfer of the mills and timber of the Pope & Talbot interests, to the Charles R. McCormick interests of San Francisco, in the \$20,000,000 deal started some months ago, was consummated October 17, according to Robert E. Smith, president of the Lumbermen's Trust Company of Portland, Ore. which served in financing the new McCormick corporation. Not only the original lumber business of the Charles R. McCormick Lumber Company and its subsidiaries and of Pope & Talbot are now gathered into the Charles R. McCormick Lumber Company of Delaware, but the steamship and transportation interests of McCormick and associates are embraced in the new corporation.

J. M. Cinnamond, a co-partner in the Royal Floor Company, 620 Fourth St., San Francisco, has secured a patent on a stay bolt for use in fastening sleepers. The invention will be known as "Zip" and will shortly be placed on the market. Architects, engineers and contractors who have seen the model displayed in the offices of the company declare that "Zip" will fill a long felt want in a stay bolt that will eliminate squeaks in floors.

Jas. C. Hanley, second vice-president of the Los Angeles Builders' Exchange, has joined the sales forces of the Los Angeles Brick Company with headquarters in Los Angeles.

ALONG THE LINE

The Solano county board of supervisors has granted a franchise to A. O. Stewart of San Francisco to construct a bridge across the Napa river on the proposed road connecting Solano county at Vallejo with several coast counties at Sears Point in Marin county. The franchise has life for fifty years. The bridge is to be not less than 1400 feet in length and to be of height, width and constructed of such material as shall be approved by the war department. The bridge shall be constructed within two years from the date of the permission given by the war department and tolls to be charged will be 10 cents for ambulances, automobiles and other motor driven vehicles except auto trucks, on which a charge of 15 cents will be made. The proposed bridge and road has been before the board of supervisors for several years, but it did not feel that it would pay the county to undertake a large expense such as would follow at this time.

Thomas F. Manville, "asbestos king," whose fortune has been estimated to exceed \$10,000,000, is dead. An attack of heart disease proved fatal Oct. 19 in his apartment at the Hotel Plaza, New York, where he had lived alone for the last three years. He was 63 years old. For three years he was president of Johns-Manville, Inc., and he changed his position about a year ago to chairman of the board of directors. He was a director of various other corporations.

W. Jones Cuthbertson, pioneer San Francisco architect and former city architect, died Oct. 17, at the age of 75 years. Mr. Cuthbertson was born in London, England, and came to San Francisco in 1875. Many of the fine homes on Nob Hill were designed and built by Architect Cuthbertson. He was San Francisco city architect during the administration of Mayor Phelan. He is survived by W. J. C. G., Frederick C. and May E. Cuthbertson.

Walter S. Leland, mechanical engineer, has moved from 664 Howard St. to 532 Natoma St., San Francisco. Mr. Leland handles the business in this territory for the Bishop and Babcock Company, heating specialties and ventilating equipment; the Erie City Iron Works, tubular and water tube boilers, furnace grates and heating plants in addition to being representative for the Birchfield Boiler Company.

Reuben J. Wood, for fourteen years connected with the structural engineering department of the San Francisco Department of Public Works, died Oct. 15, following a brief illness. Wood, who was 41, designed the transmission towers of the Hetch Hetchy power line from Mokassin Creek power house to Newark.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

TELLS WATER POSSIBILITIES

The possibilities of regulating the water flowage of the Sacramento, Mokelumne and other rivers of California through means of storage reservoirs for the two-fold purpose of preventing winter floods and conserving water for the generation of hydro-electric energy, irrigation and domestic uses, was explained by Paul Bailey, deputy chief of the state division of engineering and irrigation at the Mokelumne river water hearing held in Sacramento, October 16.

Bailey was called as a witness by the State Reclamation Board, and testified that engineering records covering a period of many years show that the stream flow of the Sacramento might have been regulated by a large reservoir in the vicinity of Kennett. He said the same rule could be applied to the Mokelumne.

\$1,500,000 PUBLICITY DRIVE IS PLAN OF LUMBER INTERESTS

A plan for a national advertising campaign, to cost nearly \$1,500,000, and designed to bring attention to the advantages of Pacific Coast lumber and forest products, was placed before the West Coast Lumbermen's Association at its monthly meeting, October 16.

The program includes an annual appropriation for advertising of \$475,000 annually for a three-year period. The plan has been worked out by a special committee for trade promotion headed by J. D. Tennant of the Long Bell Lumber Company, and including Major Everett G. Griggs of Tacoma, president of the St. Paul and Tacoma Lumber Company; Charles S. Keith of Kansas City, Charles R. McCormick of San Francisco, E. R. Titcomb of Snoqualmie Falls, Wash., and C. D. Johnson of Portland, Oregon.

NEW MEMBERS

Among applications for membership in the San Francisco Builders' Exchange, the following are included: Steel Service Company, concrete reinforcement; Safety Saw Works, rip-saw cut-off machines; U. S. Rubber Company, rubber tile flooring and rubber goods; H. S. Meinberger, builder and contractor; G. Bianchini & Co., gravel, rock and cement dealers; Frank J. Ploch Co., heating contractors.

ELECTRICAL MEN ELECT

Officers of the Santa Clara County Electrical Development League were elected at a dinner-dance in the Commercial Club, San Jose, Oct. 15. The officers are Chester Hershey, San Jose, president; A. C. Kingsley, vice president; Byron Miller, secretary-treasurer. John D. Kuster, division manager of the Pacific Gas & Electric Co., in an informal talk commended the league on its accomplishments of the past year.

ENGINEER HONORED

R. F. Felchlin, Fresno engineer and contractor, has been elected president of the San Joaquin Valley Aeronautical Association, an organization seeking the establishment of a municipal aviation field in Fresno.

American Construction Council To Meet in Chicago Nov. 18-21

As part of its Annual Meeting this year, which will take place in Chicago on November 18th to 21st, the American Construction Council will hold a series of conferences of the greatest importance to the construction industry and American business in general.

One of the principal features of the meeting will be a national conference on Better Building. This will be a two days' session and will be attended from all parts of the country and Canada by representatives of the various branches of the industry, including building investment, design, insurance, manufacturing, builders, labor and public officials and all others interested.

This conference is designed to bring out the particular place that each branch of the industry holds in the entire problem of Better Building and its relation to the public. The place of craftsmanship and apprentice training in Better Building will also receive consideration.

Council's Leader

The American Construction Council has been the leader nationally in a number of movements on fundamental questions confronting the construction industry and its relation to the public. It has been particularly vigorous on the problem of Better Building, having inaugurated several years ago a nation-wide campaign to promote better quality of construction and sounder financing in building especially housing. The newspapers of the country have given enthusiastic support to the movement and the active co-operation of many elements of the industry, including loaning institutions, has already been pledged to assist in putting the desired remedies into practice. The Council's General Committee on Better Building, under the Chairmanship of Mr. Rudolph P. Miller of New York, has been preparing literature on this subject for national distribution to prospective home owners, as well as co-operation with loaning institutions and others in getting proper standards set up.

AMERICAN PLAN CONFERENCE

An American Plan-Open Shop Conference will be held in San Diego, Nov. 5-6-7. Members of the San Francisco construction fraternity desiring to attend this conference should communicate with Steve Schenck at the Builders' Exchange as it is planned to secure a special car for the San Francisco delegation.

JACK BURNS TO SEATTLE

Jack C. Burns, who has been employed by the San Francisco branch of the Standard Sanitary Manufacturing Company for several years in promotion and show room work, has been transferred to the Seattle branch, as manager of the new showrooms to be opened in that city about November 1.

In this connection attention is called to the fact that Regional Committees of the Council are being inaugurated in leading construction areas of the country so as to bring together the various branches of the industry in their respective districts to handle questions of common concern. These committees, for example, will help develop measures for better planned, better financed, and better constructed homes in these communities.

Publicity Is Aim

The third day of the Council's meeting will begin with a general session on the reduction of construction peaks and depressions. Aside from general discussion there will be a report of the joint committee of the Council and the American Railway Association on the co-ordination of publicity for a country-wide campaign on greater stabilization of construction.

There will also be a session on local building congresses. Another session will be devoted to the place of commercial arbitration in the construction industry with special reference to its national aspects.

On Saturday, November 21st, there will be a national conference on highway construction, particularly as it relates to better building of highways.

Group Meetings

Group meetings of the constituent elements of the Council for discussion of special problems and the election of representatives to the Council's Board of Governors will be held. A meeting of the Board of Governors and the Executive Committee will precede the opening of the general sessions of the Council on the 18th.

In addition to persons within the industry who will discuss the particular topics, speakers of national prominence will address the general sessions of the Council's meeting.

The concrete benefits of the Council's efforts are becoming so well recognized by the public and the industry itself that these conferences are expected to attract a wide attendance and give further incentive to individuals and organizations toward the further support of its work.

WATERWORKS ASS'N ELECTS

C. V. Jackson of Fresno was elected president of the California Section of the American Water Works Association at the convention recently closed in Santa Cruz. S. B. Morris, Pasadena, was elected vice president, and Paul Magrdstadt, Oakland, secretary-treasurer. San Diego was chosen as the 1926 convention place.

ELECTRIC MANAGER NAMED

Relieving A. D. Goldsworthy, who is confined to his home with a nervous breakdown, Walter Cramer was appointed by the Alameda city board of public utilities to become acting manager of the municipal electric light department business office and secretary of the board.

Lumber—Great Industry Runs Full Blast—Breeds Prosperity—Enjoys None

(By Wilson Compton, Secretary-Manager, National Lumber Manufacturers Ass'n.)

Perhaps the most baffling economic group riddle of the day is propounded in the question, What is the matter with the lumber industry?

The condition that inspires the question is briefly this: An industry with an investment of eight to ten billions of dollars, directly employing nearly a million persons, ranking near the top of American industries in the value of its product, producing an indispensable and universally known and used commodity from a limited and decreasing supply of raw material—the forests—is unprosperous though busy. Foundation of general prosperity in thousands of communities and whole regions, paying high wages, consuming enormous quantities of equipment and supplies, the chief manufacturing contributor to the revenues of the railways, an important factor in the cargoes of foreign and coast-wise shipping; providing 75 per cent of the annual new housing of the American people, touching their daily lives in a thousand useful ways; contributing essential material to practically every factory in the land, the lumber industry receives little or no manufacturing profit.

As owners of timber which is enhancing in value many lumbermen find themselves personally prosperous, but as industrial producers most of their manufacturing operations are continuously in or near the red ink.

As a generalization covering the whole country this may be somewhat of an exaggeration, but for the newer lumbering regions it is conservative.

For example, in the Douglas fir region of the West Coast, in 1924, the mills took the virgin timber from more than 200,000 acres of land, produced over eight billion feet of lumber therefrom and sustained an aggregate net loss of about \$4,000,000. Yet in 1924 the public's consumption of lumber was the greatest, with a single exception, during the past ten years! Material sufficient for the housing of 2,525,000 families—if it were all so applied—was turned out from mills humming with activity. And yet the producers lost \$4,000,000!

This is more than the selfish problem of a single industrial group. It is a national problem, one that concerns all the people. The nation is confronted by an impending strait of one of the greatest, if not the greatest, of its natural resources; and yet production proceeds in such volume that the product can be disposed of only at ruinous prices. The position is truly tragic. Theoretically, on sterile grounds of basic supply and demand, the lumber industry is more fortunately placed than any other great industry, and yet in practice it derives no advantage therefrom. Far from deriving any selling advantage from its natural monopoly of a declining supply of raw material, the lumber industry finds itself virtually without voice in determining prices with some sort of relation to production costs. On the contrary, it actually finds that the enhancing value of the natural asset distinctly handicaps it.

The world is doubtless at the beginning of a long swing of declining prices, but the lumber industry, unlike

many others, faces that period with certainty of steadily decreasing volume and increasing prices of its raw material. Lumber has an attributive for many of its uses, but for others it is in competition with standard building materials and new substitutes. To hold such markets it must make a competitive price, and yet it is confronted with an inevitable increase in the cost of its material. In common with other industries its manufacturing costs will decrease during the downward phase of the price cycle, but not enough to offset increasing stumpage prices, except in those species of timber whose ultimate appreciation of stumpage values has already accrued. Original southern pine stumpage now averages \$12, and ranges from \$10 to \$15 a thousand feet. Logging and manufacturing costs proper are from \$12 to \$15 a thousand. The stumpage is already nearly 50 per cent of the total cost of production. In virgin northern pine manufacture the stumpage ratio is about 65 per cent; in hardwoods from 15 per cent in the South to 30 per cent in the Lake States and the Appalachians. In the comparatively new Douglas fir region of Washington and Oregon the stumpage is worth from \$4 to \$5, while the logging and manufacturing costs are from \$16 to \$20 a thousand.

It is chiefly because of advancing stumpage prices that lumber has increased in price of recent years more rapidly than the general commodity index. Within the last twenty-five years the average mill price of lumber has advanced 75 per cent; and in relation to the general commodity price level, between 40 and 50 per cent. None of this advance (omitting such an exceptional year as that of 1920 with its runaway market, for which cruel reprisal was taken the following year) has contributed to manufacturing benefit. Most of it merely reflects the increased price of stumpage; the rest the increased cost of logging, as the remaining timber becomes more and more difficult to extract. As a rule lumber manufacturers who own timber have been selling their stumpage in the form of lumber and making money on their stumpage investment, but have frequently, if not usually, taken a loss on their manufacturing operations. The plight of the large mill without stumpage has been a hard one, and that perhaps explains why there are so few of them.

So far have operations been sustained by stumpage realization that in 1924 the average mill realization on lumber fell short of the average replacement value of the stumpage alone. Translated into terms of another industry this is the situation the steel manufacturers would be in if they drove their blast furnaces and rolling mills to capacity at a loss; but were unable to endure it because of the enhancing values of their ore deposits.

Timber investment and lumber manufacturing plants are two separate forms of capital, and each should stand on its own bottom. Considering the tremendous fire risk (without insurance) heavy and unjust taxation, interest, and the strain involved in holding stumpage through years of dis-

couragement and dullness, stumpage investment or speculation is entitled to its reward just as much as the capital invested in mills is entitled to a fair return. To put the burden of both on the stumpage creates a most unhealthy condition. In the long run this condition will correct itself, for stumpage costs and stumpage values will tend to the same level and there will be no margin of speculative profit in the stumpage to speculate the mill. The latter must then pay its way or shut down. But in the long meantime the irresistible tendency of an uncontrolled industry continually operating under such conditions will be to overcrowd the market, as a means of realizing on stumpage investments, rather than manufacturing profits. This means continued over-depletion of the forests and demoralization of a great basic manufacturing industry, in the face of a not distant timber shortage.

Manifestly, it is to the benefit of the timber owning and lumber manufacturing groups as well as to that of the general public to put lumber manufacturing on a sound economic basis. Otherwise our virgin timber will be prematurely exhausted, stumpage investments will receive less than their earned reward and manufacturing investments none. Unless lumber manufacturing can be made profitable the owners of timber must continue to market it with undue haste, so largely are standing timber and mills in the same hands.

The problem of the industry thus becomes one of intelligent group control. But how? There are 30,000 sawmills, great and small—mostly small—in the United States. Not more than 3,000 are members of the important regional associations of manufacturers. Most of the rest could not responsibly qualify for membership, even if they could be successfully canvassed. But even if all were to be included in the industry's associations, there would remain insuperable obstacles to rational control in the anti-trust laws, even in view of the more recent liberal interpretations of those laws by the courts. Fortunately, although they do have a depressive effect on prices, the small mills, great as is the total volume of their production, do not contribute importantly to the central lumber markets of the country, where prices are determined in the main. If the larger mills could be definitely placed on a plane of adjusting production to the volume of consumption realizable at fair prices the price problem would be solved, and lumber manufacturing would stand freely on its own feet without stumpage support.

Supplementing what the associations can lawfully do in the way of the collection and dissemination of statistical and other information relating to the interplay of supply and demand, thus equipping the industry for intelligent bargaining, there must be greater centralization of the industry's merchandising operations. In the present rush to realize on stumpage—often enforced by confiscatory taxation of standing timber—lumber is largely merchandised by blindly dumping it on the market. It is produced without buying orders and shipped without de-

mand. The marginal consumer generally makes the price. Transit cars and transit cargoes perpetually flood and depress the great markets, and there has arisen a docile acceptance of the buyer's price. The remedies are to be found finally only in consolidation of ownership and in central selling agencies. There are now too many competing sellers for the good of the market and of the industry. Consolidation of ownership and the financial reinforcement that would follow would make for economy in "overhead," manufacturing and distribution and create powerful leadership units that would have an exemplary effect on the whole industry. The rational price policies that these leaders would strive for would be imitated by the lesser units.

The average mill ownership is not financially strong enough or inherently capable of maintaining a large and aggressive selling organization. The middlemen through whom it operates are apt to be buying rather than selling agents, price depressors instead of price elevators. Barring consolidation, salvation of this type of producers rests in the establishment of common selling agencies.

Nothing like selling monopoly is contemplated or is possible. After all feasible consolidation and centralization of selling is effected there would still remain so many competing units, regions and species of lumber that extinction would be impossible, though stabilization, intelligent direction and a generally beneficial strengthening of the selling position would ensue. Nothing in this can be construed as contrary to public policy. The consumer at present pays dearly for his usual buying advantage in those occasional years when the tables are turned and lumber prices skyrocket in an attempt to make up for past losses. Chronic mill losses tend to the waste of forest material, which is left in the woods or goes to the burner, because it can be handled only at the cost of a further widening of the margin between manufacturing costs and mill prices. Also, as pointed out above, the tendency is to force consumption and thus draw too heavily on the forests. It is certainly not to the public advantage to precipitate the exhaustion of the original forests.

The old saying is that it is darkest just before dawn. Certainly the lumber industry must be at the darkest period when it has gone through two five-billion dollar building and record output years without profit, generally speaking. The intolerableness of the present status must force resort to the only remedies.

PURCHASES AGENCY RIGHTS

R. L. Sessions, chemical engineer, assistant superintendent of the York Metal and Alloy Company, York, Penn., has recently purchase the California state sales right of the Monolith Paint Company of America, New Jersey, U. S. A.

Monolith Paint, a product of recent scientific discovery, is the work of E. C. Gaskill, a national authority on the electric furnace, the manufacture of zinc sulphide and a consulting chemical engineer. Both R. L. Sessions and E. C. Gaskill have spent several years in research in the manufacture of paint pigments. Sessions states: "Monolith paint has several highly desirable features foremost of which is its greater hiding power. It is therefore a one-coat paint and so allows the house to be painted twice as often at the same cost. This keeps the house constantly beautiful and in a saleable condition."

September Construction Totals

Building permits calling for a total of \$12,053,161 in construction costs were issued during September in 82 principal cities of the seven Pacific Coast States comprised in the monthly building survey of S. W. Straus & Co. This shows a reduction of 3% from the August figure noticeable in all States except Washington and Utah. All States excepting California, Arizona and Idaho, however, show substantial increases over September of last year.

Following are the official September 1925, construction figures reported by building department executives in the cities comprised in the Pacific Coast Section:

	September, 1925	September, 1924	August, 1925
CALIFORNIA:			
Alameda	\$ 2,143,509	\$ 128,737	\$ 138,994

TRADE NOTES

Representing an investment of approximately \$100,000 and doubling of the size of its yards and stocks, the C. S. Pierce Lumber Company of Fresno will move from the present location at H and Mariposa Streets to a site in H Street immediately south of Belmont Avenue, that city. The removal will take place about January 1, according to Frank F. Minard, vice-president and general manager of the company.

Glenn A. Gibbs, former Northern California representative for the Buttress Manufacturing Company, has been appointed sales representative of the United States Gypsum Company. Gibbs will cover the East Bay district and adjoining territory. The U. S. Gypsum Company manufactures Red Top Plaster, Sheetrock and other gypsum products.

The John D. Spreckels Building Company of San Francisco, capitalized at \$1,500,000, has filed articles of incorporation with the Secretary of State at Sacramento. Directors of the company are: Roland C. Forester of San Anselmo, Robert Beale and C. C. Kreis, both of San Francisco.

C. L. Mills and J. C. Stewart, heretofore operating under the trade name of Mills-Stewart Company, 532 Emerson Avenue, Palo Alto, announce dissolution of partnership by mutual consent. J. C. Stewart will continue the business operating under the name of General Construction Company.

The Builders' Service & Supply Company of Berkeley has been incorporated with a capital stock of \$300,000. Directors are: Chas. M. Richards, M. D., and A. C. Butcher, Clarence B. Argall, Claud R. Argall and Joseph R. H. Jacoby.

E. A. O'Connell, 1278 E-14th St., Oakland, and Rae M. Bradhoff of the same address, will operate in the East Bay district under the trade name of Bradhoff Roofing Company.

G. Massagli & Co., concrete construction contractors, announce the removal of their offices and plant to 128 Parker Ave., San Francisco.

Frederickson & Watson, general contractors, announce the removal of their offices to 225-226 Builders' Exchange Building, Oakland.

FAIR EXCHANGE

A well-known contractor went into the tailor's, donned his new suit, and left his old one for repairs. Then he sought a cafe and refreshed the inner man, but as he reached in his pocket for the money to settle his check, he realized that he had neglected to transfer both purse and watch when he left his suit. As he hesitated, somewhat embarrassed, he saw a bill on the floor at his feet. Seizing it thankfully, he stepped to the cashier's desk and presented both check and money.

"That was a two-dollar bill," he explained when he counted his change. "I know it," said the cashier, with a toss of her blond head. "I'm dividing with you. I saw it first."

Final Details Completed For All-Western Road Show Next Month

With completion of the final details and the addition to the ground area of 5000 extra square feet, all is in readiness for the first All-Western Road Show, to be held in San Francisco from November 9 to 14.

Five huge tents on the Marina, made famous during the Panama Pacific Exposition, will be used to house the various exhibits. More than 25 acres of land for the show and some 140,000 square feet under canvas is the total floor area. All available space has been sold and the general committee has voiced its regrets for its inability to accommodate the many "late comers."

The show will be the largest of its kind in the world, and added to this will be the great motor truck and bus show which also will be the largest in the world.

When P. H. Curtis, executive secretary, outlined the plans for the All-Western Road Show at the first meeting of the Western Construction Equipment Distributors held several months ago, he stated that he was certain and could guarantee that at least 30,000 square feet would be taken by exhibitors. The popularity and success of the venture is assured by the latest figures which show a grand total of 140,000 square feet of ground space under canvas. The Bureau of Public Roads of the United States Government is taking 3000 square feet for working models and demonstrations which are the results of special research in their testing laboratories on problems particularly bearing on western conditions.

A demonstration of Federal Aid will prevail during the big show and convention week. Federal Aid will be the topic of conversation at all conven-

WINTER CONSTRUCTION IS ON INCREASE, SURVEY SHOWS

The building season is gradually being lengthened as the result of a drive undertaken by the Construction Industries in co-operation with the Department of Commerce. This fact has been established through a survey made by the Division of Building and Housing of the Department at the direction of Secretary Hoover to determine what results were being obtained. Reports from contractors in sixteen large cities show that payrolls and material purchases were relatively larger in the winter months of 1924 than in those of 1923. The 1923 figures in turn showed an increase over 1922. Payrolls and material bills are measures of building activity which follow actual work very closely.

The large number of contractors who answered the Department's inquiry gave figures showing for each month the percentage of the year's total. Practically all replies had the same trend, making an average a fair statement of conditions as given. Changes in general business conditions and a difference in the weather undoubtedly had some share in the result. But making allowance for such factors, a distinct improvement in the relative amount of winter building is apparent.

There are already favorable indications for the coming winter. The August figures for contracts awarded for all classes of construction have proved to be the highest ever known. Many of the operations represented by

tions and at the grand wind-up during the Friday night banquet this sentiment will be expressed and contain the debt of the West on the subject.

All roads will lead to San Francisco during the week of November 9 and it is expected that 10,000 actual builders of roads, streets, bridges, dams and allied industries from the Rocky Mountains, Pacific Northwest and Coast States will be present when the gavel, which will officially open the big event, is wielded. Here is the way the week has been divided for the conventions which will be held:

November 9—Western Association of State Highway Officials.

November 10—Western Construction Equipment Distributors.

November 11—Western States County Officials Association.

November 12—Western Contractors.

November 13—Pacific Coast Sand & Gravel Association.

A banquet at the Hotel Fairmont will bring the show to an appropriate end. Harvey M. Toy, chairman of the California Highway Commission, will be one of the principal speakers, representing Governor Friend W. Richardson, and it is expected that the governors of two other states will be present as speakers.

The conventions will be housed in a frame building on the show grounds large enough to hold 2500 people at one time. Separate programs have been arranged for each convention and each will have a speaker of national prominence.

Special trains are coming from every point in the West. Enthusiasm is running high and from all indications the great event will be the largest of its kind ever held in the West.

these contracts will undoubtedly be carried over into the cold weather.

All groups in the building industry are trying earnestly to bring about a more equal distribution of work throughout the year. Their efforts are bringing results. More and more people are becoming convinced that winter construction is both practical and economical. The growth of this belief is certain to result in steadier employment and more efficient construction service.

FOALE, SACRAMENTO ARCHITECT, LOSES SUIT

The suit of F. A. S. Foale, Sacramento architect, against Hart Brothers, Sacramento luncheon proprietors, for approximately \$19,000 alleged due on a contract, was disposed of by Superior Judge Malcolm Glenn when he found for the defendants.

Foale complained that Hart Brothers employed him to draft plans suitable for a building of three, five or twelve stories, to be erected on a lot adjoining the Weinstein-Lubin building on K street, Sacramento. He charged that after he had drawn the plans Hart Brothers changed their intentions and instead of erecting the proposed building, employed another architect and remodeled the structure on Tenth Street now occupied by them.

The plaintiff admitted having been paid approximately \$1900 for the plans, but sued for the estimated amount he would have earned had the original plans been carried through.

The suit had been heard on various days in Glenn's court during the last few weeks.

APARTMENTS

Owner Taking Sub-Figures.
APARTMENTS Cost, each \$50,000
SAN FRANCISCO, S Broadway near Octavia.
 Two three-story frame and stucco apt. buildings.
Owner—Strand & Strand, 163 Parnassus Ave., S. F.
Architect—H. C. Baumann, 251 Kearny St., S. F.

Owner Taking Sub-Figures.
APARTMENTS Cost, \$200,000
SAN FRANCISCO, NE Buchanan and Green Sts.
 Six-story and basement brick and steel frame (33) apartments of 1 to 5 rooms.
Owner—Chas. A. Johnson, 3260 Gough St., S. F.
Architect—H. C. Baumann, 251 Kearny St., San Francisco.
 Bids are in for the steel, which will be awarded shortly.

Plans Being Figured
APARTMENTS Cost, \$18,500
SAN FRANCISCO, Broderick Street.
 Two-story and basement brick veneer apartment building and garage.
Owner—Withheld.
Architect—O. H. Thayer, 110 Sutter St., San Francisco.
 Bids are being taken for plumbing, heating, electrical work, plastering, painting and the general work.

Owner Taking Sub-Figures.
APARTMENTS Cost, \$120,000
OAKLAND, Alameda Co., Cal, Grove and 55th Sts., corner.
 Two three-story and basement frame and brick veneer apt. bldgs.
Owner—V. Gulmes, 323 Chattanooga, San Francisco.
Architect—H. C. Baumann, 251 Kearny St., S. F.

Plans Being Prepared.
APT. & STORE BLDG. Cost, \$30,000
OAKLAND, Alameda Co., Cal, Grove and 55th Sts., corner.
 Two-story frame and stucco apartment and store bldg. (7 stores and 8 apartments).
Owner—H. C. Schlichting.
Architect—Geo. O'Brien, Bacon Bldg., Oakland.
 Construction will not be started until February of 1926.

Plans Being Prepared—To Be Done By Day's Work.
APARTMENTS Cost each \$60,000
SAN FRANCISCO, S Green bet. Van Ness Ave. and Franklin.
 Three 3-story frame, stucco and brick veneer apt. houses.

Owner—Chas. Johnson, 3260 Gough St., San Francisco.
Architect—H. C. Baumann, 251 Kearny St., S. F.

Additional Contracts Awarded
APARTMENTS Cost, \$125,000
SAN FRANCISCO, W Van Ness Ave. 55 N Green Street.
 Six-story and basement reinforced concrete (Class C) apartment house (41 2-room apartments).

Owner—California Bldg. & Finance Co., 319 De Young Bldg., San Francisco.
Architect—J. C. Hladik, Monadnock Bldg., San Francisco.

Supt. of Construction—C. F. Parker 251 Kearny Street

Plumbing & heating—H. Ernst, 551 Hayes St., S. F.

Painting—D. Zelinsky, 165 Grove St., San Francisco.

Roofing—Malott & Peterson, 2412 Harrison St., S. F.

Electric Work—Wright & Goodwin.

Incinerators—Kerner Incinerator Co., Phelan Bldg., S. F.

As previously reported:

Plastering—Awarded to J. Martinelli, 180 Jessie Street.

Concrete and masonry—Carpenter Work Mission Concrete Co., 125 Kissling St., S. F.

Bids being received on other portions of work.

Contract Awarded.
APARTMENTS Cost, \$17,000
BERKELEY, Alameda Co., Cal. No. 2331 San Pablo Ave.
 Two-story frame apartments and stores.

Owner—C. L. Padden, 1718 E-12th St., Oakland.

Architect—None.

Contractor—J. A. Lloyd, 617 36th St., Oakland.

ALHAMBRA, L. A. Co., Cal.—**J. J. Sluviski** and **C. H. Welland**, 2524 W Main St., Alhambra, are taking bids for 2-story store and apt. bldg. with 6 stores and 8 single apts., on cor. Main St. and Primrose Ave., Alhambra, for self; plans by **F. D. Harrington**, 6176 Pasadena Ave., Los Angeles; 50x116 ft., brick walls, rug. br. facing, terra cotta trim, cem. and hdwd. flrs., pine trim, wall beds, plate glass, copper fronts, iron window bars, skylights, tile and comp. rt., wall furnace, steel beams.

Craftsmanship is the priceless ingredient sought by every architect for his client. It is more than an ideal with us and with the workmen who are a part of us—it is an obligation and a tradition over forty years old.

That is why you will find Quandt craftsmen wherever fine work and quality workmanship are insisted upon.

Co-operation for the economy of quality.

BONDS

ROSEVILLE, Placer Co., Cal.—Election will be held Oct. 23 in Roseville Union High School District to vote bonds of \$30,000 to finance erection of new building in connection with main high school.

BERRYESSA, Santa Clara Co., Cal.—Pala Grammar School District votes bonds of \$35,000 to finance erection of 4-classroom school.

YUBA CITY, Yuba Co., Cal.—Election will be held Nov. 7 in Wilson Grammar School District to vote bonds of \$1500 to finance school improvements. Trustees of district are: Chas. Johnson, Gertruda Queen and C. H. Winslow.

SAN BERNARDINO, Cal.—City of San Bernardino affirmed \$785,000 bond issue at election October 13, proceeds of which will be used to finance erection of 11 new elementary schools and additions, and 3 new junior high schools and additions to San Bernardino high school, Sturges junior high school, and Highland junior high school. Plans for additions to Highland and Arrowhead schools and gymnasium at Sturges junior high school are practically finished and bids for this work will be called for within a few days. **Geo. H. Seager**, president, San Bernardino Board of Education.

MONROVIA, Los Angeles Co., Cal.—**Dr. A. L. Smith**, president of Monrovia School Board, announces that bond election has been called for Nov. 20, at which time it is proposed to vote \$150,000 to finance erection of new grammar school and purchase additional school sites.

CHURCHES

LOS ANGELES, Cal.—**Archts. Edelman & Barnett**, 726 H. W. Hellman Bldg., and **Architects S. Thelen Norton and Frederic H. Wallis**, 1210 Financial Center Bldg., associated, have completed plans and are taking bids from selected list of contractors for erecting Class A synagogue at the northeast corner of Wilshire and Hobart Blvds. for Congregation B'nai Brith. Bids are being taken separately on general contract, plumbing, heating and ventilating and electric wiring, and are to be received on Nov. 25. Building will cost about \$1,000,000.

and subcontractors by owner.

THE STERNMAN family live.
IN EXCLUSIVE St. Francis Wood.
A "SUBURB" of Westwood Park.
WHERE SANDY Pratt, producer.
OF CLEAN, sharp sand.
AND HARD, crushed rock.
IS "MAYOR."
THE STERNMAN children decided.
TO GIVE a circus.
AND AFTER days and days.
OF EXTENSIVE preparation.
THE CIRCUS was ready.
WITH AN advance sale.
OF \$2.20 (5c per ticket).
BUT EACH ticket
GAVE THE holder a glass.
OF LEMONADE.
OR AN all-day sucker.
THE TENTS (old carpets and sheets).
WERE UP.
BOXES AND barrels for seats.
WERE IN place.
AND THE big menagerie.
CONSISTING of an Airedale.
AND ONE strange bull dog.

HAD BEEN forgotten.
BY THE vast audience.
OF TWENTY children.
WHO WERE in the "main tent."
WATCHING THE star act.
WHEN THE Airedale.
AND THE bull dog.
STARTED TO fight.
AND THE circus was over.
AND NO one stayed.
FOR THE "big concert."
THAT WAS to follow.
IMMEDIATELY after the main show
"I THANK you."

Sandy Pratt, producer of sand, rock
and gravel at Sacramento, Marysville,
Prattrock (near Folsom), and Prattco
(Monterey County)—Central office, San
Francisco, predicts that the above
circus would have been a paying busi-
ness if it hadn't "gone to the dogs."

WHARVES & DOCKS

SAN DIEGO, Cal.—G. D. Barclay awarded contr. by Julian Petroleum Corp. for const. of a 2400-ft. pier with 30x50 ft. deep water landing. Pier will be used exclusively for pipe lines in connection with company's local refinery.

MISCELLANEOUS BUILDING CONSTRUCTION

Contract Awarded
OFFICE, SHED & PCY. Cost, \$21,000
OAKLAND, N.W. 9th Ave & Ford St.
Two-story office and shed and one-story factory.
Owner—Oakland Mfg. Co., 2nd & Castro Sts., Oakland.
Architect—None.
Contractor—Kenworth Ingler, 5533 Morse Dr., Oakland.

SAN FRANCISCO.—Until Nov. 4, 3 p. m., bid will be received by Board of Public Works to erect ambulance shelter at Mission Emergency Hospital, 22nd and Potrero Avenue; est. cost \$5,000. Plans obtainable from Bureau of Architecture, 2nd floor, City Hall.

SAN PEDRO, L. A. Co., Cal.—Hercules Gasoline Co., 2411 W 30th St., R. M. Hall, engr., will erect rect. conc. firewall 300 ft. sq., 25 ft. high and 3 ft. thick at base tapering to 6 in. at top in rear of berth 235, Terminal Island San Pedro, for self; \$105,756.

MARYSVILLE, Yuba Co., City council is conferring with several architects regarding plans for proposed natatorium building; estimated cost, \$50,000. It is proposed to vote bonds to finance construction.

SACRAMENTO, Cal.—Directors of State Fair request State Dept. of Pub. Works, Division of Architecture, to revise plans for proposed grand stand to seat approx. 4700 persons and estimated to cost \$200,000. The original plans called for a stand to seat 4700 people that would be several hundred feet long, spreading out for a considerable distance on both sides of the finish line on the race track. Under the new plan the board favors, the stand would be constructed more compact, while still providing for 4700 spectators, and it would be so built that a second deck could be erected if found to be needed.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larson Advance Construction Reports, 815 Mission Street, San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

D-1799—Pawtucket, R. I. Manufacturers of washable and reversible rugs ranging in size from 24x36 inches to 36x72 inches in three quantities and varied colors, desires to appoint a jobber or salesman to handle the sale of these rugs in San Francisco and vicinity.

D-1801—Dallas, Texas. Manufacturers representatives covering entire Southwest and also twelve states in Mexico, wish to communicate with California manufacturers desirous of expanding the sale of their products in that territory.

D-1802—San Francisco, Cal. Manufacturers' representatives going East to meet mid-Atlantic states and desirous of taking on additional lines selling to electrical and hardware trades.

D-1803—Rock Island, Ill. Concerned with manufacturing dish washing machine wishes to appoint a suitable representative to handle the sale of their product in this territory.

D-1805—San Francisco, Cal. Local selling organization wants product of

local and Eastern manufacturers to sell. Will handle output of small factories.

9012—Hermosillo, Son., Mexico. Firm wishes to communicate with San Francisco house selling apparatus for making ice cream and equipment for an ice cream parlor. Requests catalogs.

9013—Nogales, Ver., Mexico. Party wishes to secure a scientific apparatus to locate hidden minerals and metals, as well as their corresponding metalurgical treatises.

9015—Sancti Spiritus, Cuba. Manufacturers' representatives wish to secure a line of marine motors for crude oil combustion, from 6 to 20 h. p.

CALIFORNIA'S LUMBER SURPLUS IS FORTY MILLION FEET

California is the leading State in gross consumption of lumber, yet manages to distribute about 40,000,000 feet more than it consumes according to the lumber industry census for 1923 just compiled by the Census Bureau. California ranks fifth in the amount of lumber produced, the leaders being Washington, Oregon, Louisiana and Mississippi.

Washington ships nearly five times as much lumber as it uses, and Oregon four times its consumption.

The total production of lumber in 1923 is placed by the Census Bureau at 37,165,505,000, the largest reported production since 1916. It was exceeded only during the period between 1906 and 1916, so far as records reveal.

The statistics show that the people of the North Pacific Coast region use more lumber than those of any other section, every man, woman and child requiring 935 feet of lumber each year, or nearly 100 10-foot 12-inch boards.

On the whole, the American people are using more lumber than at any time since 1919, the per capita consumption for 1923 being placed at 310 board feet as against less than 250 feet for 1921.

WESTERN ENGINEERING

Progress in engineering in the West particularly has been due to inventiveness and initiative of men whose vision has been enlarged and whose capacities have been increased by the study and application of mechanical engineering, according to Professor C. L. Cory, dean of the College of Engineering in the feature article of the California Engineer, University of California student publication, which appears today for the first time this term on the Berkeley campus.

"Today science is demanding of industry the maximum use of brains in governmental, financial, economic and engineering problems," writes Dean Cory. "It is impossible for one to do until he knows. In relation to the great problems of today, however, it is infinitely more important to know how to do than merely to know."

As an example of the advancing marks born of engineering genius, Cory cites the recently laying between New York and Chicago of the longest telephone cable in the world at a cost when complete of \$25,000,000.

LADIES DAY FIELD

"Ladies Day," an annual event with the organization, was observed Oct. 20 by the Sacramento section of the American Society of Engineers, at the section's weekly luncheon in the Hotel Sacramento. A special program for the entertainment of wives of members was presented and addresses were given by Mrs. C. S. Pope and H. D. Hayward, assistant engineer with the Sacramento Municipal Utility district. Mrs. Pope spoke on the record of the engineering service and Hayward outlined the work of the utility district. Sixty-six persons attended.

Official Proposals

NOTICE TO CONTRACTORS

(Hospital Buildings—Mare Island)

Sealed proposals indorsed "Proposals for Hospital Buildings, Mare Island, Calif., Specification No. 5105," will be received at the bureau of yards and docks, Navy Department, Washington, until 11 o'clock A. M., on the 11th day, there publicly opened for four buildings at the navy yard (hospital), Mare Island, Calif. Part I. General construction, including concrete piles, plain and reinforced concrete, artificial stone, brick and hollow tile work, steel and iron work, roofing and sheet metal work, steel sash, succo, composition flooring, metal furring and lathing, plastering, marble, slate and tile work, carpentry and joinery, dumb-waiters, hardware, painting and glazing. Part II. Plumbing work including inside soil, vent, drain and hot and cold water lines, storm water drainage, interior standpipe systems and valves, fittings and plumbing fixtures within the buildings. Part III. Heating and steam distributing systems within buildings, including hot water converters, hot water heaters and pipe, fittings, drip traps and valves. Part IV. Electric lighting and power systems and telephone conduits within each building, nurses' call system and special conduits and service connections to outside distributing systems. Specification No. 5105 and accompanying drawings may be obtained on application to the bureau or to the commandant, navy yard, Mare Island, Calif. Deposits of checks or postal money orders payable to the chief of the bureau of yards and docks are required as security for the safe return of the drawings and specifications. Deposits shall be in the following amounts: Part I, \$50; Part II, \$15; Part III, \$15; Part IV, \$15, and complete (all parts), \$75. L. E. GREGORY, Chief of Bureau.

NOTICE TO CONTRACTORS

(Title Work, Etc.—Alameda County Hospital)

Office of the Clerk of the Board of Supervisors of Alameda County, Calif. Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County at his office until Monday, November 9, 1925, at 10:30 o'clock A. M. (the day when said bids will be opened and said contract awarded) for the erection and completion of certain supplementary tiling, etc., for Highland Hospital of Alameda County, situated at 14th Avenue and Vallecito Place in the City of Oakland, County of Alameda, State of California.

Complete specifications for said work are on file in the office of the County Clerk in the Hall of Records Building, City of Oakland, California, where copies may be obtained by depositing with the County Clerk, the sum of Twenty-five (\$25.00) Dollars. Contractors will be restricted as to the length of time they may retain said specifications to twelve (12) days.

Contractors failing to return said specifications within said time limit will forfeit their deposit to the said County of Alameda. The entire amount of the deposit will be returned to said depositors returning said specifications in good condition within said time limit.

Each bid must be accompanied by a check for at least ten (10%) per cent of the total amount of said bid proposal, certified by some responsible bank and made payable to Geo. E. Gross, Clerk of the Board, to be forfeited to the County of Alameda, as agreed and liquidated damages should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board,

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

for the faithful performance of the contract.

The Board reserves the right to reject any and all bids.

Dated: October 13, 1925.

Geo. E. GROSS, Clerk of the Board of Supervisors of Alameda County, California.

NOTICE TO CONTRACTORS

(Parade Ground Surfacing—San Diego)

Sealed proposals, indorsed "Proposals for Parade Ground, San Diego, Calif., Specification No. 5162," will be received at the Bureau of Yards and Docks, Navy Department, Washington, D. C., until 11 o'clock A. M., November 4, 1925, and then and there publicly opened, for surfacing extension to parade ground with rock and asphaltic oils at the Naval Operating Base (Training Station), San Diego, Calif. Drawing and specification No. 5162 may be obtained upon application to the Bureau or to the Public Works Officer, U. S. N., San Diego, Calif. Deposit of a check or postal money order for \$10, payable to the Chief of the Bureau of Yards and Docks, is required as security for the safe return of the drawing and specifications. L. E. GREGORY, Chief of Bureau, September 23, 1925.

NOTICE TO BIDDERS

JOINT STORAGE WORKS

(The Oakdale Irrigation District and the South San Joaquin Irrigation District, Stanislaus and San Joaquin Counties, Calif.)

Notice is hereby given that sealed proposals will be received at the office of the South San Joaquin Irrigation District in Manteca, California, until eleven (11) o'clock A. M., Wednesday, November 11th, 1925, for the furnishing of traveling crane, motor, iron pipe, electric fixtures and other equipment for the Melones Dam.

Plans and specifications for said material can be seen at the office of the Oakdale Irrigation District at Oakdale, California, and at the office of the South San Joaquin Irrigation District at Manteca, California, and copies thereof will be furnished upon application to the Secretary of the Board of Directors of either district when accompanied by a deposit of

\$20.00 to be repaid to bidder and to all others upon the return of the plans and specifications in good and acceptable condition not later than the day set for opening bids.

The Boards of Directors of said districts will be in session at the office of the South San Joaquin Irrigation District in Manteca, California, at eleven (11) o'clock A. M., on the 11th day of November, 1925, and will open all proposals received, in response to this notice.

The contract will be let to the lowest responsible bidder, but the Boards reserve the right to reject any and all bids.

Bidders may submit bids upon any or all of the schedules, but no schedule will be subdivided.

Each proposal must be accompanied by a certified check for ten (10) per cent of the amount of the schedule bid upon, payable to the order of South San Joaquin Irrigation District as a guarantee that the bidder will, if successful, execute a satisfactory contract and furnish a bond in the sum of not less than twenty-five (25) per cent of the amount of his bid for the faithful performance of the work in accordance with the plans and specifications; said bond to be approved by said Boards.

The proposal forms bound with the specifications must be properly filled out by the bidder and the plans and specifications, including the proposal, must be submitted intact with the bid in a sealed envelope addressed to the Boards of Directors of the South San Joaquin and Oakdale Irrigation Districts, Manteca, California, and marked to indicate that it is a proposal for traveling crane, motor and other equipment for the Melones Dam.

Done in pursuance of an order of the Boards of Directors of the Oakdale and of the South San Joaquin Irrigation Districts this 7th day of October, 1925.

M. P. KEARNEY, Secretary of the Board of Directors of the Oakdale Irrigation District.

S. L. STEELE, Secretary of the Board of Directors of the South San Joaquin Irrigation District.

STATE OF CALIFORNIA

CALIFORNIA HIGHWAY COMMISSION

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M., on November 16, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Santa Barbara County, between Carpinteria and 2 miles southeast (V-S-B-2-H), about two and one-tenth (2.1) miles in length to be surfaced with asphalt concrete and portions widened with Portland cement concrete.

San Bernardino County, between Hicks and Daguerre (VII-S-B-31-F and 53-E), about eighteen and five-tenths (18.5) miles in length; to be graded and surfaced with crushed gravel or stone.

Kern and Inyo Counties, between Ricardo and Five Mile Canyon (IX-Kern-23-D, E & G), about thirty-six and seven-tenths (36.7) miles in length, to be graded.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. NOTICE TO CONTRACTORS

(Oroville-Wyandotte Irrigation Dist.)

Sealed bids will be received by the Board of Directors of the Oroville-Wyandotte Irrigation District at the office of the Board, Oroville, California, until 2 o'clock P. M., November 4, 1925, for the following work:

Reconstruction of Hansonville-Bangor-Sunny Slope Ditch in the vicinity of Bangor, California, including:

15,000 lineal feet of ditch deepening;
40 cubic yards of rubble wall.
Contract will be let to the lowest responsible bidder.

Plans and specifications can be seen at the office of the Board, Oroville, California.

W. J. MONRO,

Secretary, Oroville-Wyandotte Irrigation District.

NOTICE TO BIDDERS

(City of Eureka, Cal.—C. I. Pipe)

Sealed proposals or Bids are hereby invited by the City of Eureka for furnishing four thousand five hundred lineal feet (4500) of eight inch (8 in.) Class "B" cast iron pipe with prepared joints for use by the Eureka Water Department of Eureka F. O. B. Dock, Eureka, California.

Delivery to be made sixty days after award of contract. The said Bids will be received in a sealed envelope marked Bids for eight inch Class "B"

Cast iron pipe, at the office of the Superintendent of Public Works of the City of Eureka, at 524 "D" Street, Eureka, California, up to the hour of 5 p. m., Tuesday, November 3rd, 1925.

Bids will be opened by the City Council of the City of Eureka at 8 o'clock p. m., on the third day of November, 1925; the right is reserved to reject any or all bids.

Dated October 14th, 1925.

JOHN GRIFFITH,
Superintendent of Public Works of the City of Eureka.

STATE OF CALIFORNIA DEPARTMENT OF PUBLIC WORKS DIVISION OF ARCHITECTURE

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the Division of Architecture, 615 Forum Building, Sacramento, Cal., until 2 o'clock p. m., on Oct. 26, 1925, at which time they will be publicly opened and read, for surfacing in accordance with the specifications therefor, to which special reference is made, a road in the State Hospital Farm near Stockton, Calif.

STATE ARCHITECT'S ESTIMATE.
Item 1, 3,360 tons crushed gravel or stone surfacing.

The foregoing quantities are approximate only, being given as a basis for the comparison of bids, and the Department of Public Works does not, expressly or by implication, agree that the actual amount of work will correspond therewith, but reserves the right to increase or decrease the amount of any class or portion of the work, as may be deemed necessary or expedient by the said Division of Architecture.

All bids are to be compared on the basis of the State Architect's estimate of the quantities of work to be done.

Plans may be seen, and forms of proposal, bonds, contract, and specifications may be obtained at the office of the Division of Architecture, Forum Building, Sacramento.

No bid will be received unless it is made on a blank form furnished by the Division of Architecture. The special attention of prospective bidders is called to the "Instructions to Bidders" annexed to the blank form of proposal, for full directions as to bidding, etc. The Department of Public Works, acting by and through the Division of Architecture, reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3 3 4 0

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

WEST COAST NURSERY COMPANY AWARDED CONTRACTS

Walter A. Hoff, landscape engineer, has awarded a contract to the West Coast Nursery Company of San Francisco for a garden court at 2066 Washington street, the project involving a water lily pool, wall fountain, 16 ft. specimen Yew trees, specimen Echinopora, lawns, sprinkler system and other features. The contract price being carried out on a percentage basis, will run in excess of \$10,000.

Other contracts awarded The West Coast Nursery Company include garden improvements for two newly completed apartment buildings at 1940 and 1960 Broadway and for a rock garden, rustic stair and plant at 2411 Green street.

This company also reports an award of contract for development of the Polo Field at San Mateo involving improvements to more than thirty acres at a cost running in the neighborhood of \$30,000.

NEW BUILDINGS NEEDED

New buildings are badly needed to replace the firetraps in which valuable apparatus and records of the University of California are stored. President W. W. Campbell of the University told the Berkeley Chamber of Commerce at its annual dinner. The University hopes to secure money for these necessary structures through a bond issue that is to come before the voters at the fall election next year, when \$6,000,000 is to be asked. Half of this amount would be used in construction of buildings in the campus at Berkeley, and half would be devoted to the starting of the new Southern Branch of the University of California at Los Angeles, where a site has been donated.

Many of the buildings on the Berkeley campus are old, of wooden construction, and offer a constant fire

menace. Their destruction by fire would mean not merely an interruption of the work of the departments they house, but an irreparable loss of materials and records. It is pointed out, too, that they are out of date, and inadequate for the work of the divisions and departments which for lack of suitable quarters are forced to use them.

GRANTED PATENT

The Steel Pipe & Tank Company of Berkeley has awarded a contract to erect four frame and corrugated iron structures in connection with its plant at 1100 Fourth St., Berkeley. The structures will be one-story in height of the following dimensions: 120 by 250 feet; 50 by 180 feet; 50 by 250 feet and 120 by 120 feet. C. A. F. Duffy, general manager of the company, estimates cost to exceed \$25,000.

CLYDE HOISTS and DERRICKS

"Equipped by Clyde" has become a mark of distinction in the construction field. More and more are complete Clyde outfits being purchased. The resulting splendid service justifies the expenditure.

Illustrated here is a Clyde 20-ton guy derrick with a 115 foot boom operated by a Clyde two drum electric hoist. Both are owned and operated by the Phoenix Utility Company on the \$10,000,000 development for the Minnesota Power & Light Co., at Fond du Lac, Minnesota.

The outfit handles all material excavated for a large power house and was one of six similar installations used on the project.

Clyde Electric Hoists are built with all the thoroughness found in any other Clyde unit. They are provided with especially designed motors, automatic mechanical brakes in addition to foot brakes, rugged drum type controllers, semi-steel friction drums, and gears with machine cut teeth. The lever arrangement is designed for easy and instantaneous control.

Additional information given cheerfully.

You'll Take Pride in Your Clyde!

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details — but it's *strong, rugged* — it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank, and Light Duty Hoist.*

**Send Back this
Coupon!**

SITE REPORTED PURCHASED

Duncanson-Harrison Company, engineers and contractors of San Francisco, is reported to have completed negotiations for the purchase of the 6-acre F. S. Lewis site on the Richmond inner harbor at Richmond. The property is now occupied by the Richmond Navigation Company which concern operates a shipping and building material business. The navigation company will continue to operate at the location until next Summer, when, it is reported, the new owners will commence the erection of docks, warehouse and machine shops to house and repair its floating equipment.

OAKLAND'S FIRE LOSSES

Oakland's loss by fire was \$186,000 for the first six months of 1925, according to a report issued by Battalion Chief Frank Kispert, head of the Oakland fire prevention bureau.

This according to Kispert is an unusually low record for a city the size of Oakland.

The cutting fire losses, states Kispert, is due to the rigid enforcement of the city's fire regulations and the co-operation of the city's property owners.

Organized Motorists to Hold Conference on Highway Program

Development of a more business like policy of financing and completing California's state highway system will be furthered at a conference of representatives of the California State Automobile Association and the Automobile Club of Southern California to be held in San Francisco November 6.

H. J. Brunnier, chairman of the State Automobile Association's good roads committee, announces that the two automobile clubs, which have a combined membership of over 160,000 motorists, propose to develop a policy for future state highway procedure that will receive the approval of all interested organizations.

C. C. Cottrell, consulting highway engineer of the Automobile Association, and E. E. East, highway engineer of the Southern Automobile club, have been working on plans and estimates for several weeks. Their preliminary report will be before the joint highway committee of the two organizations at the November meeting in San Francisco, Brunnier says.

Development of a definite program for further progress in highway building that will be acceptable to the entire state and provide for future highway construction at the least possible expense to the taxpayers may take several more months, Brunnier indicated yesterday. The program, when agreed upon, will be placed on the ballot as an initiative measure at the next general election, following conferences with interested organizations throughout the state.

Representatives of the state's two motoring organizations met for preliminary discussion in Los Angeles several weeks ago. The San Francisco conference next month is the second of a series that will be held in formulating a highway construction and financing program. The action of the automobile clubs is the direct result of Governor Richardson's explanation in his disapproval of the gasoline tax bill

in the last session of the Legislature. At that time he voiced the hope that the two great motor clubs of the state would assume the leadership in the formulation of a constructive highway building program that would benefit the entire state.

Growing out of the strenuous fight waged around the proposed increase of the gasoline tax for new highway construction at the last Legislature, definite sentiment has developed in favor of a more business like program for financing and completing the state highway system, Brunnier declared yesterday.

Sixty bills providing for the addition of 1593 miles to the present highway system of 6500 miles were introduced at the last session of the Legislature. Many of these roads were of purely local importance. Only 233 miles of roads were added to the state system, however, when all but eight of the proposed bills were eliminated. Nearly every mile of the approved measures is designed to connect the California highway system with the state roads of adjoining states, or to eliminate missing links in the existing system.

Representing the State Automobile Association at the conference in San Francisco on Nov. 6 will be Chairman Brunnier of the good roads committee, President W. T. Seson, Percy E. Towne, director and general counsel, John R. Graham, director, Senator Arthur H. Breed, chairman of the legislative committee, D. V. Nicholson, assistant secretary and C. C. Cottrell, consulting highway engineer. Representing the Automobile Club of Southern California will be W. L. Valentine, president, Horace G. Miller, vice president, Edward D. Lymann, director, Standish L. Mitchell, secretary, C. E. McStay, field secretary, E. E. East, highway engineer, Ivan Kelo, general counsel and Davis R. Faries, consulting counsel.

STEEL CORPORATION SHOWS INCREASE IN NET EARNINGS

The total earning assets of the United States Steel Corporation for the third quarter of the year amounted to \$42,400,412, compared with \$40,624,221 in the preceding quarter and \$30,718,415 in the corresponding period last year.

The directors of the corporation, meeting to review the result of the quarter's operation, declared the usual extra dividend of fifty cents a share on the common stock in addition to the regular quarterly payment of \$1.25 on the common shares and \$1.75 on the preferred.

After the deductions for dividends a surplus of \$8,604,611 for the quarter remained, in contrast with a surplus of \$6,688,792 for the preceding quarter and a deficit of \$122,102 for the September quarter of 1924.

TIMBER RESEARCH IS DIRECTED BY CANADA

Timber research is being directed by the Canadian Government, according to the Ottawa correspondent of the American Chemical Society, who says:

"To develop satisfactory processes for the preservation of lumber and timber by treatment with creosote and similar products, the Forest Products Laboratories of the Department of the Interior at Montreal have established an experimental plant and have carried out a considerable amount of research work.

"Recent work is based on 20 selected Canadian woods; the relative suitability of these woods for various purposes and their behavior on treatment by different preserving processes using a variety of reagents, are points being studied in the investigation."

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The National Directory of Commodity Specifications, which is being issued by the Bureau of Standards, with the cooperation of the Bureau of Foreign and Domestic Commerce, is now on the press and will be ready for distribution shortly. The directory contains in convenient form information regarding the best known specifications for more than six thousand commodities. The book tells not only what specifications are in general use, but also by whom they were prepared and where copies can be obtained. In it are conveniently indexed for ready finding about 27,000 specifications prepared by the Federal Specification Board and the separate departments of the federal government, by state and city purchasing agents, public utilities, technical societies, and trade associations. Copies can be obtained by sending \$1.25 in any convenient form to the Superintendent of Public Documents, Government Printing Office, Washington, D. C.

A number of the unions in New York, in which the wage rate is now \$10.50 a day, are demanding \$12.00 a day for 1926, according to Harry A. Moss, Secretary of the Building Trades Employers Association of the City of New York. The demands from the helpers' organizations who are now receiving \$8.00 per day are for an increase of \$1.00 per day. Concerning conditions in Greater New York Mr. Moss has the following to say: "Indications are that the volume of business for 1926 will be equal to that of 1925. While the shortage of mechanics has been fairly well met, attempts are still being made by some of the unions to 'snowball' certain jobs. Bonuses of \$1.00 and \$2.00 a day have been paid the bricklayers on small jobs, but on the large jobs the scale has been maintained.

Despite the enormous amount of building under way, the average of construction costs in the principle cities of the United States was lower in August than at any time during the past 28 months, the index figure, based on 1913, showing a drop of three points to 198, according to statistics compiled by the Associated General Contractors of America. During the past two years fluctuations of this average cost figure have remained within five points, the limits being 200 and 205.

California's stand of commercial timber numbers 569,000,000 trees over 18 inches in diameter, State Forester M. B. Pratt announced after completing a survey of the forest areas. The commercial timber area, Pratt estimated, contains 248,505,000,000 board feet of lumber.

The Kansas City Chamber of Commerce has endorsed a proposed bond program of \$12,261,000 to be voted on this fall. This includes issues of \$850,000 for municipal aviation; \$800,000 for a municipal auditorium, and \$75,000 for tourist camp.

Planing mill of A. H. Kitchen & Co., 65 Oak Grove St., San Francisco, suffered \$5000 fire loss, Oct. 23. Fire started in loose shavings in engine room.

Some idea of the magnitude and importance of the construction industry may be gained from a statement recently made by Secretary of Labor Davis in which he said: "More than 11,000,000 of our people are dependent for their living upon the construction industry, and 22 per cent of all the skilled and unskilled labor of the country is engaged in the building branch alone. Some 250,000 freight cars are required to handle the materials. Our building bill is \$200 per year for each family in the United States. It is truly the chief barometer of the business of the country. When construction gains, prosperity is with us. It is the great outstanding influence for good or bad in our financial progress."

Priests of building materials, with the exception of lumber, are below the 1924 level according to statistics gathered by the U. S. Department of Labor. Prices of cement averaged from the quotations of six plants in Pennsylvania, Indiana, Minnesota, Texas and California, stood three per cent below a year ago. Price of lumber at wholesale now averages four per cent above the 1924 level. The price of common brick per thousand is four per cent below last year and the wholesale price of structural steel is eleven per cent below last year.

Wages as measured both by amount and what they will purchase are higher in the United States than in any of eighteen other countries covered in a monthly index compiled by the international labor office. The index is based on wages for various lines of skilled and unskilled labor and on food and rent costs in a principal city for each of the countries on July 1. This places the figure for Philadelphia at 183. The next highest in the list was Ottawa, Canada, with 165, while the lowest, 42, was reported for Lisbon. London with 100 was used as the index base.

Insulating the walls of California farm homes to make them more livable both during the hot summer and the cold winter is the latest device developed by University of California agricultural engineers. "Filling in the hollow walls of the house with sawdust, concrete or even common earth produces a more equable temperature, resulting in cooler rooms in summer and materially cutting down fuel costs in winter," J. D. Long, farm engineer states.

Cincinnati started a fire prevention campaign about twenty years ago. The fire loss in that city was reduced twenty per cent and insurance rates were reduced thirty-one per cent. The insurance saving alone amounts to over \$850,000 per year. These statements are made by the Bureau of Fire Protection of the Pennsylvania State Police.

The San Francisco Civil Service Commission has adopted a form of questionnaire which will be sent to all municipal employees, the answers to which, it is expected, will form the basis of a scheme for the standardization of salaries.

ALONG THE LINE

With completion of two important units of its Big Creek project planned for next year, the Southern California Edison Company has prepared a budget aggregating \$32,557,000 for 1926, or \$7,000,000 in excess of last year's total, it was revealed yesterday in connection with a hearing on an application for the sale of \$10,000,000 worth of preferred stock. The Huntington-Shaver Lake Tunnel and appurtenances thereto, and the construction of a 250-mile transmission line to carry power to Los Angeles and vicinity, are the principal features of the development covered by the enlarged budget, it was stated. These projects will cost in the aggregate \$10,958,000. Expenditure of \$8,000,000 for completion of the company's Long Beach steam plant, and of approximately \$13,000,000 for substations and transmission line extensions are the other major items included in the budget.

The Engineering Sales Company and C. E. Watts, consulting engineer, have removed from 200 Davis to the Marvin Bldg., 24 California St., San Francisco. The company handles the lines of the Morgan Engineering Co., rolling mill machinery, cranes, hammers, presses, etc.; the Palmer-See Co., elevating and conveying machinery; Royersford Foundry & Machine Co., roller bearings and power transmission machinery; Racine Radiator Co. and Pratt Manufacturing Co.

A six months' campaign against the unscrupulous and irresponsible building contractor has just been started by the Los Angeles Builders' Exchange. The fight to drive unscrupulous contractors out of Southern California will be conducted largely through a comprehensive newspaper publicity campaign aimed to show the building public the tactics used by irresponsible builders.

Thomas McCann, 39, vice-president of Shevlin, Carpenter & Clark Co., one of the most prominent lumbermen in the country, and heavily interested in the Pacific northwest, died Oct. 20 at Maricopa, Arizona, en route to San Diego.

The San Joaquin County Association of Chambers of Commerce, at a recent meeting in Tracy, discussed a proposal to bond the county for \$1,000,000 to finance construction of a new county courthouse.

Voters of Houston, Tex., recently approved a \$4,975,000 bond issue for a number of improvements including water works, street paving, parks, farmers' market, and incinerators.

The Executive Committee of the Associated General Contractors of America has voted to hold the next Annual Convention of the organization in Portland, Oregon, in January, 1926.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

ANALYSIS OF PAPER HANGING TRADE IS COMPLETE

The trade and industrial education service of the Federal Board of Vocational Education has just completed an analysis of the paper hanging trade. This is published in bulletin form and contains five parts. Part I points to the importance of the trade and the need for training skilled workers; Part II explains and presents the analysis charts; Part III indicates methods of preparing course of study from the analysis charts; Part IV points out ways in which the analysis can be used in assembling instructors working memoranda; and Part V, Appendix A, includes a partial glossary of paper hangers' trade terms, while Appendix B contains a bibliography on the decoration of houses and the hanging of wall paper. The bulletin should be useful to workers in the trade who are responsible for the training of apprentices; to local directors of vocational education; and to teachers of evening and part-time trade schools for paper hangers and their apprentices. Copies of this publication which is known as Bulletin No. 102, Trade and Industrial Series No. 29, may be obtained from the Superintendent of Documents, Government Printing Office, Washington, D. C., at 10 cents per copy.

WAGES IN BUILDING INDUSTRY HIGHEST ON RECORD

Wages in the building industry are at the highest point ever attained, according to a survey just completed by the Rail Steel Products Association. Broken only by the slump in 1922, there has been a steady climb since the early part of 1919, while at the same time country-wide investigations show that there has been a decline in the price of building materials, the association reports, finding building material prices the lowest since the war except for the 1921-22 period.

"It is true that the upward movement of wages during 1924 and 1925 has been very little less than 1 per cent," the report continues, "yet there has been a fractional gain. Based on a national average, wages are 38 per cent above the 1919 mark, 25 per cent higher than in 1920, and 21 per cent higher than in 1922. However, in 1921, they were less than 1 per cent lower than at present.

"On the other hand, while the prices of building materials average a little higher than in 1921 and 1922, they are 34 per cent lower than in 1920, 8 per cent lower than in 1923, and 2 per cent under last year. In comparison with pre-war conditions, the United States Department of Labor states that the price of building materials is slightly more than 70 per cent above 1913. As against this, it is estimated that wages in the industry are 119 per cent of the average before the war."

Constitutionality of the Penal Code, which makes it a misdemeanor for one company to entice labor from another by offering higher compensation, has been upheld by the State Supreme Court of Georgia.

NATIONAL BUILDING CONFERENCE TO BE HELD IN CHICAGO

A national conference of building contractors will be held in Chicago on Tuesday, November 17, 1925. The meeting is being called by the National Association of Building Trades Employers for the purpose of conducting a survey of probable conditions in the industry for 1926.

A similar meeting was held in Cleveland last January, at which the demand for the five-day week was the principal issue discussed. This matter will again be brought up, as well as a number of other important problems, such as wage demands for next year, etc.

The success of the January meeting demonstrated the need for frequent gatherings of contractors from representative cities to discuss common problems.

Every employer of building labor is invited and urged to attend this conference. Secretaries of local, state and national organizations in the construction industry are requested to give this conference the widest publicity and urge that as large a delegation as possible, representing their particular group, be in attendance.

The possibilities of good resulting from such a meeting, if representative of the entire construction industry, are many.

SEWER PIPE IS TOPIC AT ENGINEERS' MEET

P. Schuyler was the principal speaker at the regular monthly meeting of the Stockton Chapter, American Association of Engineers, held in the offices of the Western States Gas & Electric Company at Stockton, Oct. 26. His topic was "Vitrified Clay Sewer Pipe—Its Manufacture and Use." Lyle Payton of the Stockton city engineering department was the guest of the evening. Others present include Alfred Downer of the Downer Construction Company, Floyd Fairchild of the Spickerman Cement Pipe Company and Robert Harris of the Standard Oil Company.

SEEK TO AMEND LAWS COVERING OCCUPATIONAL DISEASES

A renewed campaign for the passage of five amendments to extend the scope of the workmen's compensation law to cover occupational diseases resulting from poisonous gases, paint and dust has been begun by the New York State Federation of Labor and Building Trades Councils. The occupational disease amendments passed the Senate, but were killed in the Assembly at the last session. The bills cover the disease and death caused by tetra-ethyl gas, benzol and coal tar poisons, rock dust tuberculosis, skin irritations, naphtha, benzine and gasoline poisoning.

The City of Chicago is considering sending a commission on a tour of the large cities of the United States and Europe to study harbor development, city planning, crime and other civic subjects.

FRESNO BRICKLAYERS WITHDRAW WAGE INCREASE DEMAND

Stating that an error had been made in presenting the demand for a dollar increase in wages, representatives of the Fresno Bricklayers' Union withdrew the demand on that basis at a meeting at which representatives of the Fresno Building Trades Council, the Fresno Builders' Exchange, and the Union were present.

The action settled definitely what was termed a misunderstanding between the employers and the unions which for a time threatened to develop into a strike.

The present scale is \$11 for eight hours' work.

The demand was presented directly to the employers 90 days ago and was scheduled to go into effect Oct. 22, but with James Collins, third vice president and Pacific coast representative of the international union, in attendance at the meeting, the whole working agreement was gone over and the bricklayers' union withdrew its demand.

Under the working agreement no change in wages or working conditions could be made until the joint conference board which is composed of five representatives of the Building Trades council and five of the Builders' Exchange had approved it.

FIVE-DAY WEEK MOVEMENT IN THE PAINTING TRADE

At the recent annual convention of the Brotherhood of Painters, Decorators & Paperhangers of America held in Montreal a statement was made by George F. Hedrick, president, to the effect that 35,000 journeymen in that trade are now working under the five-day week system. According to the federal census of 1920, there were in this country about 267,000 painters and paperhangers. On that basis approximately 13 per cent of the mechanics have secured the short working week. During the Spring and Fall rush periods in this particular trade, the loss in man hours amounts to 140,000 hours per week.

TO CHECK UP THEATRE LAW

Careful study of the Fresno building and theatre ordinances will be undertaken at once to determine whether or not they dovetail in such a way as to permit construction of a combination theatre and office building as proposed by Alexander Pantages. It is announced by Commissioner of Public Works A. M. Jensen.

The theatre ordinance refers specifically to buildings of that class, while the general building ordinances cover buildings of all kinds, but to what extent they coincide has not yet been determined, Jensen said.

Fire Marshal W. R. Williams will aid Jensen in the work.

INSPECTIONS REQUIRED

An ordinance has been approved by the trustees of Daly City to regulate the inspection of electrical and plumbing work. Under the new ordinance, electricians and plumbers will be required to pay a license fee to do business in Daly City. Plumbing and electrical work will be inspected regularly by proper authorities.

J. H. McCallum Establishes His Worth As A SURGEON

J. H. McCallum, who is reported to sell "everything in lumber," established his title when he undertook a difficult piece of surgery in attempting to repair a broken arm. The arm, however, was not attached to a human body, but to a valuable unit of the Golden Gate Park Commission property—that of the Dutch Windmill near the Ocean Beach. The arm was in need of repair and to accomplish the repairs a huge timber was required with the result that the order was placed with McCallum who had the "stick" on the job from Washington one week after receiving the order. The "stick," Douglas Fir, 20 by 22 inches and 114 feet in length, weighed 14,630 pounds.

The timber and the windmill are shown in the accompanying picture.

"Everything in lumber," McCallum says. "If it grows we have it—and when you want it."

Who Is Lowest Responsible Bidder?

Who is the "lowest responsible bidder" in the opinion of courts that have had occasion to rule on the question?

Supreme court of Pennsylvania: "The term lowest responsible bidder" does not mean the lowest bidder in dollars; nor does it mean the board may capriciously select a higher bidder regardless of responsibility or cost. What the law requires is the exercise of a sound discretion by the directors.

"They should call to their assistance means of information at hand to form an intelligent judgment. They should investigate the bidders to learn their financial standing, reputation, experience, resources, facilities, judgment and efficiency as builders. This was not done. The court below censures the board for omitting this important step, but it holds, inasmuch as they had ample knowledge of the successful bidder and the merits of his work, the contract could be awarded. This might do in private affairs, but will not pass when public funds are at stake; it is not the exercise of discretion. Though the directors were not bound in law to give the contract to the lowest bidder, who might be irresponsible, they were bound to investigate, and if the bidder measured up to the law requirements as a responsible party, the board could not capriciously award the contract to another. Giving a bond alone does not make up for responsibility." (Hibbs vs. Arnsperg, 119 Atlantic, 727).

"As applied to a bidder who proposes to undertake the performance of the stipulations and conditions of such a contract as this, we regard the term 'lowest responsible bidder' as including the ability to respond by the discharge of his obligations in accordance with what may be expected or demanded under the terms of the contract. 1 * * And we think that the added requirement that the bidder shall be responsible has a broader meaning than the mere financial ability to respond in damages which is provided for by the bond." (Supreme Court of Illinois, People vs. Kent, 43 N. E., 760).

"We conclude that the word 'responsible' in the phrase 'lowest responsible bidder' was used by the legislature in the sense in which it had long been interpreted by the court and text writers and must be held to imply skill, judgment and integrity necessary to the faithful performance of the contract as well as sufficient financial resources and ability." (Supreme Court of Kansas, 118 Pac., 874.)

In view of these actual opinions it would seem that public bodies, having contracts to let, would feel obligated to go a little further in the investigation of the low bidder than that he is able to furnish a bond before they have discharged their own obligation to the public and their own responsibility in the eyes of the law.—Master Builder.

ENTHUSIASM

When you outgrow your enthusiasm, you stop growing altogether. The people who find nothing very interesting, who do not know what it is to be swept by a wave of generous emotion, have built a barrier between themselves and life's best things. When we cease to hope and desire and expect, we cease to receive. Cultivate your enthusiasm. When you lose that, you lose all that makes life worth living.

LUMBER YARD FIRE FAILS

Fire of unknown origin broke out in the J. H. McCallum lumber yards at Fifth and Bryant Streets Oct. 24, and was gaining headway when discovered by a watchman. The alarm was turned in, but employees of the yards had the blaze under control before the arrival of the apparatus.

BANKRUPT

The Store Fixture Company of San Francisco was averted to be an involuntary bankrupt in a petition filed in the Federal Court. Cobbledick-Kibbe Glass Company, Fritz Genske and C. Faggioni, all of San Francisco, were the petitioning creditors.

INCORPORATES

Golden Gate-Atlas Materials, capitalized at \$500,000, has been incorporated in San Francisco with the following directors: Francis O'Reilly, J. E. Connell, P. Bradley, O. C. Barrymore, C. M. Cadman, A. Popkin and W.

TRADE NOTES

Exclusive sale rights for "Interlock" flooring have been taken over by E. A. Howard and Company of San Francisco. This hardwood flooring while new in this section has been extensively used around New Orleans. Some of the finest buildings in that city are finished throughout with the flooring. "Interlock" flooring comes in twice the average length of either Maple or Oak which greatly reduces the cost of laying and enhances the beauty of the furnished floor, according to the Howard interests. The flooring can be furnished for one-third less than Oak or Maple. E. A. Howard and Company reports, and its wearing qualities are easily equal to the Maple flooring.

The California Magnesite Company of San Francisco is reported to have started work on its magnesite mines in the hills, sixteen miles from Patterson, in Stanislaus County, preparatory to opening up in the Spring, when it is planned to take out great quantities of the ore for shipment. The mine is reported to be the only one of its kind in Stanislaus county and is extremely valuable. Construction will be started at once on a 1000-foot tunnel to get a greater depth to the underlying ore bodies. Heretofore the ore has come from above.

The Engineering Sales Company and C. E. Watts, Consulting Engineer, have removed from 200 Davis street to the Marvin Bldg., 24 California street, San Francisco. The company handles the lines of the Morgan Engineering Company, rolling mill machinery, cranes, hammers, presses, etc.; the Palmer-Bee Co., elevating and conveying machinery; Royersford Foundry & Machine Co., roller bearings and power transmission machinery; Racine Radiator Co. and Pratt Manufacturing Co.

The Pacific Steel Co. of San Francisco, it is announced at Salinas, is preparing to begin mining dolomite on an extensive scale in the foothills southeast of the San Juan grade. According to the reports the company will conduct operations with a steam shovel and a rock crusher and will employ 50 men at the start. The company has a 20-year lease on the property, which has been idle since the close of the World War.

Fred M. Van Houten of Santa Cruz and his brother-in-law, H. V. Clerk of Kansas City, Mo., have purchased the lumber and mill business of Wilson Brothers, King and Bay streets, Santa Cruz. The new owners will operate under the firm name of Bayona Mill & Lumber Company.

The Diamond Match Company of Chico is planning to establish a lumber yard in High street between Meyers and Huntoon streets, Oroville. The yards will be served by a Sacramento-Northern R. R. spur.

C. Hamilton Elrod Construction Company has moved to larger quarters at 1710 Franklin street, Oakland. The company was formerly located in the Ray Building.

Oscar Jacobsen, C. A. Pope and John Schroeder will operate under the trade name of Gas Heating Company in San Francisco.

Nine Months of Pacific Coast Construction Totals \$416,841,029

The following table shows the total of building permits issued in 89 cities of the Pacific Coast States during the first nine months of 1925, 1924 and 1923, as compiled from official reports of building executives:

Careless Construction Methods Causes Steel Frame to Collapse

Accident photographs show the twisted steel frame of the Margaret K. Andrews Building, Santa Barbara, which collapsed under its own weight due to faulty construction methods, according to City Manager Nunn and building inspectors. The top photograph gives a general view of the wreckage, showing the steel columns pulled from the concrete bases; the lower right hand picture looks down on the twisted steel from the arched front of the building. In the lower left hand corner may be seen a crumpled concrete pillar. The concrete in this pillar, according to City Manager Nunn, was nothing but lime. (Photo by Santa Barbara Daily News).

An investigation into the collapse of the Margaret K. Andrews Building, 224 East Carrillo St., Santa Barbara, has been completed by the city building department and the cause of the collapse of the steel framework under its own weight is attributed by L. L. Pope, building inspector, and L. D. Carter, state building inspector, to careless construction methods.

According to Carter, who checked the

plans and design of the building and pronounced them O. K., the foreman of the construction company he declares is responsible for the collapse of the steel frame, because he neglected to place diagonal ties on the frameworking it until the brick walls could be erected.

"One might as well stand a pencil on end and expect it to stand indefinitely without braces," said Carter in

illustrating the fall of the framework. "If the pencil falls it is because the pencil or the table is of poor construction. If the steel frame had been braced until the walls were completed, it could not have fallen."

The permit for the building was issued August 21 to Mrs. Margaret K. Andrews after it had been approved by the architectural board of review and the city building department. The final approval of the plans, according to the permit was made by Bernhard Hoffman, chairman of the architectural board and the structural design was approved by Carter, who also approved the building as meeting state requirements.

The architect of the building was Mrs. James Osborne Craig and the contract was awarded Davidson and Matland for its construction.

It is said by workmen at the building that the steel will have to be sent back to the mills to be straightened, it was so badly twisted and bent.—Santa Barbara Daily News.

Building News Section

APARTMENTS

Plans Being Prepared.

APARTMENTS Cost, \$600,000
SAN FRANCISCO. NW Broadway and Gough St.
 Twelve-story steel frame community apartment house (12 9-room apts.).
 Owner—Ernest A. Bruer and George Wagner.
 Architect—Bakewell & Brown, 251 Kearny St., San Francisco.

Completing Plans.

APARTMENTS Cost, \$50,000
BERKELEY. Alameda Co., Cal. NW cor. University Ave. and California St.
 Three-story frame, stucco and brick veneer store and apartment bldg., 18 apartments of 2 and 3 rooms each, 7 stores. Figures will be called for in about 3 weeks by owners.
 Owner—Litchens & Williams.
 Architect—Leonard H. Ford, 306 14th St., Oakland.

Bids Being Received.

APARTMENTS Cost, \$65,000
BERKELEY. Alameda Co., Cal. San Pablo Ave. near Delaware St.
 Three-story frame, stucco and brick veneer store and apartment building (8 stores and 24 2 and 3-room apts.).
 Owner—R. E. McMann.
 Architect—Leonard H. Ford, Coit Hotel Bldg., Oakland.

To Be Done by Day's Work.

APARTMENT (1) \$20,000; (1) \$15,000
SAN FRANCISCO. S Broadway 45 and 91 E Gough St.
 Two three-story and basement frame apartments (9 each).
 Owner—Strand & Strand, 521 Pierce St., San Francisco.
 Architect—None.

Taking Steel Bids.

APARTMENTS Cost, \$250,000
SAN FRANCISCO. O'Farrell bet. Jones and Leavenworth Sts.
 Twelve-story steel and concrete apt. bldg., 18 2-room apts.
 Owner—E. V. Lacey, Hearst Bldg., San Francisco.
 Architect—C. O. Clausen, Hearst Bldg., San Francisco.
Concrete work and grading—L. Vanpucci, 401 Church St.
 Other bids taken in a few days.
 Plans have been revised from eight stories to twelve stories.

To Be Done by Day's Work.

APARTMENTS Cost, \$15,000
OAKLAND. Alameda Co., Cal. S Crofton Ave. 200 E Fairbanks St.
 Two-story 14-room frame apartments.
 Owner—W. Q. Dutton, 62 Fairmont Ave., Oakland.
 Architect—None.

Segregated Figures Being Taken

APT. BLDG. Cost, \$165,000
SAN FRANCISCO. SW Franklin and Sacramento Sts.
 Two six-story reinforced concrete apt. buildings (2 and 3 room apts.).
 Owner—Marian Realty Co., 110 Sitter St.
 Architect—Rousseau & Rousseau, 110 Sutter St.

Sub-Contracts Awarded — Bids Being Taken For Electrical Work, Etc.

APARTMENTS Cost, \$100,000
SAN FRANCISCO. S Turk bet. Taylor and Jones Sts., S. F.
 Six-story and basement concrete apartment building.
 Owner—M. V. Brady, Monadnock Bldg., San Francisco.
 Architect—D. C. Coleman, 110 Sutter Street.

Reinforcing Steel—Steel Service Co., Indiana St., San Francisco.

Cement—Western Lime & Cement Co., Clement—Spencer Elev. Co., 163 7th St., San Francisco.

As previously reported, grading to Sibley Grading & Teaming Co., 165 Landers St.; structural steel to Central Iron Works, 2030 Bryant St. Bids on other portions of the work will be taken shortly.

Contract Awarded

APARTMENTS ETC. Cost, \$28,000
OAKLAND. SW 63rd St. & College Ave.

Three-story 18-room apartment house with stores on ground floor.

Owner—Anita E. Bradley.
 Architect—None.
 Contractor—H. W. McIntier Co., 1523 Franklin St., Oakland.

Plans Complete.

APARTMENT HOUSE Cost, \$15,000
SAN FRANCISCO. Fair Oaks St., bet. 23rd and 24th Sts.
 Two-story frame and stucco apt house (4 3-room apts.).
 Owner—Mrs. Margaret Kaiser, 222 Fair Oaks St.
 Architect—E. E. Young, 2002 California St., S. F.

Plans Being Revised

HOTEL & APTS. Cost, \$90,000
SALINAS. Monterey Co., Cal.
 Three-story and basement brick hotel and apartments.
 Owner—Mrs. Brown, Salinas.
 Architect—E. E. Rummel, 966 Warfield Ave., Oakland.

Craftsmanship is the priceless ingredient sought by every architect for his client. It is more than an ideal with us and with the workmen who are a part of us—it is an obligation and a tradition over forty years old.

That is why you will find Quandt craftsmen wherever fine work and quality workmanship are insisted upon.

Co-operation for the economy of quality.

A. Quandt & Sons
Painters • Decorators

SINCE 1885
 374 GUERRERO STREET • MARKET 1709
SAN FRANCISCO
 LOS ANGELES

Plans will be refigured by some of the lowest bidders. The lowest bid was submitted by Megna & Newell of San Jose.

Contract Awarded

APARTMENTS & GAR. Cost, \$30,500
OAKLAND. E 39th Ave., 290 N-E 14th Street.
 Two-story 16-room frame apartments and one-story garage.
 Owner—H. D. Huntington, 1636 Franklin St., Oakland.
 Architect—None.
 Contractor—California Builders, Inc., 1636 Franklin St., Oakland.

BONDS

ROSEVILLE. Placer Co., Cal.—Bonds of \$30,000 voted in Roseville high school district to finance erection of structures to house auditorium seating 1,000; gymnasium, locker and toilet rooms.

SAN MATEO. San Mateo Co., Cal.—Election will be held shortly in San Mateo Union High School District to vote bonds of approximately \$300,000 to finance erection of new high school.

PACIFIC GROVE. Monterey Co., Cal.—City trustees set Nov. 25 as date to vote bonds of \$40,000 to finance construction of museum and aquarium building. E. S. Johnston is city clerk.

PACIFIC GROVE. Monterey Co., Cal.—City trustees set Nov. 25 as date to vote bonds of \$10,000 to finance construction of addition to public library. E. S. Johnston is city clerk.

HOLLISTER. San Benito Co., Cal.—City contemplates bond issue to finance construction of Veteran's War Memorial building on site already purchased in San Benito St. bet. South and East Sts. A structure costing \$40,000 is contemplated.

MADERA. Madera Co., Cal.—Trustees of Madera High School District contemplate establishing junior high school. Bonds would be voted to finance erection of the new structure.

SAN JOSE. Santa Clara Co., Cal.—Election will be held Nov. 3 in Valley View-Pioneer-Hacienda Union School District to vote bonds of \$78,000 to finance erection of new school. Trustees of district are: Ernest E. Conradt, W. B. Mabie, Frank E. Pfeiffer, M. V. Cook, R. O. Atkinson.
 Ralph Wyckoff, Grover's Bank Bldg., San Jose, is the architect.

CHURCHES

Plans Being Prepared.
CHURCH Cost, \$—
 EL CERRITO, Contra Costa Co., Cal.
 Church (type of construction not decided).
 Owner—St. Johns Church (Rev. Anthony J. Henneshaw, Pastor).
 Architect—Shea & Shea, 454 Kearny St., San Francisco.

Plans Being Prepared.
MAUSOLEUM Cost, \$—
 CHICO, Butte Co., Cal.
 Reinforced concrete Mausoleum.
 Owner—Palmer & Schlemmer, 1st National Bank Bldg., Chico.
 Plans by Owners.
 The size of the structure will depend upon the number of reservations made by local people.

MONROVIA, Los Angeles Co., Cal.—C. D. Goldthwaite, Rivers-Strong Bldg., awarded contract at about \$43,000 for new church at Monrovia for St. Luke's Episcopal Church. Carleton M. Winslow, 924 Van Ness Bldg., L. A., archt.; reinf. concr. walls, 15,000 ft. stucco exter., east stone, clay tile rfg., leaded glass, oak and pine trim, oak doors, cem. floors, furnace htg.

PHOENIX, Ariz.—Norman F. Marsh, Broadway Central Bldg., Los Angeles, has been commissioned to prepare plans for new edifice to be built at 3rd Ave. and Van Buren St. for Presbyterian church. Dr. J. C. Norton of church governing board will be in charge of project; \$250,000.

HOLLYWOOD, L. A. Co., Cal.—Arch't. Robert H. Orr, 1305 Corporation Bldg., is preparing preliminary plans for a new bldg. for South Hollywood Presbyterian Church on Normandie Ave. south of Santa Monica Blvd. Auditorium to seat 750, Sunday school depts., conc. basement; reinf. conc. constr., stucco exter., clay tile rfg., oak and pine trim, and glass windows, furnace htg., tower 30 ft. high; \$115,000.

FRESNO, Fresno Co., Cal.—Rev. Fred A. Hughes, 1102 F St., Fresno, pastor Bethel African Methodist Episcopal Church, G and Tuolumne Sts., announces plans will be started at once for proposed \$20,000 church building.

FACTORIES & WAREHOUSES

Sub-Contracts Awarded — Bids Being Taken

WAREHOUSE Cost, \$50,000
 SAN JOSE, Santa Clara Co., Calif. Bessett near Pleasant St.
 One-story concrete warehouse building covering an area of one acre.
 Owner—Sperry Flour Co., 141 California St., S. F.

Designer and contractor—Geo. Wagner, 131 So. Park St., S. F.

Reinforcing steel—Truscon Steel Co., 709 Mission St., S. F.

Steel sash—Detroit Steel Products Co., 251 Kearny St., S. F.

Wiring—H. S. Tuttle, 85 Columbia Sq., San Francisco.

Lumber—Tilden Lumber & Mill Co., 26th and Santa Clara St., San Jose.

Cement—Santa Cruz Portland Cement Co., 76 W. San Antonio, San Jose.

Bids are being received for roofing, iron work, plastering, sheet metal & glazing.

Plans Complete
SERVICE STATION Cost, \$10,500
 OAKLAND, SW Grand and Sunny-slope Ave.

Two one-story conc. service stations.
 Owner—Mission Motor Service Corp., E 14th & High Sts., Oakland.
 Architect—None.

Plans Being Prepared.
WAREHOUSE Cost, \$35,000
 OAKLAND, Alameda Co., Cal. Parr Terminal

One-story class C cotton warehouse, 300x50.

Owner—Parr Terminal Co., 1 Drumm St., S. F.

Architect—Name withheld for present.

Plans To Be Prepared
WAREHOUSE Cost, \$350,000
 OAKLAND, Alameda Co., Cal. Blk bldg by First, Water, Franklin and Webster Sts.
 Five-story reinforced concrete warehouse.
 Owner—Lawrence Warehouse Co., Al T. Gibson, president, 37 Drumm St., S. F.

Architect—Not selected.
 The property is adjacent to the Franklin street docks and cargo can be barged across the bay and run into the warehouse on the electric elevators, Gibson explained.

The site contains 42,000 square feet of ground and the building will provide more than 200,000 square feet of storage space. Eleven stores will be constructed on the ground floor to provide headquarters for the wholesale companies.

Contract Awarded.
WAREHOUSE Cost, \$40,850
 SAN FRANCISCO, SW First & Tehama Streets.

Three-story and basement steel frame and brick warehouse.

Owner—Bothin Real Estate Co., 604 Mission St., San Francisco.

Architect—Lionel Pries, 57 Post St., San Francisco.

Contractor—Mattock and Feasey, 210 Clara St., S. F.

Sub-Figures Being Received
PACKING PLANT Cost, \$100,000
 SACRAMENTO, Sacramento Co. Cal.
 One-story reinforced concrete packing plant.

Owner—Wood-Curtis Packing Co.
 Architect—O'Brien Bros., 315 Montgomery St., S. F.

Contractor—Industrial Constr. Co., 815 Bryant St., S. F.

Figures are being received from Sacramento and San Francisco contractors.

Contract Awarded.
ADDITION Cost, \$38,650
 OAKLAND, Alameda Co., Cal. Park Blvd. and Mathews Ave.

Reinforced concrete and steel addition
 Owner—Great Western Power Co., 1700 Broadway, Oakland.

Architect—None.

Contractor—Chas. W. Heyer, Jr., 33 York Dr., Piedmont.

LONG BEACH, L. A. Co., Cal.—Stone & Webster, Byrne Bldg., Los Angeles, gave contr. for reinf. enc. generator station and switch house in Long Beach for Southern California Edison Co.; \$800,000.

Sub-Bids Being Taken.

BUILDING Cost, \$40,000
 MARYSVILLE, Yuba Co., Cal.
 One-story steel and brick industrial building.

Owner—The Hubbard Co.

Designer and contractor—The Austin Co., 244 Kearny St., S. F.

PITTSBURG, Contra Costa Co., Cal.—Jimmie Angel, Edward and Parker Angel, his brothers, and C. E. Brown are seeking a site in the vicinity of Pittsburg on which they propose to locate an aviation field, flying school, headquarters for commercial transportation and the erection of a plane building plant. The four men have established headquarters in Richmond under the name of East Bay Aviation Company.

NAPA, Napa Co., Cal.—George A. Armitage of the Armitage Laundry Co. Inc. is in Napa seeking quarters in which to locate a laundry. Plant of Hoffman Shoe Factory in West Napa will probably be redeveloped for the purpose. Approx. \$40,000 will be spent for equipment. Directors of the company are: George A. PRATT'S CONCRETE MIX

Champion
by Sandy
Pratt

Edward R. Bacon, President,
Edward R. Bacon Co.,
All Kinds of Machinery,
Dear Ed.

YOU ARE at the head.

OF A big convention.

TO BE held.

IN SAN FRANCISCO.

FROM NOVEMBER 9th.

TO NOVEMBER 13th.

AND SANDY Pratt, President.

OF THE Pratt Building Material Co.

DOUGLAS 300—"easy to remember."

IS NOT sure.

THAT THE Building World.

IN AND about San Francisco.

REALIZES HOW important.

AND HOW interesting.

THIS CONVENTION will be.

TO ENGINEERS, architects.

AND BUILDING material dealers.

SANDY NOTICES.

THAT ALL Western highway engi-

neers.

WILL BE here.

BESIDES ALL county engineers.

AND ALL the contractors.

OF ALL Western states.

WILL BE at the convention.

THEN THERE are the men.

WHO SELL machinery.

ALL LIVE ones—necessary evils.

BUT NO worse.

THAN SANDY Pratt, producer.

OF SAND, rock and gravel.

SAY, ED, Chairman and everything.

WOULD IT be possible.

FOR SANDY Pratt.

TO MAKE a speech.

TELLING THE multitude.

ABOUT SANDY'S rock-crushing plant.

AT PRATTROCK (near Folsom).

WHERE YOUR machinery.

IS BEING used successfully.

ALSO ABOUT the sand plants.

AT SACRAMENTO, Marysville.

AND PRATTROCK (Monterey County).

"I THANK you."

Engine No. 11 on the Prattrock and Western Railroad at Prattrock (near Folsom), home of Sandy Pratt's \$250,000 rock, gravel and sand plant. Sandy's company bought \$150,000 worth of machinery so Sandy will be glad to see the machinery exhibit at the convention on November 9th to 13th.

PASADENA, Los Angeles Co., Cal.—J. J. Brintnall, 32 N. 4th St., Alhambra, will build 2-story and basement 9-room residence, 64x70 feet, at 1000 Prospect Ave., Pasadena, for Mrs. L. C. Rose; plans by Everett P. Babcock, 649 La Loma Rd., Pasadena; frame and stucco, tile roof, tile, hardwood and pine floors, hardwood and pine trim, beam ceilings, cast stone mantel and hearth, 3 baths, tile toilets, sound deadening, flagstone and tile terrace, wrought and ornamental iron, gas unit system heating, electric controlled storage water heater, electric refrigerator, garage; \$25,000.

MARTINEZ, Contra Costa Co., Cal. Completion of Class A theatre building. Owner—West Coast Theatre. Architect — Reid Bros., 165 Montgomery St., San Francisco.

Construction of this theatre was started about two years ago but was never completed due to the death of the owner.

Mr. Reid announces that plans have been practically completed and that bids will be asked possibly this week.

TULARE, Tulare Co., Cal.—M. Naify and Wm. Nasser, representing interests which plan the erection of a fireproof theatre on Masonic property, Tulare and L streets, announce plans have been returned to the architect for revisions and, it is expected, construction will not be started for at least two months. Original plans provided for a building costing in excess of \$130,000 with a seating capacity of about 1600. Will be of Moorish type of architecture. Further particulars will be given when project is in more advanced stage.

LOS ANGELES, Cal.—Architects Morrao, Wallis & Clements, 1124 Van Nuya Bldg., are preparing working plans for a Class A theatre building at 6120 Hollywood Blvd. for Hollywood Music Box, Inc.; Carter DeHaven, president. Theatre auditorium to seat 950, four shops, roof garden; reinforced concrete construction, stucco exterior, cast stone trim, tile and composition roofing, plate glass, marble and tile work, ornamental iron work; \$150,000.

PORTLAND, Ore.—Hansen and Hammond, Pittock Block, at approx. \$1,000,000 will be awarded contract to erect Hippodrome Theatre. Plans for the structure are being prepared by Architect A. E. Doyle, Worcester Bldg., Portland. Excavation work has already been started by C. J. Cook.

RAY ROTARY FUEL OIL BURNER

The Burner with the Angular Vane Nozzle.
Installed in the largest buildings everywhere.

Diverges the flame to any desired angle.

Produces complete combustion with less air.

Increases the efficiency of any plant.

Guaranteed to burn any grade of oil.

Manufactured in over thirty different sizes.
A Burner for every purpose an oil burner should be applied to.

W. S. RAY MANUFACTURING CO., INC.
San Francisco, Calif.

WHARVES AND DOCKS

REDWOOD CITY, San Mateo Co., Cal.—City engineer C. L. Dimmitt in report to city council covering estimates of cost for proposed harbor development, places \$235,000 as approx. cost, involving a \$30,000 terminal; wharf, \$180,000; warehouse, \$22,500; spur track, \$2500. Bonds will probably be voted to finance the work.

SACRAMENTO, Cal.—Sacramento Realty Salesmen Association, endorses proposal of city to vote bonds to finance construction of municipal swimming pools.

MISCELLANEOUS BUILDING CONSTRUCTION

SAN FRANCISCO—Hugh McGill, 429 Grafton Ave., at \$2385 awarded contract by Board of Public Works to move Spanish War Memorial Monument from Van Ness Ave. and Market St. to Dolores and Market Streets.

SAN FRANCISCO, Cal.—At \$2350, Friedman & Nutting awarded contract by J. L. Phelps, Sec'y., State Harbor Commission, Ferry Bldg., for sale and removal of coal bunkers at Pier 13, including beller house, equipment and plant.

SACRAMENTO, Cal.—Will C. Wright of the firm of Wright and Kimbrough, 817 J St., Sacramento, announces the incorporation of the College Investment Company, which proposes to develop and sell 900-acres on both sides of Freport Blvd. north of the new Sacramento Junior College Building. The project will require an expenditure of \$1,000,000 and will extend over a 10-year period. A sewer system, street paving, curbs, gutters, walks, etc., will be provided. Directors of the company are: Will C. Wright, president; A. R. Galloway Jr., vice president; W. J. Rooney, secretary; Eugene Williams, assistant secretary.

OAKLAND, Cal.—Until Nov. 23, 1930 A. M., bids will be received by Geo. E. Gross, county clerk, to construct roadways, walks, steps, terraces, gateways, retaining walls and other miscellaneous work in connection with Highland (County) Hospital at 41st and Vallecito Place. Henry H. Meyers, architect, Kohl Bldg., San Francisco. Plans obtainable from county clerk on deposit of \$50, returnable. See call for bids under official proposal section in this issue.

HANFORD, Kings Co., Cal.—Until Nov. 9, 8 P. M., bids will be received by G. W. Armistead, clerk, Hanford Joint Union High School District, to erect bicycle shed at school grounds. Cert. check 10% req. with bid. Plans obtainable from clerk.

OAKLAND, Cal.—Architects Schirmer & Bugbee, Thayer Bldg., Oakland, have completed preliminary sketches for proposed municipal stadium to be constructed adjacent to the Municipal Auditorium; will be 650 ft. by 300 ft. containing two baseball diamonds, a football field and track course. The cost will range between \$50,000 and \$150,000. Seating will be provided for approximately 25,000 people. Jay B. Nash is city superintendent of recreation.

DAVIS, Yolo Co., Cal.—Poultry Division of the College of Agriculture, University of California, plans early erection of new buildings for the division at the University Farm at Davis. Two new poultry houses, each 160-ft. long, will be erected at a cost of approximately \$10,000 in addition to several c'lon houses, feed storage house, etc. Plans will probably be prepared at the Farm.

BUSINESS OPPORTUNITIES

SAN FRANCISCO—Further information regarding these opportunities may be obtained from the office of Larsen Advance Construction Reports, 818 Mission Street, San Francisco, either by phone, letter or personal call. Requests for additional information should be made to the Business Opportunities Department. Such requests must be accompanied by the Index Number of each opportunity.

D-1810—Oakland, California. Firm desires to communicate with copper and galvanizing plating plants.

D-1813—Brooklyn, N. Y. Established manufacturers of thermometers and hydrometers wish to appoint a representative to handle their products in this territory. Illustrated catalog of their manufactures is on file with the Domestic Trade Bureau.

D-1818—Dallas, Texas. Firm desires noncompetitive "quality" lines to sell in Southwest and twelve states in Mexico.

D-1819—New York, N. Y. Firm wishes to represent Pacific Coast manufacturers in the sale of their products in the Eastern States.

D-1820—Alexandria, Indiana. Manufacturers of a patented hoist for use in automobile repair shops and garages, wish to appoint a representative on the Pacific Coast.

9618—Bucarest, Roumania. Trading company wishes to communicate with Pacific Coast industrial, commercial, mining or wood exploiting institutions, with a view to exploiting the natural resources of Roumania.

IN NEW QUARTERS

Gerhardt-Kuser Co., recently organized as a copartnership by Geo. T. Gerhardt and W. L. Kuser have established offices and warehouse at 745 Bryant St., San Francisco, to handle heating specialties, furnace fittings, gas floor furnaces, grills and registers, gas, wood and coal furnaces, gas water heaters, asbestos, furnace cement and paste, and Queen Anne Home Heaters. Among the lines represented by the company are the Williamson Heater Co. of Cincinnati, Ohio, warm air registers of the United States Register Co. of Battle Creek, Mich., the Cyan Gas Furnace, Hotsteam Water Heaters, Yankee Hot Air Dampers, etc. Gerhardt formerly operated a plumbing business in the Richmond district and Kuser was connected with the Miles Sand, Gravel & Rock Co., as office manager.

OPEN SHOP SUPPORTERS GIVE WARNING ON CUT IN WAGES OF WOMEN

The Merchants' and Manufacturers' association of Los Angeles, prominently identified with the open shop movement in southern California, has issued a statement warning employers that if the United States supreme court's decision invalidating the Arizona minimum wage law for women is followed by the invalidation of California's similar law nothing could be more disastrous to the open shop movement than for any considerable number of employers to begin cutting women's wages.

Pointing out that the association has in the past steadfastly supported the minimum wage law, "believing its benefits to be greater than its defects," the statement predicts that

"If the invalidation of this law were to result in undue lowering of wages for women, the results would be far-reaching and disastrous. No greater blow could be delivered to the integrity of the open shop."

Official Proposals

NOTICE TO CONTRACTORS

(Hospital Buildings—Mare Island)

The Bureau of Yards and Docks invites attention to the fact that it will open proposals, in the near future, on Specification No. 5195, Hospital Buildings, Navy Yard, Mare Island, Calif. The work on the four buildings include Part I—General construction, including concrete piles; plain and reinforced concrete; artificial stone; brick and hollow tile work; steel and iron work; roofing and sheet metal work; steel sash; stucco; composition flooring; metal framing and lathing; plastering; marble, slate and tile work; carpentry and joinery; dumbwaiters; hardware; painting and glazing. Part II—Plumbing work including inside soil, vent, drain and hot and cold water lines; storm water drainage; interior stand pipe systems; and valves, fittings, and plumbing fixtures within the buildings. Part III—Heating and steam distributing systems within buildings, including hot water converters, hot water heaters, and pipe, fittings, drip traps, and valves. Part IV—Electric lighting and power systems and telephone conduits within each building; nurses' call system and special conduits; and service connections to outside distributing systems.

In the event that this work is of interest to your firm, you should forward to the Bureau of Yards and Docks, Navy Department, Washington, D. C. or to the Commandant, Navy Yard, Mare Island, Calif., checks or postal money orders payable to the Chief of the Bureau of Yards and Docks as security for the safe return of the drawings and specifications. Deposits are in the following amounts:—Part I, \$50; Part II, \$15; Part III, \$15; Part IV, \$15, and cash (all parts), \$75.

Inasmuch as the specifications and accompanying drawings are nearing completion, it is suggested that you submit your application as soon as practicable in order that the bidding data may be forwarded when the specifications are received from the printer.

Prospective bidders on the West Coast should make application at the Navy Yard, Mare Island, Calif., for the bidding data.

NOTICE TO CONTRACTORS

(Merced Irrigation District)

Notice is hereby given that sealed proposals will be received at the office of the Board of Directors of the Merced Irrigation District in the Bancroft Building, Merced, California, until Tuesday, November 10th, 1925, at 11 o'clock A. M., for the furnishing of the following work and material:

Schedule No. 1—Cleaning and enlargement of about 3 miles of Drainage Ditch.

Schedule No. 2—Construction of about 7 miles of Concrete Road.

Schedule No. 3—Construction of irrigation structures.

Schedule No. 4—Construction of about 2 miles of irrigation canal.

Schedule No. 5—Drilling and casing of 3 drainage wells.

Schedule No. 6—Furnishing 3 Drainage Pumps.

Specifications for said work and material can be seen at the office of said Board.

Said Board will be in session at its office at 11 o'clock P. M. of said 10th day of November, 1925, and open all proposals received in response to this notice.

The contract will be let to the lowest responsible bidder, but the Board reserves the right to reject any and all bids and readvertise for proposals or proceed to construct the work under their own superintendence.

Bidders may submit bids upon any

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS, which requires every worth-while contractor and materialman in Central and Northern California who bids on public work.

Rates: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

or all of the schedules, but no schedule will be subdivided.

A bidder to whom a contract for schedules 1 to 5 may be awarded must present bonds as provided by law, to-wit: A bond in the sum of at least one-half of the contract price to secure the payment of the claims of material men, mechanics and laborers and a bond in the sum of at least one-fourth of the contract price conditioned upon the faithful performance of the contract. The successful bidder for Schedule No. 6 must provide a bond in the sum of at least one-fourth of the contract price conditioned for faithful performance of the contract.

Each bid must be accompanied with cash or a certified or cashier's check payable to Merced Irrigation District for an amount equal to at least 5 per cent of the amount of the bid as a guarantee that if the bid is accepted the bidder will, within five days after its acceptance, enter into a contract with the District in the form attached to said specifications and furnish the bonds aforesaid.

Bids must be on the proposal forms attached to the specifications and must be in sealed envelopes addressed to the Board of Directors of Merced Irrigation District and marked to indicate that each is a proposal for the doing of said work.

Dated at Merced, California, this 26th day of October, 1925, by order of said Board of Directors.

H. P. SARGENT,
Secretary of the Board of Directors of Merced Irrigation District.

NOTICE TO CONTRACTORS

(West Side Irrigation District)

Notice is hereby given that sealed proposals addressed to the Board of Directors of The West Side Irrigation District, No. 47, West Sixth Street, Tracy, California, and endorsed "Proposal for constructing drainage canal," will be received by said Board of Directors at its office No. 47 West Sixth Street, Tracy, California, until 10 o'clock A. M., on Tuesday, the 17th day of November, 1925, and at that time and place will be publicly opened and read.

All proposals must be made upon blank forms to be obtained from J. C. Chrisman, Secretary of the Board of

Directors at his office and must give the price proposed, both in writing and in figures and must be signed by the bidder with his address.

Each bid is to be presented under sealed cover and must be accompanied by cash or certified check made payable to The West Side Irrigation District, in an amount equal to five per cent of the amount of the bid and no bid to be considered unless such cash or check is enclosed therewith, and also, no bid will be considered unless in strict conformity with the plans and specifications. Should the successful bidder to whom the contract is awarded fail to execute the same, such cash or check shall be forfeited to and become the property of the district.

All other cash or checks will be returned to the unsuccessful bidder who submitted the same.

A common law bond will be required for the faithful performance of the contract in a sum not less than twenty-five per cent (25%) of the contract price, and a further bond in the sum of not less than fifty per cent (50%) of the amount of the contract price must be furnished with acceptable sureties to secure the payment of laborers, materialmen, etc.

The contractor to whom the contract may be awarded will be required to appear at the office of the district with sureties offered by him and execute the contract within ten (10) days not including Sundays, from the date of notification of such award and the preparation and readiness of the contract for signature and in case of failure or neglect so to do, he will be considered as having abandoned it, and said forfeiture of cash or certified check will operate. All bids to be compared on the basis of the district's engineer's estimate of the approximate quantities of work to be done as follows:

Item No. 1. Lump sum amount for furnishing all labor, implements, tools, machinery, apparatus, and supplies required to move, 52,000 cu. yds. of dirt in the construction of the drainage canal. The Board of Directors of The West Side Irrigation District reserves the right to increase or decrease the quantities involved as the best interests of the district may require.

The contract is to be entered into and the work is to be done in accordance with plans and specifications heretofore adopted by the Board of Directors.

Plans and specifications can be seen at the office of the Board of Directors and together with form of proposal may be obtained from J. C. Chrisman, Tracy, California, and are on file at the office of the Secretary of the District.

The right is reserved to accept the proposal to the lowest responsible bidder or to reject any or all bids. The work to be done under the direction of the Engineer of the District and approved by the Board of Directors.

Done by order of the Board of Directors of The West Side Irrigation District, this 20th day of October, 1925.

JOHN C. CHRISMAN,
Secretary of the Board of Directors of The West Side Irrigation District.
Tracy, California.
(SEAL)

CRITTENDEN & HENCHI,
Attorneys for The West Side Irrigation District, 204 American Bank Bldg.

Emmett H. Lane has been appointed city electrical inspector of Turlock, succeeding Chas. Mahon, resigned. Other applicants for the position were S. A. Henderson and H. C. Jackson.

A petition containing 500 names has been filed with the city council at Porterville seeking the appointment of a city manager.

P. henders and seal coat. 1911 Act and Bond Act 1915. Cert. check 10% payable to city req. Plans obtainable from A. J. Wagner, city engr.

The officials of the New Jersey department of institutions and agencies appear to have found it necessary to respond defensively to the criticism which they have evidently merited for employment of convict labor. Following is the reproduction of a recent newspaper despatch from Trenton:

Commissioner Burdette G. Lewis of the State Department of Institutions and Agencies came to the defense of convict labor today. Even though the work of paving a six and one-half mile stretch of state highway between Toms River and Forked River is several weeks behind schedule, he said that the money saved on the contract more than justified the employment of convict labor on such projects. By the use of state-owned equipment, he declared, the cost of trucking alone had been cut about one-third.

"Everything, including the clean-up work, should be completed this month and most of the men transferred to the proposed new road between Whitehouse and Lebanon," said Mr. Lewis in a report to Ellis P. Earle, president of the state board of control. "We believe this completed work is a sufficient and ample answer to the absurd statements that were made about this work during its progress. Obviously the state has saved about \$24,000 with prison labor, which does not include the board and keep of the men and the cost of some additional equipment which has been purchased."

It appears from this statement, in the first place, that there has been delay in completion of the work against which there is no protection, as there never is where government production or activities ousts the private contractor engaged in government work. In the second place, the declared saving fails to take into account "the board and keep of the men and the cost of some of the additional equipment." The distinction and the amounts are not vital either one way or the other.

While it might be said that convicts inevitably cost a definite amount for maintenance and constitute a fixed and enduring charge against the government, met from the taxes received from

the people, it is also observed that their employment in competition with the freer sort of labor is not helpful to the cause of thrift of the members of the community. It is as far as possible removed from a contribution to the industries of the state, from the encouragement of the investment of private capital and from the employment of citizens capable of performing the labor, in many instances badly in need of it.

It may mean a saving to employ convict labor on any terms in the construction of public roads, public buildings and public works generally, especially if the comparative statistics are left to the ingenious compilation of the advocates of that method of separating the labor and capital of a state from the legitimate opportunities for its application.

There is something more appealing in the philanthropic plea that work of this kind and of any kind is desirable for convicts because it is more humane to keep them occupied than to maintain them in idleness. Among prison reformers this has been one of the most practical of many silly schemes to which they give themselves with unabated ardor. For that suggestion they are entitled to be forgiven, without necessarily the adoption of their recommendation, because they are looking at the situation from one point of view and with sublime disregard for any other angle of observation.

But there is nothing to be said in favor of employment on public works of convict labor in order to save public funds to the exclusion of citizens who are out of jail and who are entitled to have their individual industry, either as employee or employer, protected and encouraged by the state. It is their money, derived from taxation, that is being "saved" by the substitution of convict for free citizen labor and it is their enterprise, organization and capital that are being penalized and paralyzed by the same token. It is a "saving" that does not save in the end.—U. S. Government advertiser.

Architects—Engineers— City and County Officials

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to

SERVICE

At the end of life we shall not be asked how much pleasure we had in it; but how much service we gave it; not how full it was of success, but how full it was of sacrifice; not how happy we were, but how helpful we were; not how ambition was gratified, but how love was served.

Service to one's fellowmen is the greatest thing in the world, because it is founded on love and love is the greatest good, the "summum bonum"

DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details—but it's *strong, rugged*—it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

U. S. DRAFTSMAN EXAMINATION

The U. S. Civil Service Commission, Washington, D. C., announces an examination will be held shortly for the position of senior architectural draftsman to fill a vacancy in the office of the Supervising Chief U. S. Engineer, New York, N. Y., and vacancies in positions requiring similar qualifications. The entrance salary is \$1860 a year. Full information and application blanks may be obtained from the United States Civil Service Commission, Washington, D. C., or the secretary of the board of U. S. civil-service examiners at the Post Office of custom-house in any city.

ROADS PRESIDENT CHOSEN

At a meeting of the nominating committee held in New York, Henry G. Shirley, chairman of the Virginia State Highway Commission was unanimously chosen as president for 1926-1927 of the American Road Builders' Association, the oldest and foremost organization identified with the good roads program in this country and the sponsor of the great good roads convention and exposition to be held in Chicago, January 11-15, next.

HARDWOOD INTERESTS JOIN MOVE FOR STANDARDIZATION

Secretary Hoover has been advised that action has been taken by the hardwood lumber industry which has resulted in this branch of the lumber trade joining with the other branches for united support in the elimination of waste and standardization of lumber. This marks the complete support of the entire lumber industry to the establishment of uniform standards and grades for the protection of the consumer, and further, for the elimination of waste in the utilization of our wood resources.

Seven years of work in this direction on the part of the industry reached its climax at a conference of hardwood interests in Chicago, when resolutions were adopted pledging the influence and support of this group to "earnest and sincere support to the program of standardization" as conducted by the Central Committee on Lumber Standards and the Department of Commerce.

Under the terms of the resolutions the duties of respective groups in the hardwood lumber industry were defined as to associational activities and to the promotion of inspection service and grading rules. In subsequent meetings of directors of the leading organizations in the hardwood field, the action of the Chicago meeting was officially ratified.

Hardwood lumber standardization, with its accompanying conservation and economies in forest utilization, are expected to make possible an eventual saving of 20% of the hardwood timber resources, a factor of great importance to the construction, automobile, furniture, farm implement and other wood using industries.

Secretary Hoover said: "It is a matter of the greatest significance to the commercial and industrial community of our nation when an industry which has so wide ramifications as that of the hardwood lumber industry unites all of its elements to undertake a job for the common good of the manufacturer, the distributor and the consumer, as well as for the conservation of our national forests. I am deeply gratified at this turn of events."

A striking outcome of railway congestion and embargo on building materials in Florida is found in the fact that some lumber dealers find it easier to get Washington and Oregon lumber to Florida by boat than to obtain nearby southern and even Florida lumber. Two steamers are now discharging five million feet of Pacific Coast lumber at Tampa, other vessels are discharging at Jacksonville. Hollywood, Fort Lauderdale and Miami about ten million feet of Pacific Coast lumber, as well as equal amount of North Carolina and southern pine from Norfolk, Virginia, Savannah, Georgia, and intermediate ports. The situation threatens to be further complicated by the longshoremen's strike at Tampa, which, if it extends to other Florida ports, will cut off the relief that has been afforded by water transports.

IRRIGATION IN CALIFORNIA

The condition of agriculture in the irrigated districts of the state must determine the advisability of increasing the agricultural production. Professor Charles H. West, assistant agricultural economist in the Experiment Station at the University of California told the joint meeting of the Irrigation and Agricultural Sections of the Commonwealth Club in San Francisco. The farmer should have fair prices before expansion of the irrigated lands is proper, he said.

Compilations of statistics made by Professor West show the irrigated area in California was 4,700,000 acres in 1924, an increase of half a million acres since 1919. If the rate of increase from 1909 to 1919 has occurred for the period from 1919 to 1924, the irrigated area would have been five million acres, said Professor West.

"Since 1919 the tendency has been to improve projects already begun," said Professor West, "by lining canals and constructing storage facilities. Few new projects have been started, consequently the ratio of the irrigated land to the present irrigable area provided with irrigation facilities is increasing, and it is estimated at approximately 75 per cent. Whether this is a good or a poor ratio is of especial interest. Has the rate of construction of our projects outdistanced the rate of increase of irrigated area? By comparing present conditions with those of the past in California, it appears to be a better condition that has at times existed and compares favorably with other states. This ratio does not imply that new irrigation projects should be encouraged. The condition of agriculture in these irrigated areas must determine the advisability of increasing the agricultural production. The farmer should have fair prices before expansion is proper."

The data compiled by Professor West are to serve as a basis for the committee of the irrigation section of the Commonwealth Club and the committee of the American Society of Civil Engineers to decide whether irrigation in California is over developed.

HOME CELLARS IN AMERICA PUT TO NEW USES

More than \$2,000,000,000 is at present invested in the cellars of existing American homes and at the present rate of dwelling construction \$300,000,000 is being invested annually in cellar construction by the home builders of the United States, according to the Architectural Forum, which has instituted a movement to make the cellar a useful and attractive part of the dwelling. Suggestions are being received by that magazine covering the varied possible uses of cellar space. Plans already received suggest billiard rooms, game rooms, play rooms, radio rooms, music rooms and dens.

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

ALONG THE LINE

October building operations in Berkeley swelled the year's total to date to \$8,611,315 and assures the city a new construction record. The increase last month over October, 1924, was \$119,229. The ten months' total equals the entire year of 1923 and runs more than \$2,700,000 above the year 1922, both former banner years. October building showed a substantial increase in all classifications as compared with the same month a year ago. There were 165 permits issued for one-story dwellings having a total estimated cost of \$260,974 against 93 permits for homes costing \$326,250 in October, 1924. Two-story dwelling permits numbered 19 and had an estimated cost of \$150,350. Apartments and flats showed a gain of \$13,000 and stores and apartments \$73,750.

Higher rates on lumber from the Pacific Northwest to southern destinations have been ordered by the interstate commerce commission in dismissing the complaint of the West Coast Lumbermen's Association. The increases range from 2 to 45 cents per 100 pounds and become effective November 21. The commission had investigated the proposed rates which apply through tributaries fixed with Denver, Colo., as a base on the lines of the Louisville & Nashville, and the Gulf, Mobile and Northern.

A plan of certification for residence construction, the purpose of which would be to protect the home buyer from "jerry" building, and give him an assurance of the staying qualities of the house he is purchasing is under consideration by the Louisville, Kentucky, real-estate board.

M. C. Woodruff, city building inspector of San Jose, reports building construction in that city for the month of October totaled \$446,229. The permits allowed for new buildings covered a total valuation of \$226,580, while the additions and alteration permits covered \$219,649 worth of work.

Offering for sale 10,000 acres of timber on a large tract in the Mescalero Indian reservation in New Mexico has been authorized by Secretary of the Interior Works. The area contains approximately 175,000,000 feet, board measure, of western yellow pine, Douglas fir and other species of timber.

The United States supreme court has refused to reopen the Maple Flooring Association case, saying "the public interest is served by gathering and dissemination, in the widest possible manner, of information regarding production, distribution, costs and prices."

An ordinance providing for electrical inspection in all unincorporated communities of Contra Costa county will be proposed to the board of supervisors following a meeting of the Contra Costa Electrical Development league at Martinez.

Mayer Croyer of Los Angeles has approved the new city ordinance which requires power shovels to be muffled when operated within 600 feet of a school or sanitarium. The ordinance will become effective about Nov. 23.

Announcement is made by F. A. Leach Jr., vice-president and general manager of the Pacific Gas & Electric Company, that orders have been approved for the construction of Pit No. 4 dam and intake on the Pit River in Shasta county. The diversion dam is to be located about one and one-half miles down stream from the pit No. 3 power house which was placed in operation July 18, of this year. Construction of this dam calls for an expenditure of \$1,750,000 and the cost of the entire pit No. 4 project, exclusive of railroad and transmission lines is estimated at \$14,500,000. About ten miles of additional railroad construction, costing \$530,000, will be extended from the pit No. 4 power house down the Pit River Canyon to the pit No. 4 power house site.

August G. Headman, San Francisco architect and founder of the San Francisco Architectural Club and a leader among men of his profession, died at his home Wednesday, October 28, at the age of forty-two years. Death came after an extended illness following an operation last December. Mr. Headman leaves a widow, Mrs. Irene Headman, a stepson, Jack Flint Headman; a father and mother, Mr. and Mrs. A. Headman, and three brothers, Sasha Headman of Tucson, Ariz., Cecil and Bruce Headman of San Francisco.

Wm. G. Clyde succeeds Homer D. Williams as president of the Carnegie Steel Company, a subsidiary of the U. S. Steel Corp. Clyde was formerly senior vice-president and general manager of the company. Williams resigned from the Carnegie Steel Company to assume the presidency of the Pittsburg Steel Company.

American Legion seeks to secure from the state the defunct state home for delinquent women at Sonoma. Legion proposes to spend approximately \$100,000 in remodeling the buildings for an orphanage to be operated by the organization.

Oakland reports the issuance of 1291 building permits during the month of October, of these 1090 being for new structures costing \$3,234,591 and 204 permits for additions, alterations and repairs to standing structures costing \$76,601.

Palo Alto building permits for October totaled \$235,815 as compared with \$140,708 for the same period in 1924. During the month 26 permits were granted for homes costing \$124,759 and 4 for business structures costing \$63,429.

Martinez building permits for the month of October totaled \$65,025. During the month fourteen permits were issued for residence construction. The September operations totaled \$83,850.

Plans are progressing in Berkeley for the organization of a builders' exchange, according to Wm. C. Tooe, who claims building and real estate interests favor such an organization.

At San Francisco on November 9th and 10th, and in conjunction with the All Western Road Show, will be held the annual meeting of the Western Association of State Highway Officials. This meeting was called by President Geo. W. Borden, Nevada State highway engineer, and is being held for the purpose of discussing mutual problems, the future of federal aid and other matters. This western association is the official organization of the executive officers of the highway departments of the eleven western states and in the past has accomplished much in the way of federal aid legislation and uniform policies of procedure among the states.

Wm. B. Lawrence, 53, superintendent of the Spring Valley Water Company, and widely known public utility official, died suddenly in Millbrae Nov. 2. He was seized with a heart attack. Mr. Lawrence was born in San Francisco in 1866 but spent his life in San Mateo county where he served six years as a county supervisor and city trustee of San Mateo.

Thomas J. McClure Jr., former assistant city engineer of Tulare and until recently in the engineering and surveying business for himself in that city, died in a Stockton Hospital, Oct. 30, following an illness of several weeks duration. He was the son of Thos. J. McClure, former federal judge and is survived by his wife, a son, Kenneth, three brothers and one sister. Burial took place at Santa Barbara.

Chapters of the Associated General Contractors from Portland, Spokane, Seattle, Denver, Salt Lake and Los Angeles will send almost their entire membership to the All-Western Road Show to be held in San Francisco, November 9 to 14, according to P. H. Curtis, executive secretary in San Francisco.

Emery A. LaValle, formerly with McMorie & McLaren, landscape engineers of San Francisco, has opened offices in the First National Bank Bldg., Monterey, and will engage in landscape engineering.

E. L. Van Cleeck, Santa Cruz architect, dropped dead in the First National Bank in that city, Oct. 26. He was a Mason and Elk and for many years was a vestryman of the Calvary Episcopal Church.

The Marin Municipal Water District, by a vote of six to one, authorized the sale of bonds totaling \$1,500,000 to finance construction of extensions and improvements to the present water distributing system of the district.

Election will be held in the Montague Irrigation District, Siskiyou county, November 16, to vote bonds of \$1,325,000 to finance construction of irrigation works.

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

ARCHITECT, CLIENT AND CONTRACTOR

The Circular of Advice issued by the American Institute of Architects contains the following:

The architect's relation to his client is primarily that of professional adviser; this relation continues throughout the entire course of his service. When, however, a contract has been executed between his client and a contractor by the terms of which the architect becomes the official interpreter of its conditions and the judge of its performance, an additional relation is created under which it is incumbent upon the architect to side neither with client nor contractor, but to use his powers under the contract to enforce its faithful performance by both parties. The fact that the architect's payment comes from the client does not invalidate his obligation to act with impartiality to both parties.

MORE GEOPHYSICS

The Canadian scientist who was afraid that possibly the depletion of the Great Lakes by Chicago might be causing all these earthquakes has his match in the colored minister reported, as follows, in "Wayside Tales":

"Breddren and sisters, we have received annuder warnin of Providence. De earf, breddren, revolves on its axles, an' it takes a right sma't ob grease to keep it lubricated. So de good Lord put petroleum inside de earf to keep de axles greased.

"Den, bye an' bye, long come all dese hyah ile companies, punchin' holes in de ground clear down into de bearin's and quensecently all de ile come squirtin' out. Fust thing we know dere's a hot box an' de earf squeaks an' rumbles an' grunts an' dat's de earthquake. If dey don't quit it purty soon dere won't be no moah grease left, an' de earf will stick tight on its axles an' won't go round no moah."

ROCK AND SAND DEALERS TO MEET IN CONVENTION

An important feature of the All-Western Road Show, to be held at San Francisco the week commencing November 9, will be the first annual Convention of the rock, sand and gravel producers of the eleven Western states. This will be held under the auspices of the Pacific Coast Sand & Gravel Association, of which E. Earl Glass is manager. The rock men's conference will be held the afternoon of November 13. J. G. V. Clarke of Los Angeles is president. The program is headed by T. R. Barrows, secretary of the National Sand & Gravel Association of Washington, D. C., who will speak on the benefits of associated activities in the sand and gravel industry. E. Earl Glass will present a paper on "Ton Measurement vs. Yard Guessing."

Market Agency of Lumbermen To Be Located in San Francisco

The formation of the Sugar Pine Sales Association, virtually a competitive marketing association for the sale of sugar pine lumber, its members being most of the manufacturing mills of the state, is about complete.

The association, which will handle from 75 to 90 per cent of all the sugar pine lumber produced in the state, and will combine the sales energies of the Sugar Pine Lumber company of Fresno, the Madera Sugar Pine Lumber company of Madera, the Yosemite Lumber company of Merced Falls, the Standard Lumber company of Sonoma, the Packer Lumber company of Tulum, the Michigan California Lumber company of Camino, the Red River Lumber company of Westwood, the McCloud Lumber company of McCloud and several others.

Its purpose will be for the advertising and sale of sugar pine, which is a lumber for limited and definite uses, such as pattern making, etc. In carrying an advertising campaign into the local and eastern markets, the lumber will be in competition with other lumbars from other places, and so, while a virtual monopolistic control of the product of this state is held by the

association, it can only market along definite economic lines, without any attempt at price control.

Assessments are to be made against the lumber sold for advertising purposes, and the association plans to handle only the better grades of sugar pine lumber, in order that it may establish a reputation for quality of product.

The purposes and the setup of the association will be remarkably like the Sunland Sales Cooperative association, which handles raisins, dried peaches and dried figs. The policies of the association are to be controlled by an executive committee, made up of representatives of each of the mills in the association.

It is anticipated that the association will handle between 110,000,000 and 125,000,000 feet of lumber annually, at a value of between \$7,000,000 and \$10,000,000.

The executive offices of the association are to be located in San Francisco. It is understood that application has been made for incorporation papers, and that these are now on file in the office of the corporation commissioner.

Important Subjects Will Feature Building Trades Employers Meet

What promises to be one of the most representative and beneficial conferences of building contractors ever held is scheduled for the Congress Hotel, Chicago, Illinois, November 17.

The conference is being called by the National Association of Building Trades Employers and will be open to all contractors and others interested in the labor problem of the construction industry regardless of whether or not they are affiliated with the Association or any other organization. Invitations are being sent to the secretaries of the leading local, state and national associations in the industry with the request that each organization be represented with a large delegation, the members of which are thoroughly familiar with the particular problems of their community, or the specific branch of the industry they represent. Acceptances of the invitations, to date, indicate that the majority of the larger cities of the country will be well represented at the conference.

The purpose of the meeting as outlined in the prospectus which has been sent out is, "to discuss a number of mutual problems so that each city may be properly informed on the opinions and attitudes of the others regarding these vital questions in the hope that the interchange of ideas and information will better fit each city to handle its own negotiations."

Among the questions which will be discussed at the conference, according

to the prospectus are the following: Wage rates for 1926 in the building trades; availability of labor and results of the apprentice training movement; the five day week in the building trades and building outlook for 1926.

A similar conference was held in Cleveland last January and was so successful, through demonstrating the need for frequent gatherings of contractors to discuss mutual problems, that it was decided to hold a meeting this Fall, prior to the opening of new wage negotiations.

Obviously a conference of this character can not establish a definite nation-wide program, but it can if representative, through the general exchange of ideas and information, crystallize a sentiment on a national basis which will be beneficial to the public, to every city represented and the entire building industry.

JOINS EXCHANGE

The Republic Truck Sales Company of Northern California, with headquarters at 2445 Sixteenth Street, San Francisco, has joined the San Francisco Builders' Exchange and will be represented on the floor by Mr. E. M. Grant. The company carries a complete line of 1 1/2, 2, 3 and 5-ton trucks.

DRY-ROT IN BUILDINGS

California home owners should get acquainted with the work of fungi, those plant organisms which cause the decay of wood, according to Emanuel Fritz, Professor of Lumbering in the Division of Forestry of the University of California. Professor Fritz says that because of improper design or improper care of a home or other wooden structures, these fungi are likely to cause the owner considerable loss.

"We receive many requests," says Professor Fritz, "from the owners of homes, factories, and even 'movie' houses for advice in controlling the spread of the decay in their structures. In each case the remedy is simple though it may, in some cases, be costly. The fungus causing the decay or disease of the wood is a low order of plant life which absorbs or eats portions of the wood cells for its food. There are many fungi which prey upon wood but those giving the greatest trouble are the dry-rot fungi, so called because their work transforms the wood into a dry, brown mass which crumbles to a fine powder when crushed between the fingers.

"All fungi require a certain amount of moisture and warmth to live. If the supplies of these reach certain minima the fungus can not develop. Food, for example, when stored in an ice-box will not rot. Obviously, a house can not be kept so cool as to arrest the growth of fungi, but it can be kept dry. The simplest remedy therefore is to keep all wooden portions of the structure away from contact with the moist soil. The sills should be a foot or more above the ground surface and should be laid on concrete or stone. When a new building is completed, especially where there is no basement and the floor joists are close to the ground, the contractor or owner should make certain that no refuse, sticks, or boards project from the ground to a wooden member. Decay is transmitted through such refuse to a house. Furthermore, under-the-house spaces should be well ventilated to promote dryness. Leaky plumbing and rain conductors or the spraying from the garden hose are also prolific sources of moisture to give fungi their start.

"Dry wood will not rot and will last indefinitely. But once started, the decay may spread over a large area before being detected, in which case drastic means for eradicating it are fully justified. First of all, the decayed wood must be cut out and along with it much of the adjacent portions even though they appear to be sound wood. This latter is important as the roots of the fungus penetrate the wood far in advance of the more apparent rot. The portions removed should be burned. The design responsible for the entrance or holding of water should be corrected or the source of the offending moisture removed. The repairs should be made with sound wood, preferably of a durable species.

"Sometimes it is desirable to spray the ground and old wood surfaces with a preservative like zinc chloride or creosote, or to use new lumber that has been thoroughly impregnated with such preservatives. The old adage, 'An ounce of prevention is worth a pound of cure' is particularly true in the case of a house if it is to be kept free from decay. Keep the wood dry and it will not rot."

Data to Obtain Quantity of Materials for Concrete Mixtures

(Compiled by Wm. H. Kritzer, San Francisco)

Assuming one sack of cement as one cubic foot and weighing approximately 95 pounds. One barrel as 4 cubic feet and weighing approximately 380 pounds. Concrete or conglomerate, gravel, limestone, sandstone, trap rock, etc., averages about 150 pounds per cubic foot. Cinder concrete about 112 pounds per cubic foot.

"Fuller's rule" for the obtaining the amount of each material required to build 1 cubic yard of concrete is.

Let B. represent the number of barrels of cement.

Let C. represent the number of parts of cement.

Let G. represent the number of parts of gravel or stone.

Let S. represent the number of parts of sand.

$$\begin{aligned} \text{Then } B &= \frac{11}{C \times G \times S.} \\ S. &= \frac{P. \times S. \times 3.8}{27} \\ G. &= \frac{B \times C \times 3.8}{27} \end{aligned}$$

For example: Let unity represent the portions of cement, expressing the other parts correspondingly.

1 part of cement = 1
3 parts of sand = 3
3 parts gravel, stone = 5

$$\text{Then } B = \frac{11}{1 \times 3 \times 5} \text{ or } 1.22.$$

$$\text{Then } G = \frac{1.22 \times 5 \times 3.8}{27 \text{ Cu. Ft.}} \text{ or } .858$$

$$\text{Then } S. = \frac{1.22 \times 3 \times 3.8}{27 \text{ Cu. Ft.}} \text{ or } .515$$

Using 1-in. crushed rock and under with all dust screened out and coarse sand, one cubic yard of rammed concrete will require the following quantities of material:

Bbls of Cement.	One Sack	Cu. Yds. Sand	Cu. Ft.	Cu. Yds. Stone.	Cu. Ft.
0.77	1	0.47	4	0.93	8
0.80	1	0.49	4	0.91	8
0.83	1	0.51	4	0.89	7 1/2
0.87	1	0.47	3 1/2	0.93	7
0.95	1	0.50	3 1/2	0.87	7
0.91	1	0.42	3	0.97	6
1.01	1	0.46	3	0.92	6
1.11	1	0.51	3	0.85	6
1.26	1	0.58	3	0.77	4
1.19	1	0.46	2 1/2	0.91	5
1.27	1	0.48	2 1/2	0.87	4 1/2

OCTOBER BUILDING IN SAN FRANCISCO TOTALS \$4,351,249

One thousand and fifty-seven building permits were issued during the month of October, 1925, according to Chief Inspector of Buildings John P. Horgan of the Department of Public Works. Improvements undertaken during the month totaled approximately \$4,351,249, Horgan reports. For the same period in 1924, records of the department show, 818 permits for improvements valued at \$6,116,313. For September, 1925, the totals were 902 permits and \$3,153,082. Following is a segregated report of the October building operations as compiled by Chief Inspector Horgan:

Class	No. of Permits	Est. Cost
A	4	\$ 932,272
C	22	516,600
Frames	466	2,133,307
Alterations	563	483,595
Public Bldgs.	1	274,475
State Bldgs.	1	11,000
	1057	\$4,351,249

DELONGCHAMPS A MIAMI VISITOR

Fred J. DeLongchamps, architect of Reno, Nevada, has returned from a vacation during which he visited Miami, Florida, heart of the Florida land boom. During a one-day visit he said that more than \$1,000,000 in property changed hands at Coral Gables, the home of the late William Jennings Bryan. While he believes that the Florida boom is built on a firm foundation, DeLongchamps said he had no intention of making a residence there.

BARBER ASPHALT STATE INTERESTS ARE SOLD

All the California assets of the Barber Asphalt Paving Company in the state of California, comprising principally real estate obtained on foreclosure proceedings, miscellaneous claims of the company, and street improvement bonds in various California municipalities, has been purchased by L. A. Dreisbach, attorney of Oakdale, Cal., the consideration not being made public. A few years ago these assets represented, it was learned, a value considerably over one million dollars. Dreisbach has been the California representative of the Barber company for the past seventeen years, and has been attending principally to the legal work of the concern in this state. Beginning with 1916 the company began a period of retrenchment as far as construction work is concerned, throughout the United States, devoting their energies entirely to the manufacture of asphalt and paving materials and equipment, leaving the construction field to contractors.

SACRAMENTO BUILDING

Ben H. Covell, Sacramento city building inspector, reports the issuance of 333 building permits during the month of October, the total expenditure registering \$655,226, bringing the total operations for the past ten months to \$8,880,322 as compared with \$6,921,665 during the same period in 1924. During the past month 102 permits were granted for one-story residences costing \$323,665.

TRADE NOTES

The E. C. Buehrer Co., distributors of shipping room supplies and handling equipment, 200 Davis St., San Francisco has been appointed California distributors for D. W. Onan & Sons of Minneapolis, Minn., manufacturers of a light inexpensive portable saw that may be used for such general purposes as packing, crating, box resizing, general carpentry work and lumber salvage or scrap cutting. The E. C. Buehrer Company is also representative and distributor for the Economy Baler Co., manufacturers of baling presses; Crowe Name Plate & Mfg. Co., etched and lithographed name plates and the Barret-Cravens Co., manufacturers of industrial tractors, lift trucks, portable cranes, derricks and elevators; and are manufacturers of stencil inks and brushes.

The Climax Engineering Co., Clinton, Iowa, announces the appointment of the Coast Machinery Corp., San Francisco, as sales representatives covering the entire state of California. Ed. Crowley, recently general sales manager of the Climax Engineering Co., is the president of the Coast Machinery Corp. Other appointments of new dealers by the Climax company are: George W. Whitehead Co., Buffalo, for Western New York; Edward C. Dingman, Montreal, Canada, for Montreal and vicinity; Harvard Turnbull & Co., Ltd., Toronto, for Ontario; Advance Contractor Repair Co., Chicago, for the Chicago territory; Mine & Smelter Supply Co., Salt Lake City, for Utah.

Rotary Oil Burner Company of Los Angeles has purchased 10,000 square feet in Emeryville and will start at once on the erection of an assembling and distributing plant to cost \$25,000.

Julius C. Born and Ernest A. Reed, operating at San Anselmo, under the firm name of Marin Sheet Metal Works, announces dissolution of partnership. Born will continue to operate the business.

Sunset District Building Co. of San Francisco, capitalized at \$10,000, has been incorporated with the following as directors: H. A. Sala, G. A. Sala, J. W. Stryker and Elizabeth W. Stryker.

Huddart Company has acquired space at Murray avenue and Southern Pacific tracks, Berkeley, and plans to establish a lumber yard. The company will invest between \$30,000 and \$40,000.

The Price-Peltz Company announces associati n with the Waterhouse-Wilcox Company, handling building specialties, with headquarters at 523 Market Street, San Francisco.

Arthur Parsons and R. A. Currie will operate under the trade name of Pacific Sheet Metal & Furnace Company with headquarters at 3200 Geary street, San Francisco.

Construction has started on a two-story reinforced concrete warehouse at Eighteenth street and Potrero avenue, San Francisco, for A. L. Greene Company, paint and oil dealers.

92 CARLOADS PER DAY IS ACME PLANT CAPACITY

The Acme Gravel Company is the latest addition into the building material field in San Francisco.

Strategy is a great principle, not only in war but also in business. The bunkers of the Acme Gravel Company are located with that point in mind—at the foot of Leavenworth street and at Army street and Potrero avenue. From either plant it is only a 15-minute drive to Market street.

While the name of the company is new, there is a vast deal of experience and reputation behind it. The material, which the Acme Gravel Company sponsors has been used in such prominent structures as the Twin Peaks Tunnel, Municipal Auditorium, Standard Oil Bldg., Matson Navigation Bldg., P. G. & E. Bldg., and other structures.

The Acme bunkers are the largest and most modern in Northern California. They were designed by a prominent engineer and are of substantial construction. The weight of each is equivalent to that of an eight-story reinforced concrete building.

Each Acme plant is equipped with the most modern type of conveyors and has a capacity of 46 carloads a day.

The Acme Gravel Company opened for business in San Francisco, equipped with automatic weight recording scales furnishing a printed weight ticket with each load. Since then San Francisco has gone from a yardage to a tonnage basis, so that the buyer knows what he pays for and can eliminate "eye measure" from his calculations.

MONOLITH CEMENT CORPORATION LEASES LAND

Calling for payment of a minimum royalty of \$39,000 annually, a 100-year lease of valuable lime rock and clay lands at Tehachapi has been acquired from L. M. Jameson Corporation by the Monolith Portland Cement Corporation, lease papers being filed with Charles Shomate, county recorder.

Nearly 2000 acres of clay deposit are leased in the agreement by the Monolith, specifying all of sections one, twelve and thirteen; and the north half of section 11-32-33, and all of section 7-32-34.

The Monolith interests are to pay Jameson Corporation a royalty of 5 cents per barrel shipped from the big cement plant during the term of lease and agree on a minimum royalty of \$3750 a month.

The Monolith Corporation agrees to give to the Jameson interests all lands in the area of 32-34 south of the railroad tracks and east of the west half of sections 30 and 31-32-34; and the lessor and lessee grant to each other the right of way for railroads to be built on both lands.

The Jameson corporation holding other lime deposits other than those leased to Monolith, includes in the agreement a clause whereby if it uses any rock or clay from the lands mentioned, the Monolith corporation is to receive a royalty of \$2 a ton. In the same papers, the Jameson corporation sells for \$5000 all buildings, tanks, pipelines and improvements on sections 12 and 14-32-33, to the cement company.

S. Gonzales has been named city engineer of Petaluma, succeeding Ed. Grove, whose position was declared vacant by the city council at a recent session.

Pacific Lime and Plaster Plant Inspected by S. F. Material Dealers

An invitation to visit one of the best equipped and most up to date lime producing plants this side of the Mississippi Valley was extended to the members of the Building Materials Dealers Association of San Francisco and their wives by Mr. Chas. Cadman, general manager of the Pacific Lime and Plaster Co. The party was arranged for Saturday and Sunday, Oct. 24th and 25th. The following made the trip: Mr. and Mrs. Chas. Cadman, Mr. and Mrs. R. E. Tremoureaux, Mr. and Mrs. Stephen I. Guerin, Mr. and Mrs. W. J. Feary, Mr. and Mrs. C. E. Barrymore, Mr. and Mrs. P. L. Hatch, Mr. Jerry Nunan, Mr. Chas. Meyers, Mr. James White.

On arriving at the Hotel Victoria at Sonora, Saturday evening, the party was met by a delegation of business men of Sonora headed by Mr. June Knowles who suggested several wonderful side trips to be taken before the banquet they had arranged for later in the evening. The entire party made the round trip to the town of Columbia, once a busy mining town of

inspection of the plant began at the special laboratories where every run of lime rock from the time it is mined in the quarry is tested until after turned out as a finished product. One of the most interesting spots in the place was the trip through the mines. The lime rock is taken from one of the hills in exactly the same method as in a gold mine, tunnels running in all directions and miners with their little lamps taking out the pure lime rock and sending it in cars to the storage bins at the kilns. The tunnels are very large and of sufficient height to allow anyone to walk around in a standing position and with plenty of room to spare. Mr. Tremoureaux was responsible for the laying out of this method of getting lime rock and it is considered one of the best mining projects in this part of the country as not a piece of bridging or timbering is used in any of the tunnels.

The next stop is at one of the open face quarries. On this day the guests were treated to a sight of one of the largest blasts set off in many years.

The above picture shows members of the Building Material Dealers Association of San Francisco who inspected the plant of the Pacific Lime and Plaster Company. Reading from left to right are Frank Hatch, Roy Tremoureaux, Billie Feary, Chas. Cadman, Steve Guerin, Jack Moeline, C. E. Barrymore, and Chas. Meyers.

over 3000 population and now having only 300 but still rich in land marks and interesting stories of the early days. One of the interesting sights on this trip, more especially to members of the building industry, was the first store of Mr. J. B. Stetson, now the firm of H. Ilbrook, Merrill and Stetson of San Francisco. It is a small one-story frame shack about 50 by 75 ft. It was at this store the miners of that day bought all their tools.

Saturday evening was spent in dancing and entertainment, the music being furnished by the Pacific Gas & Electric Co. division office at Sonora.

Sunday morning the entire party left by automobile for the plant, a distance of about two miles from the town of Sonora. The first view one gets on the arrival at the plant shows the magnitude of its operations. The warehouse, the coverage plant, the loading platforms, the oil storage all combine to give one the idea of what to expect on going to the plant proper. Under the guidance of Mr. Chas. Cadman, general manager, and Mr. Roy Tremoureaux, mining and consulting engineer in charge of operations, the

Thousands of tons of lime rock were moved.

The kiln department was next in line. This contains nine large oil burning kilns operating 24 hours a day every day in the year turning out a perfect white finished lime. The new hydrating plant was completed about a year ago. This is in a separate building, away from the kilns and every method and machine for testing and checking the operation from the start to finish is installed in this building, making it impossible to get anything but a perfect product.

The entire party in completion of the inspection tour agreed that no expense was spared to construct this plant to insure a perfect product and the members of the association felt that a trip of this kind was of great benefit to them in knowing more about the product they market.

Mr. Stephen Guerin, president of the association, thanked Mr. Chas. Cadman on behalf of the association and for each of the party present for the wonderful trip and the manner in which the arrangements were handled for the convenience of the guests.

Craftsmanship is the priceless
ingredient sought by every archi-
tect for his client. It is more than
an ideal with us and with the
workmen who are a part of us—
it is an obligation and a tradition
over forty years old.

That is why you will find
Quandt craftsmen wherever fine
work and quality workmanship are
insisted upon.

Co-operation for the economy of
quality.

Pratt's CONCRETE MIX

Charles Pratt

IN STOCKTON, last summer.

DURING A hot spell.

MEN IN a battery place.

SAW A little bird.

WITH BOTH feet.

BURIED IN the melted asphaltum.

AND IN need of help.

WORK WAS stopped.

THE HELPLESS bird was rescued.

HIS FEET carefully cleaned.

WITH GASOLINE, then water.

A DRINK of cold water.

SEEMED THE most welcome.

FOR THE bird.

SHOWED SIGNS of new life.

THE BIRD was then placed.

IN THE shade.

OF SOME ivy and trees.

AND THE boys.

WENT BACK to work.

FULL OF gratitude.

BECAUSE THEY had performed.

AN ACT of kindness.

AND SANDY Pratt, president.

OF THE Pratt Building Material Co.

CENTRAL OFFICE—San Francisco.

ALSO SAND, rock and gravel plants.

AT MARYSVILLE, Sacramento.

PRATTROCK (NEAR Folsom).

AND PRATTCO (Monterey County).

BELIEVES IT pays.

TO DO an act of kindness.

TO BOTH birds and beasts.

AS WELL as to humans.

TRY IT, dear reader.

SANDY FINDS.

THERE is something.

IN THIS world.

BESIDES DOLLARS (and sand).

"I THANK you."

Contrast the above bird story with the treatment of a poor dog named Sandy Pratt, producer of sand, rock and gravel, is sure the boys that rescued the bird are the happier.

CRESCENT CITY, Del Norte Co., Cal.—Richard Hansen, Crescent City, at \$36,651 submitted low bid to county supervisors to erect new jail and city hall. Norman R. Coulter, architect, 46 Kearny St., San Francisco. Mercer-Fraser Co., Eureka, at \$36,750 submitted next low bid. Will be two story in height of reinforced concrete construction. Official Proposals

STATE OF CALIFORNIA CALIFORNIA HIGHWAY COMMISSION NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 515 Forum Building, Sacramento, Cal., until 2 o'clock P. M. on November 30, 1925, at which time they will be publicly opened and read, for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, between Castaic school and three miles north of National Forest Inn (VII-L-A-4-R & C), about fifteen (15) miles in length, portions to be surfaced with macadam.

San Diego County a reinforced concrete girder bridge over the Atchison, Topka and Santa Fe Railway, near Carlsbad (VII-S-D-2-B), consisting of one 27 foot, two 31 foot and two 32 foot spans having a 36 foot roadway and a 5 foot sidewalk.

All bids to be compared on the basis of the State Highway Engineer's estimate of the quantities of work to be done.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineers' offices are located at Willits, Redding, Sacramento, San Francisco, San Luis Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and contractors are urged to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for a joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. MOY,
LOUIS EVERDING,
N. T. EDWARDS,
California Highway Commission.
R. M. MOXTON,
State Highway Engineer,
W. F. MIXON, Secretary.
Dated: November 2, 1925.

NOTICE TO CONTRACTORS

Terminal Paving—Harbor Commission

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS, Union Depot and Ferry House, San Francisco, California, November 2, 1925.

Sealed proposals or bids will be received at this office at or prior to 2 o'clock P. M., Thursday, November 19, 1925, for furnishing materials and labor for paving the floors of the China Basin Terminal building on the water front of the City and County of San Francisco, in accordance with plans and specifications adopted by the Board, October 29, 1925, and on file in this office, to which special reference is hereby made.

The work to be done under these

specifications consists in furnishing all materials and labor for the work of paving the floors of the China Basin Terminal building.

The materials to be used in this work shall consist of the requisite quantities of rock and sand aggregate, asphaltic cement and waterproofing fabric.

The approximate quantities of work to be done under this contract are: 99,000 sq. ft. of 1 1/2" Topka wearing surface, 14,250 sq. ft. of 1" Topka wearing surface and 22,500 sq. ft. of asphalt and fabric waterproofing.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail or neglect to execute a contract and give the bond required within six (6) days after the award is made, in that case, the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot and Ferry House at or prior to 2 o'clock P. M., on Thursday, November 19, 1925, at which time and place the bids will be publicly opened.

The Board reserves the right to reject any or all bids if deemed for the best interests of the State. Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, upon depositing \$10.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Paving the Floors of China Basin Terminal Building."

WM. A. SHERMAN,
M. F. COCHRANE,
JOHN B. SANFORD,
Board of State Harbor Commissioners.
FRANK G. WILCOX,
Chief Engineer.
J. L. PHELPS, Secretary.

NOTICE TO CONTRACTORS

Office of the Clerk of the Board of Supervisors of Alameda County, California.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office until Monday, November 23d, 1925, at the hour of 10:30 o'clock A. M. (the day when said bids will be opened and the contract awarded) for the erection and completion of roadways, walks, steps, terraces, gate-ways, retaining walls and other miscellaneous work contained in Department 26 of Highland Hospital of Alameda County at 14th Avenue and Vallecito Place, Oakland, California.

Complete plans and specifications of said work on file in the office of said Clerk in the Hall of Records Building at Oakland, Alameda County, California, where copies may be obtained by depositing with the County

Clerk the sum of Fifty (\$50.00) Dollars. Contractors will be restricted as to the length of time they may retain these plans and specifications to twelve (12) days.

Contractors failing to return said plans and specifications within said time limit will forfeit their deposit to the County of Alameda. The entire amount of the deposit will be returned to contractors returning said plans and specifications in good condition within said time limit.

Each bid must be accompanied by a check for at least ten (10%) per cent of the total amount of the bid or proposal, certified to by some responsible bank and made payable to Geo. E. Gross, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages, should the party or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

The Board reserves the right to reject any and all bids.

GEO. E. GROSS,
Clerk of the Board of Supervisors
of Alameda County.

NOTICE TO CONTRACTORS

(Sewers—Roseville, Calif.)

Notice is hereby given that sealed bids or proposals will be received by the Board of Trustees of the City of Roseville up to and including the 18th day of November, 1925, at the hour of 8 o'clock P. M., at which time the bids will be opened and contract let to the lowest responsible bidder for the construction of improvements in, and additions to the existing sanitary sewer system of said City, in accordance with plans and specifications for said work on file in the office of the Clerk of said City of Roseville.

Bids must be substantially in the form annexed to the specifications and each bidder must accompany his bid with certified, or cashier's check, payable to the City of Roseville, in the amount of 10 per cent of his bid, conditioned that if the contract shall be awarded to him, that he will enter into such contract in the form annexed to specifications, within ten days after notice of such award is mailed to him by the City Clerk, and will execute a bond to the City of Roseville with a Surety Company as surety, or two responsible sureties to be approved by the Board of Trustees of said City, in the amount of 50 per cent of contract price, conditioned for the faithful performance of said contract, and will likewise enter into a good and sufficient bond to be approved by said Board of Trustees in a sum not less than one-half of the total amount payable by the terms of the contract, conditioned as required by law, for the payment of all persons who have performed labor or supplied materials in such construction.

Such bids to be substantially in the form annexed to said specifications. The Board of Trustees reserves the right to reject any and all bids.

By order of the Board of Trustees, October 22nd, 1925.

R. R. CHILTON,
City Clerk.

KOEHRING DANDIE

Light Mixer

**Four-cylinder
Gasoline
Engine**

FAST! Fast! Fast! Here is a light mixer with a speedy charging skip, liberal drum dimensions and a high speed discharge that will break all your records of putting concrete where it pays you profits!

Just the balanced light weight to haul behind your truck on its rubber tired disc wheels and get from job to job in a big hurry.

Four cylinder, radiator cooled, gasoline engine. Transmission from engine to drum enclosed in oil bath! Double gear drum drive, chilled, beveled gears! Drum rollers fixed to shafts revolving in big bearings!

It's useless to try to give you the smallest idea of what this Dandie represents in superior speed and construction details — but it's *strong, rugged* — it will stand-up for all the punishment you can give it, and *work and work, and work!*

And you have a chance to buy at a price that gives you all the benefit of the economies the Koehring Company effect by big, standardized production! If you had half an idea of what this mixer means in the way of actual value, you would send back the coupon for full detail by next mail!

Koehring Dandie — 7 cu. ft. capacity mixed concrete. High speed charging skip, or low charging hopper with hinged steel framed platform which may be folded against mixer for hauling. Discharged from either side of mixer.

4 cylinder gas engine, radiator cooled, or optional two cylinder engine, hopper cooled. Drum drive transmission in oil bath. Maybe equipped with *automatic water measuring tank*, and *Light Duty Hoist*.

**Send Back this
Coupon!**

CORPORATION PLANS TO MAKE STEEL IN CALIFORNIA

Associated Press dispatch from Los Angeles carries the following information:

The acquisition of a large coal properties at Snoqualmie, Wash., where coke is to be made in sufficient quantities to supply large blast furnaces here, is announced by J. J. Costello, the vice president of the California-Alaska Corporation, as another step in the move to make Southern California a steel producing center.

Costello said four financial groups are interested in the building of blast furnaces here for steel production, and have given their support to the development work thus far conducted by the California-Alaska Corporation. They will build the furnaces, he added, as soon as they are satisfied coke can be brought here in sufficient quantities to insure an unfailing supply.

The Snoqualmie mines are capable of producing 200 tons a day at present, but the company intends to develop a 1,500-ton daily capacity within the next ten months.

Yale Expert to Study Forest Taxation

A nation-wide study of the forest tax problem in relation to reforestation is being launched by the Forest Service, United States Department of Agriculture, which has just announced the appointment of Prof. Fred R. Fairchild of Yale University as director of the investigation.

A detailed study of forest tax will be made in principal forest regions of the United States in order to determine the effect of present tax laws on reforestation and timber holding, and the conditions that must be met in any effort to readjust present tax laws so as to be fair both to the land owner and the county treasury.

This study is the outgrowth of a country-wide investigation of reforestation conducted by a special committee of the United States Senate in 1923-24. This committee came to the conclusion that timber growing would be greatly stimulated by giving land owners security against unjust and burdensome taxation. Provision for the study is embodied in the Clarke-McNary forestry act, passed by the last Congress.

Prof. Fairchild, who will take active charge of the work in November, is regarded as one of the foremost authorities in the country on general tax problems, and on forest taxation in particular. He is a well-known author in the field of general taxation and has

frequently acted in the capacity of consulting tax expert to municipalities and States.

Since 1904 he has been connected with the Department of Economics of Yale University, acting for the past six years as chairman of that department. In 1918 he served the military government of San Domingo, and in 1923 the Republic of Colombia, as tax expert, assisting these governments to plan out a national revenue system. For several years he has served as a member of the advisory committee of the financial department of the Chamber of Commerce of the United States, and also of the National Commission on Federal and State Inheritance Taxation.

California, realizing the importance of the forest tax problem, has already under way remedial legislation looking to the stabilizing of timber growing as a business. The last legislature passed a proposed amendment to the State constitution which recognizes timber as a growing crop comparable to other agricultural crops, and provides for changes in tax methods during the period that the forest crop is reaching maturity—a principle already recognized in connection with other agricultural crops. The people of the State will have an opportunity at the next general election to approve the stand taken by the Legislature.

500,000 MILES OF SURFACED ROADS IN UNITED STATES

The mileage of surfaced roads in the United States is nearing the 500,000 mark, according to the Bureau of Public Roads of the United States Department of Agriculture. Some weeks ago the State reports indicated that there were 128,347 miles of surfaced road on the State systems at the end of 1924 and similar subsequent reports from the States indicated that mileage of surfaced county roads was 339,558 making a total of 467,905 miles. While it is probable that the estimate of county roads is not so accurate as that of the State roads, the above figure is probably not too large.

Since 31,541 miles of road was surfaced in 1924 by the States and counties and it is known that progress has been equally as good in 1925, it is probable that the construction season now drawing to a close will increase the surfaced mileage to more than 495,000. In this estimate allowance was made for a portion of the year's work being re-surfacing or higher improvement of roads previously reported as surfaced.

In addition to surfaced roads a considerable mileage has been graded and drained according to engineering standards. There were 236,294 miles of such road at the end of 1924, and of this 13,689 miles had been constructed during that year. These figures indicate that the improved road mileage of all classes is not far from 740,000.

CODE REVISION AFFECTS SEATTLE PLASTERING REQUIREMENTS

Robt. Proctor, city superintendent of buildings at Seattle, announces an important revision with respect to plastering requirements in Seattle as the result of a revision of Section 520 of the city building code now effective.

When the new draft of the building ordinance was completed several months ago the section relating to plastering specified that "wherever required" the plastering must comply with the code requirements. But it was found, after considerable controversy, that plastering was not required in residence construction. The section has now been revised to read "wherever used" the plastering must be up to requirements.

The requirements are that the lath must not be over 1½ inches wide, the plaster must be at least three-eighths inches thick, the key between the lath must be one-quarter inch thick and the lath and plaster must surface with a three-quarter ground.

"The careless builder must now meet proper requirements and the home buyer will be assured of a good job," states Supt. Proctor. "There has been considerable evasion of plastering requirements by builders of cheap homes and we are seeking to assure the home buyer of proper protection."

THE OBSERVER

WHAT HE HEARS AND SEES ON HIS ROUNDS

The United States will enter 1926 with the building situation well over one year behind requirements, states "Building Age and National Builder," following an extensive survey of 700 cities and towns. The survey discloses that there is still considerable shortage of homes and other buildings in cities of over 25,000 population. This shortage, plus normal requirements, according to the report, must be made up before normal conditions can again prevail in the construction industry. The report shows that there is need for approximately 220,000 small one-family houses costing less than \$5000 and for 100,000 single family dwellings costing from \$5000 to \$10,000.

A recommendation that work begin at once on the task of putting pedestrians of Los Angeles under ground has been agreed on by the city council's tunnels, bridges and viaducts committee. Sites for 26 pedestrian tunnels under some of the busiest boulevards already have been selected by the traffic commission, and a \$350,000 bond issue to finance the project was authorized by voters last May.

George B. Herington, for the past several years consulting engineer of Portland, Ore., has been named secretary of the Portland Chapter of the Associated General Contractors of America. Herington succeeds J. H. Walter who resigned to accept a position with the Latture Equipment Company.

Fred A. Noetzli, consulting engineer of Los Angeles, has received a cable offer of a professorship of engineering in the Institute of Technique, Cairo, Egypt. Noetzli is consulting engineer for the government on the proposed Coolidge dam in Arizona and this was obliged to pass up the Egyptian offer.

Portland, Ore., building operations for the month of October registered \$2,267,280. During the month 1420 permits were issued. For the past ten months the totals aggregate an expenditure of \$33,559,270 as compared with \$25,210,895 during the same period in 1924.

The California Highway Commission is acquiring a system of permanent maintenance stations covering every section of the state. About eighty such stations have already been established. The ultimate development of the maintenance organization will require some 200 such stations.

American River Hydroelectric Co., capitalized at \$5,000,000, with the principal place of business in San Francisco, has been incorporated. Directors are: J. W. Mason, J. A. Talbot, A. J. Cleary, S. E. Kieffer and E. C. Chapman.

J. Cunningham, Sacramento contractor, was slightly injured in that city when run down by a truck owned by the Sacramento Brick Company. He was treated for cuts over the right eye and on the right leg.

William Fitzgerald, formerly with the N. O. Nelson Company, has joined the staff of the M. Stulsart Company.

Alexander W. Dodge, former deputy state forester of California, has joined the staff of James D. Lacey, timber broker of New York City. Since leaving Sacramento several years ago, Dodge has become nationally prominent as a speaker and writer on forestry subjects. He has been employed as private forest expert for John D. Rockefeller and also for the Henry Ford interests.

Expenditure of \$165,000,000 over a six-year period for construction of new government buildings is favored by Chairman Madden of the House appropriation committee, who has conferred with President Coolidge on the subject. Of the total, he would use \$15,000,000 to raise the cost limit on 120 buildings authorized in 1913, but held up because of increased construction costs.

At the recent convention of the Building Trades Department of the American Federation of Labor the Committee on President's Report recommended that the National Board for Jurisdictional Awards consider a plan to maintain a permanent secretary, "clothed with authority to interpret decisions which have been handed down from time to time, as well as render decisions in cases as they may arise."

Portland says that 1,010,886,000 ft. of lumber was shipped from the northwest to the Atlantic coast during the first nine months of this year, and that the last three months of the year will add enough to show a gain for 1925 over 1924: Prices however have not been entirely satisfactory (due probably to unsold stock). Same condition seems to exist in the rail trade, due to transit cars.

Samuel Kahn, vice-president and general manager of the Western States Gas & Electric Company has resigned to become vice-president of the Sierra and San Francisco Power Company. Both concerns are the property of the H. M. Byllesby Company. Kahn was connected with the Western States Company for ten years.

Don Holmes, who has been connected with the engineering staff of the Portland Cement Association in the East, has been transferred to the Pacific Coast with headquarters in Los Angeles.

Robt. Broderick, San Mateo building contractor, suffered cuts about the face in an automobile accident in Burlingame, Nov. 2. Absence of lights on another machine caused the accident.

J. P. Hemphill for several years manager of the Sugar Pine Co., Fresno, has resigned. His successor is B. A. Cannon, former assistant manager.

R. R. Irvine, architect, has moved from room 736 to larger quarters at room 747 New Call Building, San Francisco.

Certified articles of incorporation have been filed in San Jose by the Sunset Lumber Company of Oakland which concern is capitalized at \$100,000.

TRADE NOTES

Independent Sand and Gravel Company plans to expend \$40,000 on its plant within the next twelve months, Fred Althorn, general manager announces. It is proposed to establish a branch receiving yard and sales offices in Santa Rosa. The company's gravel pit is located on the Russian river on the Summer Park road, where an electric pontoon suction dredger is in operation. Pea gravel from this pit, used in highway construction, is being distributed through many western states.

Vernon B. Hammatt has purchased the Cressey Gravel Bar on Merced River near Cressey, Merced County, and is installing a modern gravel and crushed rock plant. The plant will be ready for orders within thirty days. Construction has been started on a bunker of 200 yard capacity, washing plant, screens, crushers, etc., all electrically operated. The investment in plant and trucks will exceed \$20,000.

Western Wheeled Scraper Company of Aurora, Ill., has purchased the patent rights of E. P. Henry of Los Angeles to the California grader and loader and is preparing to place it on the market. The machine will be exhibited for the first time at the Chicago road show next January. This grader is operated by power of the truck as the latter is loaded.

Federal Pipe and Supply Co., 670 Second Street, San Francisco, announces the acquisition of the San Francisco and Fresno branches of the Republic Supply Company of California, continuing the present policies and personnel. The company handles pipe, valves, pipe fittings, galvanized sheet steel screw casing.

A. E. Doney, 2213 N St., Sacramento, R. W. Doney, Davis and Jos. Wallace Beard, 1413 Fifteenth street, Sacramento, have formed a partnership and will operate under the firm name of Doney Construction Company, with the principal place of business at Sacramento.

General Mill and Lumber Company, capitalized at \$50,000, has been incorporated in Oakland, with the following directors: J. M. Hotchkiss, Berkeley; G. N. Whiteside, San Francisco, and Geo. Johnson, Oakland.

Charles O. Carlson will operate in the plumbing and supply business in the Santa Clara county section under the trade name of Palo Alto Plumbing Company with headquarters in Palo Alto.

Phoenix Sidewalk Light Company, capitalized at \$20,000, with the principal place of business in San Francisco, has been incorporated. Directors are: H. E. Simpton, W. I. Simpton and C. T. White.

Peninsula Paving Company, capitalized at \$250,000, has been incorporated in San Francisco. Directors of the company are: H. A. Van der Zee, C. J. Wiseman and J. Farry.

Independent Electric Co., 523 Main Street, Watsonville, has been appointed sales agent in that section for the "Magnaray Electric Heater".

ORGANIZATION NEWS

Organizations having a direct connection with the construction industry are invited to submit news for publication in this department.

ARRANGEMENTS COMPLETED FOR ANNUAL CONCRETE PRODUCTS MEET

All arrangements have been made to hold the next annual convention of the Concrete Products Association in Cleveland, on January 27, 28, 29, 1926. Headquarters of the convention will be in the Hotel Cleveland.

In view of the growing importance of concrete products in the building field, a large attendance is expected at the meeting. There are at present some 10,000 manufacturers of concrete products operating in this country. Plans have been made to receive delegations from every state in the Union.

Educational Features

This year there will be many varied kinds of concrete products represented at the annual convention. Concrete block, brick, tile, pipe and other structural units are now being made in large quantities in practically every state and the annual meeting is the opportunity for the discussion of the problems and practices intimate to the industry.

A tentative program has been prepared with papers dealing with advertising, selling, manufacturing processes, plants and equipment schedules for presentation.

Industry Gaining

The concrete products business from a standpoint of importance to building is comparatively new. Use of these materials only a few years ago was confined to rural builders and some isolated enthusiasts who declared that concrete could be used for all types of construction and ornamentation.

The convention this coming year will meet with the knowledge that its production in terms of common units has passed all competitors, even that of common clay brick. Other products such as trimstone, pipe and ornamental garden fixtures has grown proportionately. Millions of dollars are represented in invested capital and yet the industry is only in its infancy.

It is planned to make the annual meeting the place where all problems connected with the manufacture of concrete products can be discussed and the latest practices explained. Through these means the general standard of the industry can be raised still higher and the advantages of these products in home building, structural construction, and other fields brought to the attention of users.

The day labor methods of public construction occupied the most prominent part on the program of national officials of the Associated General Contractors of America at the recent meeting in Dallas, Texas. Definite action was taken looking toward a legislative limitation of this growing phase of the construction industry. The evils of speculative building and the practice of surety companies in the bonding of irresponsible contractors came in for their share of condemnation and methods of correcting these matters were thoroughly discussed. Other questions discussed at the meeting included the present high cost of financing, new construction, vocational training in the building trades, the elimination of seasonal slumps and the standardization of tools, materials and general equipment.

North Carolina License Law is Outlined by Association Secretary

By V. P. Loftis, Secretary, North Carolina Chapter, Associated General Contractors of America

The idea of having a Licensing Law is to improve competition and eliminate the man who has the desire to be a contractor but has neither the technical training nor experience. The responsible contractor outside of North Carolina will not have any trouble securing a license. We are glad to say that Bankers, Bondsmen, Material Dealers, Architects, Engineers and Subcontractors in North Carolina appreciate our license law and I am sure that every one will like it after they are thoroughly acquainted with the idea and conditions in this State. Our bill has a few weak links which will be corrected without any trouble or political maneuvering at the next session of our legislature.

The only thing that has had any tendency to reflect on the license law in North Carolina is that the legislature put a revenue tax of \$250 on contractors doing not less than \$10,000.00 nor more than \$100,000.00 and \$500.00 on contractors doing more than \$100,000.00. Unfortunately some think that we asked for this but we did not and will not have any trouble getting it reduced at the next session of our legislature.

The State of North Carolina has spent \$60,000,000.00 for new highways within the last three years and has an appropriation of \$20,000,000.00 for the current year, therefore, the members of the legislature felt that the contractors should be taken care of in good shape when they were looking around for new revenue and we naturally got this heavy tax placed on contractors.

During the year 1924 more than fifty contractors went into bankruptcy in the State of North Carolina and a close analysis proves that ninety-five percent of these men were not contractors.

did not know how to estimate, had no equipment and did not know how to run a job after they got it. They had the desire to be a contractor and that was all the bonding companies required.

You would naturally think that after so many had gone broke that they would go into the fly-by-night class and that would be the end, but it is not the case. On the other hand, every foreman they had comes out with a new company for himself and can get a bond just as easily as the man he has been connected with who went into bankruptcy, because they did not know how to take off quantities and price them after they were taken off. Of course we have had some good contractors go broke but the big majority had the desire to be contractors and not the necessary knowledge.

On the Board we have four members of the North Carolina Chapter and the fifth member is a labor newspaper man. It has been mentioned that under Section 10 of this Act that "any person may prefer charges against a contractor for fraud or deceit," which is true. However, if you will go into this further you will see that the charges are to be submitted to the Board and that the Board is the Judge and the Jury.

We contend that contracting is just as much a profession as Engineering, whether a man has obtained his knowledge by technical training or from experience, but to be a contractor he must have some previous training and experience.

EDITOR'S NOTE—Association officials interested in this recently enacted law may secure copies of the act from the office of the National Association of Building Trades Employers, Electric Building, Cleveland, Ohio.

LUMBERMEN ELECT

C. W. Pinkerton, of Whittier, was chosen president of the California Retail Lumbermen's Association at the concluding session of a two-day convention in Fresno. Other officers are: C. G. Bird, Stockton, vice president; Paul Hallingby, Los Angeles, vice president; J. E. Neighbors, Oakland, treasurer; and Mrs. J. E. Fraser, San Francisco, secretary. The climax of the convention was the annual banquet at the California Hotel.

CARPENTER MEMBERSHIP INCREASES

The annual report of the United Brotherhood of Carpenters and Joiners of America, which has just been made public, shows the membership of the union in good standing, totals 328,668. There are 2,136 local unions; 140 district councils; two provincial councils and 130 ladies' auxiliary unions. New York State has the largest membership with a total of 54,444 and 184 local unions.

PERMIT FEES TOO HIGH

The Contra Costa County Builders' Exchange with headquarters at Richmond has appointed a committee to investigate the present city building permit rates so that permit charges can be taken up with the city council and possibly adjusted to conform with the rates charged in other East Bay cities. Richmond contractors declare that building permit fees in that city are three times higher than in other cities of the bay district. They favor a sliding scale reduced particularly on large structures. The committee appointed consists of W. Snelgrove, P. M. Sanford and Chris. Theis.

Announcement that the 1925 shingle congress, the annual meeting of the shingle manufacturers of Washington, Oregon and British Columbia, is to be held in Seattle December 2 and 3 is made by the Red Cedar Shingle bureau, under whose auspices the convention will be staged. It will be the ninth annual meeting of the congress.

JURISDICTIONAL DISPUTES

Address of James J. Davis, Secretary of Labor, before the National Board for Jurisdictional Awards in the building trades, at the offices of the American Federation of Labor, September 22, in an open meeting attended by representatives of the building industry, architects, contractors and officials of building trades and labor organizations.

I appreciate your courtesy in inviting me to this important meeting of representatives of the Building Industry of the country. On the matter of jurisdictional disputes I have strong convictions and shall open my mind freely. As you know, I am a plain blunt pudder of the mills, and I am going to talk to you frankly this morning on the effect these disputes have on the building program of the entire country. In some instances it is more than a jurisdictional dispute—it's civil war between contending organizations.

I am interested in the National Board of Jurisdictional Awards. I am interested in it for a number of good reasons. And I am warmly interested.

As I see it and from information I gather, it is a representative organization. It represents every party and all parties to a jurisdictional dispute. If all parties are not in, there is plenty of room for them to get in. I am interested in this Board because it was suggested by labor and its beginnings were started by John E. Lennon, a commissioner of conciliation who was directed to do so by the then Secretary of Labor. That was in 1918. This Board has settled hundreds of these jurisdictional disputes since then, and has saved millions and millions of dollars for the American people. The whole country is interested in this Board. The need of this Board is plain to all. The whole country looks to it to save the building industry, one of the biggest industries we have, from being shot to pieces by these jurisdictional disputes. Why shouldn't we have peace in this industry, when it isn't a question of whether union labor shall have the job, but which union shall have the job?

Progress Noted

Reading the reports of my predecessor in office, I learn that in forming this Board, Commissioner Lennon got the enthusiastic approval of architects, builders, and men of the building trades in the American Federation of Labor. The thing was a success from the start. Conferences were held in New York, Chicago, St. Louis, and other large cities of this country. The idea was to get some standardization of craft work, and progress was immediate. This Board took formal shape in 1919. As I say, in 6 years it has saved the country untold millions in the disputes it has settled. That is progress. But these disputes go right on. This Board has plenty of work yet to do. Plenty of progress remains to be made.

Some building trades have accepted the awards of this Board. Others have not come along. That means that every one of us must be given to extending the activities of this Board of Awards. All parties should abide by its decisions. This is no "star chamber" outfit. All parties are represented here. And parties have a chance here to get up and say their say. And when an award has been handed down here, all parties should accept that award and carry it out.

I don't know of anything more disheartening to a workman than to set

out in the morning not knowing whether or not he is going to get a day's pay because one of these jurisdictional disputes may be on; I don't know of anything so disheartening to the owner of a building, the man who is paying for it, or to the contractor who employs the men to build it. All parties connected with the enterprise of raising a new building can sidestep the responsibility for these disputes, but it is usually the workman who in the end gets the blame for stoppage of work, and organized labor suffers from it.

Industry Pays

The contractor, the subcontractor, the architect, the owner, the financial organizations paying the bills, are all innocent losers in a situation not of their making. I know many men who are anxious to build, and afraid to build, because of these jurisdictional disputes. They know full well they have only money enough to complete the building, and can't afford to pay interest charges caused by delay when two or more building trades are at loggerheads over which of them shall perform some item of work. It also affects the bond sales and maybe after a time we shall not be able to finance a building because of these disputes.

The fact is, these jurisdictional disputes have become a matter of grave concern to the whole public. The whole business and industrial machinery of the country is upset as one after the other important factors in the national building program are subjected to loss by these wrangles and stoppages of work. The loss begins with the wages of the trades in dispute. It spreads and spreads until large sections of the public are out of pocket. That sort of thing, if long continued, can slow up the building program of an entire section of the country. When loss comes in a package of that size, it has a bad effect on business generally. It is impossible to overemphasize the bad effects arising from one of these jurisdictional disputes. It is just as hard to overemphasize the importance of getting them settled and stopped as promptly as possible. And the worker himself can't get out of his part in getting them settled.

Labor Civil Wars

I don't know of anything that has done more to destroy the chances of organized labor to deal with large organized industrial interests than these civil wars among the unions. Organized labor has withstood destructive assaults, within and without its own ranks. It should root out the jurisdictional dispute. Here and there people are seeking to break the trade union movement in America but so long as the trade union movement stands true to its principles and deserves the support of its membership and the public, it will get that support. It can not be destroyed. But like other movements in this or any other country, organized labor can commit suicide through internal dissension. And these jurisdictional disputes are just that form of

suicide.

It can't be denied that these jurisdictional disputes supply those who are opposed to organized labor with just the propaganda they want for refusing to deal with the union.

Settle these disputes among yourselves, and without stoppage of work. That is profitable to all—to the workers, the builders, the owners.

Disputes Hurt Labor

It is only the building trades that are directly affected by these so-called jurisdictional disputes, but I don't know of anything that had done more to hurt labor in general. In talking with the head of a great manufacturing enterprise as to why his labor wasn't organized, he said to me, "We have more classifications in our industry than there are in the building trades, and if we were dealing with the several unions, their jurisdictional disputes would ruin our business. In the building industry, losses of that kind can be taken care of by directly taxing the people by increasing rents and so on. But our competition is keen, and we have no way of making up losses that might result from jurisdictional disputes, and we can't take any such changes."

You see the bad effects of these disputes don't end with the building trades but reach out into other industries. In the long run they come right back and injure unionism itself.

I realize that with new inventions, improvements, changes in building materials and methods going on all the time, these craft disputes are bound to occur. Some of these are honest differences of opinion. If the question in these disputes were only wages, working conditions, or other matters between workers and employers, there might be reason for stoppage of work until adjustment is reached. But in the case of which craft shall perform a given piece of work, the owner or employer is not in fault. He has no part in the dispute. He has entered into contract and tradesmen have accepted certain terms and conditions of employment.

Therefore, in all fairness the owner employer is entitled to labor's service even though the crafts have a difference among themselves. Our agreements call for unbroken work until the job is completed.

Board Should Decide

If the crafts can't agree, then the matter should go to this Board of Awards in which all are fairly represented. While the difference is being settled, work should go on. And when the Board has decided the question, the decision should be accepted. The resulting chaos if we don't set up and abide by this machinery is plain to all. We cannot stop progress. Recently I visited several points in Europe and saw many buildings, but I was particularly impressed by one new form of steel construction.

Under this process a steel house is constructed in five weeks by common labor at a cost of about \$2,500. I cite

this simply to illustrate the changes in building that are always going on, and to emphasize the need of this Board to settle these disputes. So long as the building industry continues to progress we need to rely on this Board of Jurisdictional Awards, or we all go to destruction.

There are angles to this hold-up habit in building that I can't go into here, but in all the human elements that enter into it, the workman always gets the blame. The jurisdictional dispute is a blot on the fair name of trade unionism. Organized capital doesn't fight itself. It fights its enemies. Trade unionism should stop fighting itself and fight for its best interests. These constant stoppages are costly. They cost the worker, not only in loss of wages, but in constant assessments that the fighting may go on. Every loss caused by these disputes comes home to the worker because every additional cost to a building is paid in higher rents and purchases. These fights are even cutting down work, in frightening people from building.

Here is the case in a nutshell. Invention and change in building methods are going to go on. So long as progress goes on, jurisdictional disputes are bound to occur. The thing is to get them settled. Here in this Board of Awards is the machinery to get them settled. We all have a part in that machinery, and if we don't run it we go to destruction.

After all, the American worker is a business man. We have got to rely on his business sense to refer to this Board all matters in dispute. We must appeal to his business sense to abide by its decisions when handed down. And we appeal to his business sense, his sense of profit and loss, to stay on the job and finish the job until his difference is ended.

L. A. CITY HALL PLAN VIOLATES BUILDING CODE

Can a city circumvent its own laws? This is the question that confronts Los Angeles. Architects' plans for a proposed \$5,000,000 city hall for the southern city indicate a height of twenty-eight stories, reaching 430 feet skyward, topped with a cupola. But the limit of height set out in the Los Angeles building ordinances and city charter restrict all buildings to thirteen stories and 130 feet. So now the Los Angeles City Attorney is considering the question. If his ruling is negative, a vote of the people will be required to sanction erection of the proposed municipal building. If the people will not allow Los Angeles to break her own laws, the architects have agreed to furnish plans for an edifice that will conform to the city charter.

LABOR DEMAND SLACKENS AT SEATTLE, WASHINGTON

Throughout the month of October there was a gradual slackening in the demand for craftsmen whose labor is required on the larger type of buildings, according to the secretary of the Building Trades Council at Seattle. Many large apartments have been completed during the month and comparatively few large structures have been put under way. Residence work does not offer employment to steel erectors and very little to masons, steam fitters, etc. Conditions are better than they were last year at this time. The construction decline noted is seasonal, it is claimed by the tradesmen, who feel that the several large buildings projected for November will provide more work throughout the winter than was expected some time ago.

Wages and Construction Costs in California's Early Days Disclosed

Wages paid and material costs for improvements in connection with the construction of fortifications for the United States Government around San Francisco Bay during the early days in California are disclosed in an article prepared by C. W. Dodge, C. E., Q. M. Corps, Fort Mason, San Francisco, for publication in "The Quartermaster's Marking Post," a monthly publication for the Supply Service of the Ninth Corps Area, U. S. Army. Extracts from the article are published herewith.—EDITOR.

The original inhabitants of California, long before the Spanish regime, were of the yellow race, coming from China, Siberia and Japan by way of the Aleutian Islands and the Bering Sea. The Spanish regime over California dates back to 1521-1822, and the Mexican rule from 1823 to 1848.

Early History

By command of the Spanish Viceroy, Don Antonio Maria Bucareli, Lieut. Colonel Don Juan Bautista de Anza started an expedition from Tubac in Mexico in 1774 to explore the bay of San Francisco, and on March 28, 1776, chose the Central Bight (white cliff), the present Fort Winfield Scott, for the location of a fort. He set aside 2000 veras for the present military reservation of Presidio and Fort Winfield Scott. After Anza left, the command was turned over to Lieut. Don Joseph Joachin Morago, who might be called the original builder of the Presidio of San Francisco, which was built in the form of a square 275 feet on each side. These walls were of redwood palisades. They were replaced in 1778 by adobe walls of same dimensions.

New Fort Plans

It was on March 4, 1792, that Ensign Sal submitted to the governor, Jose Antonio Romeu, the first plan for a fort, with a description as to how it was to be built. It was built in the form of a square 50 yards wide, three sides of which were to be occupied by adobe walls and houses built of mud and stones. The fourth side was protected by a primitive palisade fence. All the structures were roofed with tiles, exposed to fire and wind. So poor was the construction, and so slow the building, that by the time a building or wall was erected, repairs would have to be made on the previous work. However, the elements won a victory; drift sand and storms demolished the fort, and a new one was erected in 1794 on the site of the present Fort Point before the bluff was cut down.

New Plans Approved

Plans for this fort were prepared under Lieut. Jose Dario Arguello by Miguel Costanso, Engineer of Fortifications, and submitted to Governor Jose Joachin de Arillago, who approved same and ordered the construction, naming it Castillo de San Joaquin. The cost of this fort was \$6400. It was built of 10-foot wide adobe walls with stone casemates, laid on mud and braced by redwood posts. It was built in an irregular form of a square 210 feet north and south and 140 feet east and west, with two main entrances on the two sides was a wide esplanade and in the center the barracks consisted of two large rooms, and a portico in size about 60 and 30 feet, also of adobe with tiled roof.

The fort was considerably rebuilt with stones, and in general, made more formidable in the years that followed until in 1808, 1812 and 1813 several earthquakes damaged the walls and barracks of this fort and practically wrecked the Presidio. In 1816 the Castillo de San Joaquin was rebuilt, partly in brick and stone. All masonry was brick lined. These bricks were 11 inches wide, 15 inches long and 2 1/2 inches thick.

Repairs Made

In 1849 repairs were made to the old fort. In 1851, under the direction of General Hitchcock, who was then in command of the Third Division at Benicia, the Chief of Engineers was directed to appoint a board of engineer officers to devise and draw up plans for a modern fort. These plans were approved and in 1853 the work of taking down the old Fort San Joaquin

commenced and the bluff was cut down to the waters edge and a new brick fort started, with Colonel L. Mason, of the Engineer Department, in charge. The fort was finished in 1861 and in 1862.

Wage Scales

The plan of Fort Point is a partial counterpart of Fort Sumpter. The fort provided for quarters for all the officers and men, storage of supplies for the garrison, and of ammunition. Water was stored in large concrete tanks under the floor of the fort. The fort is built mostly of brick with stone trimmings, masonry for the walls, floors, and an asphaltic roof. The workmanship of all the brick and stone work on this fort may be classed as excellent in all details. The cost was close to \$2,800,000, exclusive of the cost of armament and granite sea wall. The wages paid during the construction were: master mason, \$550 per month; masons, bricklayers, wood cutters, \$5 per day; carpenters, \$4 per day; laborers, \$2 per day; blacksmiths, \$5 per day; foreman stone cutter, \$5.50 per day; foreman carpenter, \$5 per day; roofer, \$6 per day.

Materials Furnished

The following firms furnished materials for Fort Point: All the granite was furnished by G. Griffith, Mormon Island Quarries near Polson, at \$20 per ton of 4 cubic feet. Bricks being the largest item in its construction, had to be obtained wherever possible. Most of the face brick, costing \$30.50 per thousand, were made by J. Clay at Russian Hill. Common bricks were furnished by G. H. Harrison, warden at San Quentin, for \$13 per thousand; by John Fisher, from South San Francisco, at \$14 per thousand; by E. Lubbersmeir, from California City, at \$14 per thousand. John Lansman of Sacramento, received \$12 per thousand; also Calhoun & Co., San Francisco. Prices were for delivery on wharf at Fort Point. Lime was furnished by Samuel Adams of San Francisco, at 32 1/2 per barrel; and also by Davis & Jordan. Scotch flagging was furnished by Daniel Gibb & Co. at 40 cents per sq. foot. The J. L. Mott Co. of New York, furnished a large part of the heavy iron castings, and another part was furnished by P. Donahue of San Francisco. The unit cost of castings ranged from 3 to 6 cents per pound. The iron railings and balustrade was erected by John McElbee, contractor of San Francisco, at \$3.50 per foot. All the coal was furnished by A. J. Ramsdall, at \$24 per ton. All the mastic for the roof was from New York by boat, costing \$140 per ton. The first cargo of mastic arrived in the ship "Dashaway" and it cost the Government \$100 per day demurrage because the mastic had melted in the hold of the vessel and had to be cut out, a slow process. The roofer for this job had to be obtained from New York, the Government paying his passage, costing \$100, second class.

LINES SPEED TRAFFIC

On the Peninsula Highway south of San Francisco lines have been painted on the new forty foot pavement dividing it into four traffic lanes. Slowly moving traffic is expected to use the heavier outer shoulders. Faster vehicles will be confined to the two center lanes, thus speeding up traffic and making use of the entire width of pavement.

MAKING A CITY SAFE

Of the 1,500 municipalities in the United States having populations in excess of 5,000, 300 either have no building codes or have ordinances so deficient in their requirements that they are of very little value in promoting structural safety or restricting the spread of fire.

These facts were brought to the attention of the National Fire Waste Council at its last meeting. They will be brought in greater detail to the attention of chambers of commerce and commercial organizations by the Insurance Department of the Chamber of Commerce of the United States in order that concerted local effort may be made to improve conditions in this respect.

There are cities of 12,000 to 15,000 with excellent building codes, according to the report made to the Fire Waste Council. There are, too, cities with populations of 40,000, 60,000 and 80,000 without building codes.

"Every city which has developed without proper regulatory building laws," says the report, "has created danger spots which it will take generations to eliminate and which are always a source of potential hazard to its well-being and a cause of heavy taxation. The most common characteristics of such lawless construction are the massing of wooden buildings, sometimes three to five stories high, with little or no separation and frequently adorned with all their attendant structural defects, all favorable to easy ignition and rapid fire destruction."

THE HIGH COST OF FIRE

It has been estimated that the fire waste of the United States is \$1044 a minute. Staggering as it may be it is not all of the story.

At the last meeting of the National Fire Waste Council, which is cooperating with the Chamber of Commerce of the United States to cut down the fire toll, Ira H. Woolson, New York engineer, made the following estimate:

"The best census figures available indicate a total urban population in the United States for cities having a population in excess of 8,000 as approximately 50,000,000. Assessing the average cost per capita of \$2.70, as calculated in 23 cities, upon this population would indicate a cost for fire department service of \$135,000,000, or a total annual fire loss to the country of \$670,000,000, exclusive of water supply. Such figures are staggering and they are believed to be conservative. The end is not reached. How long can we stand such terrific waste? The burden is needlessly heavy because much of it can be eliminated by judicious legislation."

Upon this basis of calculation the cost of fire would be approximately \$1.275 a minute.

The reason for this condition Mr. Woolson attributes largely to our habits of trail combustible construction. "Coupled with this," he concludes, "is our excessive carelessness and wastefulness. These two national characteristics have reciprocal relations, each stimulating the other and both creative of fire hazard."

The bureau of public roads of the agriculture department estimates that the close of this season's road construction work will bring the nation's total of hard surfaced highways to nearly half a million miles. The estimate was based on reports from states and counties throughout the country.

1926 Construction Will Tend To Level With Population Growth

The year 1925 is probably the peak of the present cycle of building activity," says the National Bank of Commerce in New York. "In 1926 construction should tend toward a level commensurate with the steady growth of the population, industry and prosperity of the country. The level attained ought to be high enough to avoid any serious depression in the industry itself or reaction on general business." Continuing in the November issue of "Commerce Monthly," the bank says:

"The influence of building and construction on general business in 1926 will be second to none. This group of industries is so closely woven into the fabric of the whole industrial and commercial structure that a high rate of activity would go far toward assuring good business and any marked recession would adversely affect the general prosperity. There are peculiar difficulties involved in any attempt to appraise the current situation as to demand for and supply of building space, but on the basis of such data as are available it appears that by the end of the current year, the shortages accumulated during the war period will have been on the average, about made up.

Demand and Supply

"Demand, cost of construction and supply of capital are the most important forces that control the building industry. Three principal factors in the demand which has resulted in the sustained program of the last four years may be distinguished—the requirements of normal growth, demand resulting from a higher standard of living and the making-up of the wartime shortage.

"The so-called normal demand is that which results from the replacement of obsolete or destroyed facilities and from the natural population growth of the country and consequent expansion of business. At the present time it is estimated that around three and a half or four billion dollars is required annually to take care of this growth in the United States.

"One result of the war was a wider distribution of the luxuries of life and a general raising of the standard of living in the United States, so that what satisfied people before the war does not satisfy them now. In the field of residential, and, in fact, in all fields of construction this desire has occasioned an extensive but immeasurable demand for new construction.

"The demand attributable to these factors would not have caused the unwelcome activity witnessed in the last four years had there not been added the cumulative effect of war-time shortage. Whether the vacuum created by the war has yet been filled is a much mooted question.

Shortage Met

"The United States Bureau of Labor Statistics, from a study of permits issued in a group of 130 cities, recently announced the conclusion that taking the country as a whole the end of the war shortage was probably reached before the close of 1924. In this opinion the bureau is supported by several statistical organizations interested in the building industry.

"On the other hand, a good deal of evidence has been presented for the opposite side of the question; and against the conclusions of the bureau, it has been urged that its calculations used as a basis the value of permits issued in the single year, 1914, a figure

apparently much below either the level of 1913 or the average of the years 1910-14. The employment of too low a base figure reduces the estimated amount of shortage in later years."

As to this question, from an independent study of the trend of construction from 1913 to 1925, as evidenced by building permits in 66 cities, the bank concludes that, apparently, most remained in the United States at the end of 1924 a shortage of over \$3,000,000. Of necessity, such a figure is the roughest of estimates. Furthermore, it is a total for the country and cannot be interpreted as meaning that requirements had not anywhere been made up. Doubtless in many cities and towns there was no shortage at that time, while in some there may have been an excess of building. Assuming that the balance of 1925 continues at the rate of the first nine months, however, the excess of construction in 1925 over the normal level will eliminate most of the shortage existing at the end of 1924.

Rentals

"The general rent index for the United States as a whole has been declining moderately since September, 1924. A decline of rentals is certainly an evidence of the approaching end of the housing shortage. However, care must be used in interpreting the trend of such an index, and in drawing from its movement conclusions respecting the future activity of construction. As rents are dependent primarily on local conditions, there are wide variations from city to city and from one section of a city to another. Reports from individual cities indicate that where rents are declining it is usually in one particular class of residence, most frequently in the high-priced class. A decline in one class reduces the average but has comparatively little effect on the rents in other classes where high rents show that further construction is needed imperatively.

"As demand for building and construction returns to normal, prices of building material and of wages will become increasingly important factors in determining the amount of new building to be undertaken, both directly and because of their influence on the availability of capital. A return high enough to give satisfactory yields on investments in any line based on costs materially higher than the general price level is a reasonable expectation only when demand is abnormally high in relation to supply. It seems a safe assumption that under existing conditions further increases in wages or prices of building materials would drastically curtail building for a time, for such advances would make the earning power of capital invested in buildings increasingly doubtful.

Costs Movements

"A downward movement of costs, while it might occasion a temporary let-up in activity, would probably tend to stimulate the long-run volume of building for lower cost and lower risks would permit investment of capital in the low-rent type of residence structures for which there is an unsatisfied demand.

"In summary, the tremendous building activity throughout the past four years has nearly satisfied the cumulative shortage of the war and post-war years. Apparently there still remains a small shortage, which, with the ordinary requirements of a growing and prosperous population, should be sufficient to maintain activity at a high

rate for some time. The markets for both building materials and labor, however, have been keyed up to the abnormally high level of construction. A decline from this level will undoubtedly make itself felt in these markets. Lower building costs, although they may temporarily check activity, will in the long run tend to sustain and even to stimulate the volume of construction."

L. A. BUILDING DURING OCTOBER EXCEEDS ELEVEN AND ONE-HALF MILLION

Los Angeles' building for 1925 has kept up a steady pace and the record for months shows a closer approximation to normal than for any year since the construction industry was upset by the world war. During October the city building department issued 3882 permits with an estimated valuation of \$11,655,786. This is a gain of approximately 5.4 per cent over the preceding month when 3704 permits with an estimated valuation of \$11,071,923 were issued and corresponding gain over October, 1924, when the number of permits issued was 4312 with an estimated valuation of \$11,057,277.

Class A construction for October, 1925, was \$1,350,000 less than for the preceding month, permits having been issued for five structures of this class estimated to cost \$1,317,000. Class C construction for October amounted to \$2,242,230 covering 97 buildings, which was a gain of about half a million over the preceding month. Class C, all-frame construction, for October totaled \$5,927,033 for 2501 buildings, which is also a gain of about half a million dollars over September.

For the current year Los Angeles' building total still lags behind that of last year, the figures for 10 months being \$127,423,319, or \$1,146,140 less than for the corresponding period last year. Following is the record by months for the current year and for 1924:

	1925	1924
Jan.	\$11,171,162	\$13,158,326
February	10,884,244	16,088,412
March	14,740,003	17,378,758
April	14,498,831	13,224,568
May	16,602,502	17,789,932
June	15,305,516	10,392,542
July	11,298,896	11,599,782
August	10,221,257	13,899,095
September ...	11,071,923	13,512,182
October	11,655,786	11,057,277
Totals	\$127,423,319	\$128,569,459

Housing operations for October showed a gain as compared with the preceding month. Permits were issued for 1207 dwellings and apartment houses estimated to cost \$6,327,730, comprising 31.1 per cent of the total number of permits and 54.2 per cent of the total valuation for the month. Accommodations were provided for 1920 families. Following is the record of housing operations for the current year by months:

	No. Per.	Value	No. Fam.
Jan.	1388	\$5,781,731	2063
Feb.	1150	5,032,350	1703
March	1590	6,611,413	2362
April	1360	6,160,666	1984
May	1189	5,691,853	1709
June	1182	5,727,193	1855
July	1168	6,251,644	1959
Aug.	1291	5,749,226	1838
Sept.	1186	5,484,045	1575
Oct.	1207	6,327,730	1920
Totals	13,238	\$58,707,881	18,968

Apartment house building for October shows a gain over the preceding month, permits having been issued for 44 apartment houses estimated to cost \$1,701,700 as compared with permits for 29 apartment houses estimated to cost \$1,054,600 issued during September.

Building Materials Standardized—City Building Codes Absurdly Variant

By R. G. Kimbell, Architectural Engineer,
National Lumber Manufacturers' Association.

An indication of the importance of the construction industry may serve to emphasize the value of standardization and simplification to it.

The construction industry provides one of the three basic necessities of life—they being food, clothing and shelter.

The industry is second in magnitude only to agriculture.

Construction absorbs approximately 30% of the country's savings.

Nearly 30% of our estimated wealth has been produced by construction—well over one hundred billions of dollars. The industry supports a directly employed army of more than a million; and for every man engaged in building there are five indirectly employed by it. Building contracts alone were in excess of five billion dollars last year. Eighty-five per cent of our industries are directly or indirectly dependent on the success of construction.

For the lumbermen it absorbed approximately twenty-two billion feet of lumber last year, nearly 60% of our production of some thirty-seven billion feet.

This was from the output of 30,000 saw mills (with 800,000 men working in the forests backed by ten billions of capital) and afforded the railroads one of their chief sources of revenue by paying a freight bill of nearly \$800,000,000.

Suppose construction were to stop tomorrow. Careful students have estimated that in about six years the few of us left would be back on the soil. No inter-communication, no transportation, no manufacturing, no industries and no cities. Life would again be primitive.

The significance of simplification is generally appreciated. We also know the effect of standardization in bringing about economy in production costs, particularly on a quantity basis.

That intelligent guiding agency so necessary to the progress of a movement so mass-like in character as a simplification ambition was found in that department of our Federal Government, which is under the wise and able direction of Secretary Hoover.

The advisory work of that department on simplified practice has accomplished amazing results, ranging in variety from the beds on which you sleep to the utensils from which you eat and the material which, when assembled by the construction industry, provide you with shelter from the elements.

The lumber industry is now working under the American Lumber Standards, which have been progressively developed during the past three years. Secretary Hoover in opening the third general standardization conference last year referred to the progress which had been made by the following words:

"I am glad to tell you that the survey made by the Central Committee on Lumber Standards shows that during the past quarter the standards already established have been used in the movement of the vast bulk of lumber in this country. This is, indeed, an astonishing success. It has been esti-

mated by a responsible member of the industry that the waste already eliminated by this work runs into millions yearly. Whatever it may be it is just as important to the public and the industry as a reduction in taxes."

Such is the advance made with a major basic material, lumber, used structurally in ninety-nine of every hundred buildings, and upon which the agencies creating those structures are largely dependent for success.

But the success of simplification is confronted by obstacles. This endeavor cannot reach full accomplishment while we are confronted throughout the country by an array of building regulations characterized by requirements that are thought by some to be peculiarly individual, but are in reality merely idiosyncratic. In fact, much of the progress and inventiveness in the building industry has been in spite of rather than because of the character of municipal regulations. Unless these ordinances, now so diversified in their requirements, are modified to comprehend standards and practices that are fundamental to simplification, much of the effectiveness of standardization will be lost.

For example, a dwelling in Charlotte, North Carolina, must have its floors of sufficient strength to support a load of one hundred pounds per square foot distributed over its entire area, while in Milwaukee the same floor need be designed to support only 30 pounds. Are people and furniture so much more weighty in Charlotte than in Milwaukee? Is an 8-inch masonry wall so much stronger in Cleveland than 16 inches of brickwork is necessary to perform the same functions in North Carolina?

The allowable stress which one is permitted to use in designing with pine timber in one city is 500 pounds per square inch, but if that timber is shipped a short distance to another city it becomes more than three times as much. Does the timber absorb that additional strength from the air during transit or is the atmosphere of this other city so invigorating that it affects even inanimate materials?

Building codes are a necessary protection against ignorance and stupidity. It is essential that they be based on truth and fact, but too often they have been based on precedent which was established on an insecure foundation.

Examination of a distribution of population and of industry reveals that industrial expansion is directly responsible for the growth of most American cities. But in recent years many large industrial corporations have sought to escape unnecessary burdensome restrictions by erecting plants entirely outside of city limits—a direct challenge to the city to furnish equal advantages and opportunities to the industry and to its employees.

This challenge will be met when building laws require all industrial buildings to be reasonably safe, that is, to have such a degree of safety as is suited to their location, size and occupancy.

Craftsmanship is the priceless
ingredient sought by every archi-
tect for his client. It is more than
an ideal with us and with the
workmen who are a part of us—
it is an obligation and a tradition
over forty years old.

That is why you will find
Quandt craftsmen wherever fine
work and quality workmanship are
insisted upon.

Co-operation for the economy of
quality.

MARYSVILLE, NOVEMBER 12, 1925.

SANDY PRATT is here.

CLAIMING THE contract.

TO SUPPLY the "hot sands."

TO LEN A. Temple.

OF SHRINERS.

WHO INITIATE a big class.

IN MARYSVILLE'S new auditorium.

ON SATURDAY night.

SANDY PRATT, President.

OF THE Pratt Building Material Co.

WITH SAND and rock plants.

AT SACRAMENTO, Marysville.

PRATTROCK (NEAR Folsom).

AND PRATTICO (Monterey County).

CLAIMS THE Shriners.

SELECTED HIS Marysville sand.

BECAUSE IT is sharp.

AND SANDY really feels sorry.

FOR THE poor candidates.

THAT HAVE to walk.

OVER HIS "sharp sand."

THEY SAY rooms.

WILL BE scarce.

IN MARYSVILLE.

ON SATURDAY next.

AND SANDY Pratt says.

THE VISITORS can sleep.

IN THE "bed."

OF THE Yuba River.

WHERE SANDY digs sand.

"I THANK you."

The only connection between the above sign and Sandy Pratt's K.C.B.-like story about Sandy's now famous sign is that after the candidates at Marysville walk over Sandy's sharp sand they will want to travel "99 miles per hour."

Your life is in your own hands!

YOU have often noticed that even the most robust of your acquaintances have been stricken by tuberculosis. The dread disease is everywhere. No one is immune. The germs scattered by one careless case of consumption can infect a whole community.

There is only one sure escape. That is to stamp out the dread disease entirely. It can be done. The organized work carried on by the tuberculosis crusade has

cut the tuberculosis death rate in half.

You can help in this great work. You can protect your life, and the lives of your family and friends. Buy Christmas Seals. The sale of Christmas Seals provides the funds to wage this increasingly successful war upon tuberculosis. Let your every Christmas parcel, letter, and greeting card carry these cheery little messengers of health to all the world, Christmas Seals.

Official Proposals

NOTICE TO CONTRACTORS

Mechanical Equipment—Pacific Colony

Sealed bids will be received by Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, up to 2 o'clock P. M., Tuesday, December 8th, 1925, said bids then and there to be publicly opened and read, for furnishing all plant, materials and labor required for the erection and completion of the **Mechanical Equipment, Cottages No. 4 and No. 6 for Inmates, and Boiler Plant, Pacific Colony, near Pomona, California**, in accordance with plans and specifications thereof, copies of which may be obtained on application to the Division of Architecture, State Department of Public Works, Forum Building, Sacramento, California. Plans and specifications will be on file, for inspection only, at 818 Pacific Finance Building, Los Angeles, California.

Cash, a bidder's bond made payable to the State of California, or a certified check made payable to the "State Engineer, Department of Public Works," in the sum of at least ten per centum (10%) of the amount of the bid, must be enclosed with each bid.

A deposit of twenty-five (\$25.00) dollars will be required on plans and specifications, the deposit to be returned immediately upon the return of plans and specifications to the Division of Architecture, at Sacramento, California, in good condition.

The Division of Architecture, State Department of Public Works, reserves the right to reject any or all bids and to waive any informality in any bid received.

All bids must be addressed to Geo. B. McDougall, State Architect, Chief, Division of Architecture, Forum Building, Sacramento, California, and plainly marked on the envelope: "Proposal for Mechanical Equipment, Cottages No. 4 and No. 6 for Inmates, and Boiler Plant, Pacific Colony, near Pomona, California."

STATE DEPARTMENT OF PUBLIC WORKS, DIVISION OF ARCHITECTURE,

Geo. B. McDougall, State Architect.
W. F. McLURE, Director of Public Works.

NOTICE TO CONTRACTORS

(Plumbing Fixtures—Franklin School)

The Board of Education of the City of Berkeley, and Berkeley School District of Alameda County, State of California, hereby calls for sealed proposals to be delivered to the Secretary of the Board of Education of the City of Berkeley, and Berkeley School District at his office, 2133 Alston Way, Berkeley, California, up to the hour of 4 o'clock P. M., Tuesday, November 24th, 1925, for furnishing the necessary materials, tools and labor for the installation of plumbing fixtures at the Franklin School, San Pablo and Virginia Sts., in accordance with the plans and specifications therefor on file at the office of said Secretary to which reference is hereby made. Copies of said specifications will be sent to any bidder on application. All bids must be made on forms furnished on application to said Secretary at the address above given.

Work on the above contract must commence within 48 hours from notification of the Board of Education to commence said work and be diligently prosecuted until completion thereof unless otherwise ordered by said Board of Education.

The successful bidder will be required to furnish a surety bond acceptable to the Board of Education in a sum not less than fifty (50%) per cent of the contract price, guaranteeing the faithful performance of the con-

A call for bids published in this section indicates that bids are desired from other than local bidders. Maximum competition is desired, and this is assured through BUILDING AND ENGINEERING NEWS which reaches every worthwhile contractor and materialman in Central and Northern California who bids on public work.

Rate: 10 cents per line, per insertion.

All official calls for bids of the California State Highway Commission and Nevada State Highway Commission are published in this section.

tract; also a bond in a sum not less than fifty (50%) per cent of the contract price guaranteeing the payment of all claims for labor employed, or materials used in the above work, as provided by an act of Legislature of the State of California entitled "An Act to Secure the Payment of Claims of Materialmen, Mechanics or Laborers, employed by Contractors upon State, Municipal or other Public Work, approved March 27, 1917," and must carry adequate insurance indemnifying the Board of Education against liability for compensation provided by "Workmen's Compensation Insurance, and Safety Act, approved May 26, 1913," satisfactory to the said Board of Education.

Bids must be signed by the bidder and accompanied by a certified check, or by some responsible bank or banker and made payable to the order of the Board of Education of the City of Berkeley and Berkeley School District, of Alameda County, in an amount of at least ten (10%) per cent of the total amount of the bid, to be retained by the said school district as agreed and liquidated damages should the party or parties to whom the contract is awarded fail to enter into the contract after the award or to give the bond required for the faithful performance of the contract or any bond required by law.

The Board of Education reserves the right to reject any or all bids, or any or all items of such bids.

Bids will be opened by the Board of Education on Tuesday, November 24, 1925, at the hour of 4 o'clock P. M., in the office of said Board, 2133 Alston Way, Berkeley, California.

By order of the Board of Education, November 3rd, 1925.

GEORGE S. MOUSER, Secretary of the Board of Education of the City of Berkeley, County of Alameda, State of California.

NOTICE TO CONTRACTORS

(Terra Bella Irrigation District)

Notice is hereby given that the Board of Directors of the Terra Bella Irrigation District will receive sealed bids or proposals for the construction of a concrete sump and headgate and screens as per plans and specifications prepared therefore up to the hour of 11 o'clock A. M. on Tuesday, December 1st, 1925. The Board of Directors reserves the right to reject any or all bids to waive defects.

A certified check made payable to the Terra Bella Irrigation District of not less than five per cent (5%) of the total amount of the bid shall accompany each bid as a guarantee that the successful bidder will enter into contract with the District within ten days after the work has been awarded to him.

All bids must be addressed to Earle R. Clemens, Secretary Terra Bella Irrigation District, Terra Bella, California, and marked on the outside, "Bids for concrete sump, headgate and screens."

EARLE R. CLEMENS, Secretary Terra Bella Irrigation District.

NOTICE TO BIDDERS

Pumping Plant—Arden School District

Bids will be received up to 6 P. M., Monday, November 23, 1925, by E. A. Crockett, Clerk of the Board of Trustees of Arden School District, Route 5, Box 301, Sacramento, Calif., for the installation of a pumping plant having a capacity of not less than 75 G. P. M. against a total head of 75 feet. Said pumping plant to consist of an 18-inch Centrifugal Pump, 100 H. P. motor connected to a 5 HP, 3 phase, 60 cycle, 220 volt Induction Motor together with pipe, fittings, wiring, etc., specifications of which may be obtained from the Clerk.

NOTICE TO CONTRACTORS

SEALED PROPOSALS will be received at the office of the California Highway Commission, 315 Forum Building, Sacramento, Cal., until 2 o'clock P. M., of November 19, 1925, at which time they will be publicly opened and read for construction, in accordance with the specifications therefor, to which special reference is made, of portions of State Highway, as follows:

Los Angeles County, between Castaic school and three miles north of National Forest Inn (VII-L-A-4-R & C), about fifteen miles in length, portions to be surfaced with macadam.

San Diego County a reinforced concrete girder bridge over the Atchison, Topeka and Santa Fe Railroad, near Carlsbad (VII-S-D-2-B), consisting of one 27 foot, two 31 foot and two 32 foot spans, having a 30 foot roadway and a 5 foot sidewalk.

All bids to be compared on the basis of the State Highway Engineer's estimate of the quantities of work to be done.

Plans may be seen, and forms of proposal, bonds, contract and specifications may be obtained at the said office and they may be seen at the offices of the Division Engineers at Los Angeles and San Francisco, and at the office of the Division Engineer of the division in which the work is situated. The Division Engineer's offices are located at Willets, Redding, Sacramento, San Francisco, San Luis

Obispo, Fresno, Los Angeles, San Bernardino and Bishop.

A representative from the Division office will be available to accompany prospective bidders for an inspection of the work herein contemplated, and contracts are invited to investigate the location, character and quantity of work to be done, with a representative of the Commission. It is requested that arrangements for joint field inspection be made as far in advance as possible. Detailed information concerning the proposed work may be obtained from the Division office.

No bid will be received unless it is made on a blank form furnished by the Commission. The special attention of prospective bidders is called to the "Notice to Contractors" annexed to the blank form of proposal, for full directions as to bidding, quantities of work to be done, etc.

The California Highway Commission reserves the right to reject any or all bids or to accept the bid deemed for the best interests of the State.

HARVEY M. TOY,

LOUIS EVERDING,

N. T. EDWARDS,

California Highway Commission.

R. M. MORTON,

State Highway Engineer.

W. F. MCCLURE, Secretary.

Dated: November 2, 1925.

NOTICE TO CONTRACTORS

Office of the Clerk of the Board of Supervisors of Alameda County, California.

Sealed bids will be received by the Clerk of the Board of Supervisors of Alameda County, at his office, until Monday, November 23rd, 1925, at the hour of 10:30 o'clock A. M. (the day when said bids will be opened and the contract awarded) for the erection and completion of roadways, walks, steps, terraces, gutters, retaining walls and other miscellaneous work contained in Department 26 for Highland Hospital of Alameda County at 14th Avenue and Vallecito Place, Oakland, California.

Complete plans and specifications of said work on file in the office of said Clerk in the Hall of Records Building at Oakland, Alameda County, California, where copies may be obtained by depositing with the County Clerk the sum of Fifty (\$50.00) Dollars. Contractors will be restricted as to the length of time they may take their plans and specifications to twelve (12) days.

Contractors failing to return said plans and specifications within said time limit will forfeit their deposit to the County of Alameda. The entire amount of the deposit will be returned to contractors returning said plans and specifications in good condition within said time limit.

Each bid must be accompanied by a check for at least ten (10%) per cent of the total amount of the bid or proposed to be certified to by some responsible bank and made payable to Geo. E. Cross, Clerk of the Board, to be forfeited to the County of Alameda as agreed and liquidated damages should the contractor or parties to whom the contract shall be awarded fail to enter into the contract after the award or to give the bond required by the Board for the faithful performance of the contract.

The Board reserves the right to reject any and all bids.

GEO. E. CROSS, Clerk of the Board of Supervisors of Alameda County.

NOTICE TO CONTRACTORS

Terminal Paving—Harbor Commission

OFFICE OF THE BOARD OF STATE HARBOR COMMISSIONERS, Union Depot and Ferry House, San Francisco, California, November 12, 1925.

Sealed proposals or bids will be received at this office at or prior to 2 o'clock P. M., Thursday, November 19, 1925, for furnishing materials and labor for paving the floors of the China Basin Terminal building on the water front of the City and County of San Francisco, in accordance with plans and specifications adopted by the Board of State Harbor Commissioners on October 29, 1925, and on file in this office, to which special reference is hereby made.

The work to be done under these specifications consists in furnishing all materials and labor for the work of paving the floors of the China Basin Terminal building.

The materials to be used in this work shall consist of the requisite quantities of sand, gravel and aggregate, asphaltic cement and waterproofing fabric.

The approximate quantities of work to be done under this contract are: 99,000 sq. ft. of 1 1/2" Topack wearing surface, 14,250 sq. ft. of 1" Topack wearing surface and 22,500 sq. ft. of asphalt and fabric waterproofing.

No bid will be received unless it is made on a blank form furnished from this office and is accompanied by a certified check for an amount equal to five (5) per cent of the amount of the proposal, to be made payable to the Secretary of the Board, conditioned that if the proposal is accepted and the contract awarded, and if the bidder shall fail to execute the contract and give the bond required in six (6) days after the award is made, in that case the said sum mentioned in said check shall be deemed liquidated damages for such failure and neglect, and shall be paid into the San Francisco Harbor Improvement Fund.

Bids will not be considered by the Board unless delivered to the Secretary or to the Assistant Secretary, at the office of the Secretary, Room No. 17, Union Depot and Ferry House at or prior to 2 o'clock P. M. on Thursday, November 19, 1925, at which time and place the bids will be publicly opened. The Board reserves the right to reject any or all bids deemed for the best interests of the State.

Plans and specifications for this work to be had at Room 18, Union Depot and Ferry House, and upon depositing \$10.00 for same, which will be returned on return of plans and specifications.

Bidders are requested to mark envelope containing bid: "Bid for Paving the Floors of China Basin Terminal Building."

WM. A. SHERMAN,

JOHN F. COCHRAN,

MADEIRA E. SANFORD,

Board of State Harbor Commissioners.

FRANK G. WHITE,

Chief Engineer.

J. L. PHELPS, Secretary.

NOTICE TO CONTRACTORS

Notice is hereby given that sealed bids or proposals will be received by the Board of Trustees of the City of Roseville up to and including the 18th day of November, 1925, at the hour of 2 o'clock P. M. at which time the bids will be opened and contract let to the lowest responsible bidder for the construction of improvements in, and additions to the existing sanitary sewer system of said City, in accordance with plans and specifications for said work on file in the office of the Clerk of said City of Roseville.

Bids must be submitted in the form annexed to the specifications and each bidder must accompany his bid with certified, or cashier's check, payable to the City of Roseville, in the amount of 10 per cent of his bid, conditioned that if the contract shall be awarded to him, that he will enter into such contract in the form annexed to specifications within ten days after notice of such award is mailed to him by the City Clerk, and will execute a bond to the City of Roseville with a surety company as surety, of two responsible sureties to be approved by the Board of Trustees of said City, in the amount of 50 per cent of contract price, conditioned for the faithful performance of said contract, and will likewise enter into a good and sufficient bond to be approved by said Board of Trustees in a sum not less than one-half of the total amount payable by the terms of the contract, conditioned as required by law, for the payment of all persons who have performed labor or supplied materials in such construction.

Such bids to be substantially in the form annexed to said specifications. The Board of Trustees reserves the right to reject any and all bids.

By order of the Board of Trustees, October 22nd, 1925.

R. R. CHILTON, City Clerk.

Architects—Engineers— City and County Officials

How about bids wanted?

Are you satisfied with the bids you received on that last job?

Did you have competition—and plenty of it?
If not—why not?

Without charge the BUILDING & ENGINEERING NEWS will place your job before the construction interests of the Pacific Coast. That means competition and—competition means the lowest possible bid.

If you want competition send particulars of your job to BUILDING & ENGINEERING NEWS—also a set of plans and specifications.

Reach the *Independent Bidder* through the columns
of BUILDING & ENGINEERING NEWS

The combined news services of BUILDING & ENGINEERING NEWS have a circulation of

3340

—reaching the Engineer, Contractor and Material Dealer.

Can you reach one quarter the amount of interested people through any other news service published in this section? We think not—in fact, we know you cannot.

If you want *competition*—if you want *independent* contractors to figure your job—if you want the *lowest possible bid*—send particulars of your project to
